57

New York 5th May 1857

Mr Geo. W. Hall
Balt.

Dr Sir

Your father has suggested that any part of the machinery for Mr Richardson which might not be in time for the M.S. Stevens - could probably go by a vessel which you are about to send out - I expect every thing will be ready for the Stevens except the Mill and gearing wheels which will be heavy but not bulky the Mill will consist of the bottom plate two sides & 3 Rollers each piece weighing probably about a ton - besides two wheels abt 6 feet diameter ea - & 2 small ones they may be in Balt. by the 16th or 20th instant - please say (if left by the Stevens) whether your vessel can take them

I was sorry to hear that you have been quite ill, I hope you have recovered

Yours Respectfully

H. McSchieffelin
