the yeadoo people is sertanely the kindes people I ever yet met
with since I let the Beach and I think I never met with
kinder people on the beach than the yeadoo people tho it is said
they are bad people and that they wate for Travellers in the
woods and rob them it is said they do Kill Travellers for what
goods they have meanny times and nothing is heard of them
we find the Cowally River by this Town and a Road made
which goes nearly a cross the River East and west but we
was informed that Cannoes could Pass they told me they had a
nother way to Pass a nother small River running a nother way
would carry you about above the falls and bring you in the
Cowally River again but at what distance I did not inquire
this country we found well timber with all kinds of timber we have at
the beach this people did ever thing they could to make us comfortable
in Town and would been glad to have us spend some weeks with
them we arrived at yeadoo on the 20 of Oc[illegible] and as the Poh people
and the yeadoo people had been at war with each other for some
years the Rode was grown up with Bushes and no man could
Travel it they was had a man to cut the rode open for us
about 20 miles and as we found them to be so kind to us we
Dashed them four pounds of handkerchiefs three Pipes five heads of Tobacco
for 50 Gun Flints and some other small thing and they was glad of
it they have got a great deal of corn and as good as we ever saw saw in
the U S as well filled the grain and we find it more than out
in the Bush and it is on the Beach we did not find many
Coadons in this country we find the Principable dieten
to be to be corn and Green plantens Fish and large Snails
they go out in the morning and each man will not be gon
more than Two hours and when they come in they will have
from 10 to 15 each man and then they Dry them over the fire
and is as good as oysters they dont have very good houses
the road from yeadoo to Poh is very bad to walk so many
bushes and vines in it the distance from yeadoo to Poh is about
forty five miles large woods to go throught all the way and you
will find houses all throught the wood for people to put up
when ever night over takes them

we arrived in Poh country at the first Town in Poh

on Friday 24 got about 4 oclock at night We had to cross
the Cowally River before we could get to the Town as soon as we got
to nearer side of Poh our guides called for a common and they quickly
sent it from us and we were soon across and in the Town they
met us with the greatest dish with lights and conveyed us up in Town
We found them glad to see us the thing gave us long face
that night in the morning all the old men of the Town came
to see us and to know what we had come for We soon told them
We was not called Americans but we was called Americans just
from home We found the Cowally River nearer by this Town
East with the Coast as we were mistaken about the Town and country we
stay in this South Town five days before we would go any
way We wanted to know all about the country We could and
wanted to find the Longest Town in the Poh country but as
Youth is such and a great Stranger since we let home
he is not to be found not only in the Poh but in all other Countrys
We have the first Town in Poh we got Too was called
Nabwangee this is quite a small town the next day after We got
to the Town the King of Mettwah sent for us and sent about
50 Soldiers for us to guard us to his Town but as We did
not know it was the longest Town We thank him and
sent him some Tobacco and some other thing for his Dash
but not many days after this before We learnt that this was
the longest Town in Poh and soon as we learnt this we
was desirous to go out and see the Place where we left home
we was to go to the Town called Growrah we found it hard to get
to the longest Town in this country in case the Gov. or any
American want to go to the place they had better not carry
young men with them for I have had a great deal of trouble
with our young men the Poh people did not call us Americans
but they call us russels just from home at this place they
have the best clay I ever saw it would make any
thing Coly water vessels I think any Town in the Poh sent
for us we found the country well Timber
