the river? on level ground or inclining downwards to the river? he should enclose & glaze its windows & use it for draining or curing and grind & boil in an open house or shed adjoining - the mill on higher ground than the kettles & boilers - has he built any high chimney to his house & if so do you recollect on which side upper or lower - corner or middle - I should have more properly corresponded with him on these subjects - but did not think of them in time -
besides the boilers there will be the mill which will probably weigh 5 to 8 tons the Engine 2 or 3 tons two clarifying boxes abt 85 feet each (10 x 4 x 1 in) 5 carts - & some bbls of lime - & four kettles (say 2½ tons) - Yours Respy
