Spring a number of free coloured families
who will add much to the agricultural
force of the Country - good farmers, and
with means to make a good beginning -
The little move of this fall, I flatter my
self will be attended with good, strong
prejudices, and many wrong impressions
have been removed from minds, even
from the eyes of the obstinate blind some
scales have fallen - as I expect if
permitted, to be with you on Monday
or Tuesday next, I tender you
my respectfull consideration
