ARMY SEEKS METHODS TO FIGHT ATOMIC WAR FIRES

An army civil defense expert this week said fires may well be "public enemy No. 1" in any future atomic war. He added the War Department has under study new methods of meeting such an emergency.

Maj. Gen. Harold R. Bull, member of a special arm board studying civil defense in the light of new modes of warfare, told the First National Fire Prevention Conference, "The utter and sudden devastation of atomic attack, with many added hazards for the fire-fighters to cope with, will call for development of some new techniques, equipment and types of training."

He said he department was studying the "procedures and training and equipment" that will be required to insure prompt response by the military in an emergency beyond the civil authorities to control, whether the hostile action comes by sabotage, bombs, incendiaries or other weapons.

"Development of new weapons," he asserted, "will increase an enemy's capabilities for fire devastation many hundredfold to a point where paralysis of our war-making capabilities is a possibility unless we develop and take counter measures."

Protection to meet simultaneous fire attacks on crowded American cities will require several methods, Maj. Bull said. They include:

1. Training of all individuals in elimination of unnecessary fire hazards and in "immediate action" methods of individual fire fighting to suppress and control incipient fires.

2. Augmentation of local trained ire fighting reserves.

3. Development of mutual aid arrangements.

4. State support of communities through emergency control of the available mobile fire reserves with in the states.

5. Federal emergency support, with available means including necessary elements of the armed forces in aid of the civil powers in stricken communities "in spite of such desirable diversion of troops from their primary mission."

O'CONOR PROTESTING CUTS IN FISHERIES

Threatened abolition of the Fisheries Technological Laboratory at College Park and elimination of Federal cooperation in ground water studies occasioned by announced House cuts in the appropriation for the Department of Interior for the coming year, were fought vigorously by Senator Herbert R. O'Conor in a statement presented on the Senate floor.

Senator O'Conor called particular attention to the excellent work done by the Laboratory to further the economic progress of seafood interests not only in the Chesapeake Bay area.

Curtailment of the ground water studies in Maryland and other states, which would be necessitated by withdrawal of Federal matching funds, was termed by Senator O'Conor "a startling backward step." He pointed to the increasing need for knowledge of available underground waters because of tremendously greater water usage in concentrated industrial and residential areas.

NO CANNING SUGAR TO BE ISSUED

In past years, the Office of Price Administration has issued special sugar stamps at canning time, but this year the amount of sugar per stamp has been raised to ten pound and there is to be no special issue for canning.

Consequently, home making specialist in the extension service at the University of Maryland warn homemakers to start now to save sugar for canning. They point out that one 10-pound stamp became available on April 1 and has to last until July 1. This stamp becoming available July 1. is good until the end of September.

THE OLD JUDGE SAYS...

HARRY: "I don't quite get the point, Judge. How can the distillers use grain and still conserve it?"

OLD JUDGE: "If you raised poultry and cattle like Jim here, you'd easily understand it, Harry. It's this way...when the distiller makes whiskey, all he uses from the grain is the starch. But the stillage that's left is rich in vitamins and proteins. This is recovered, dried and turned back to farmers in the form of nutritious feed concentrates."

HARRY: "Do you use them, Jim?"

JIM: "I sure do. Take a look at those fat chickens I'm shipping. I mix distillers' grains with my poultry and cattle rations, and I've figured it out closely, too. Distillers' grains not only help to fatten stock faster, but I'm saving about 20 percent of the grain I'd otherwise use without distillers' grains."

HARRY: "I can see now how false those rumors are about distillers wasting grain!"

Has a Cold Left You With a Nasty Cough?

When your cold brings on a nasty troublesome cough, spend 45 cents at any drug store for a bottle of BUCKLEY'S CANADIOL MIXTURE—triple acting—to relieve coughing fast. Take a teaspoonful and hold it on the tongue a moment, then swallow slowly and feel its powerful, pungent action spread through the throat, head and bronchial tubes. BUCKLEY'S MIXTURE acts promptly to help loosen up thick, sticky phlegm—soothe irritated throat membranes and ease hard coughing spells.

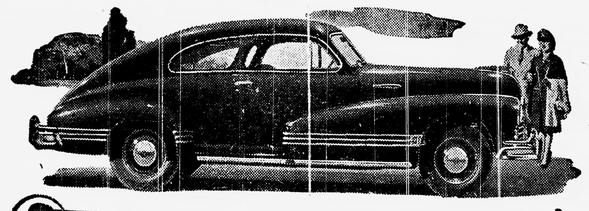

Most all Canada knows BUCKLEY'S—folks who live up North where a cough mixture has got to do a real job, keep BUCKLEY'S handy. So try it the very next time a cold results in a wracking, stubborn cough—find out for yourself just how good it is for coughs due to colds. Get BUCKLEY'S CANADIOL MIXTURE — made in the U. S. A. — TODAY — at all drug stores

WARNING AGAINST NEGLECTING SO-CALLED "COMMON" COLDS

Be on your guard. A "common" cold helps weaken resistance—may possibly become serious. To relieve the weak, achy misery accompanying a cold, take Humphreys "77" at the first sign of sniffles. Long advised by Dr. Humphreys.

HUMPHREYS "77"
HOMEOPATHIC
FAMILY MEDICINES SINCE 1854

PONTIAC

FINEST OF THE FAMOUS "SILVER STREAKS"

The production of Pontiacs has fallen far below expectations because of conditions beyond our control. Now, the outlook is encouraging. The number of cars being built—while still below pre-war levels—is steadily increasing. Which means that more of the people who simply won't have anything but a Pontiac will be satisfied sooner.

If, in the meantime, you are ever tempted to take delivery of a more quickly available car, consider this: The things that made you want a Pontiac in the first place are still EXCLUSIVE TO PONTIAC! Nowhere else *at any price* can you get the same time-won reputation for dependability, long life and over-all economy. No other car offers the ever-fashionable "Silver Streak" beauty that lifts Pontiac out of and above the rest. None handles so sweetly—rides so comfortably. And none can parallel Pontiac's *basic value*—for no other car offers so much of everything you want for every dollar you invest.

You've been patient and loyal to Pontiac for some time now. So why not wait a little longer and get a great deal more? You'll be glad you waited.

Preventive Service Pays Off Every Time!

Just because you HOPE to get a new car soon, don't let your present car get into a dangerous state of disrepair. Having your car properly serviced pays off—not only in assuring you the safe, economical, dependable transportation you need, but also in protecting the used car allowance you will ultimately receive.
