ROCK HALL SCHOOL.

EDITORS OF KENT NEWS:

Gentlemen—A good roof is very essential, but by far the most important feature of any edifice is the foundation, and no building will ever stand to receive the roof unless the foundation is good, and it is so with education. Our chief efforts should be directed to the foundation or primary grades.

We do not want a new school at Rock Hall because they have one at Chestertown or any other town, but because it is absolutely needed.

The condition under which the site of the present school is held made it poor policy to abandon the school and besides it is possible to alter and rearrange the present building so as to take care of the grammar and high school grades. It is not the higher grades that are overcrowded and the necessity of a new high school where the number of graduates during the past five years have been respectively: 1910—4, 1911—3, 1912—2, 1913—2, 1914—7, is not apparent.

Country children start leaving school after they have reached the fifth grade and it is only a small minority who reach or go farther than the eighth grade. The facilities for primary education at Rock Hall are of the very crudest; the building is in no way suitable, the lighting is badly arranged, the blackboard space entirely inadequate, and the rooms too small to accommodate the classes.

There is an undoubted need at Rock Hall for a good primary school. Primary education is the part that is receiving the most attention in all the most progressive educational centers, and if it is the most important feature where the majority of the pupils graduate, how much more important is it where only a small minority reach the higher grades. In addition to this no pupil however willing can ever reach graduation unless thoroughly grounded.

No man can make a good lawyer without a thorough knowledge of the fundamental principles of law. No man can make a great artist or great musician without a thorough knowledge of the fundamental principles of art or music. No one will deny this and yet they will continue ignoring the primary educational conditions that their children have to contend with and at the same time expect them to graduate with distinction.

The way to get children to attend the higher grades is not by putting up fine high school buildings. A child is most susceptible in its early youth and the impressions made upon its mind in its younger years are the ones that have the greatest influence in after life. If a child starts its education in the right environment and in the midst of congenial surroundings, the desire to learn is jointly implanted, and unless this desire is in the child all the fine school buildings in the world will have no effect.

What we want at Rock Hall is a first-class modern primary school, and one that will take care of all children up to and including the fifth grade. That will leave ample room in the present building for all higher grades and also for classes in domestic science, manuel training, etc., etc.

Yours truly,
D. RUSSELL DOWNEY.

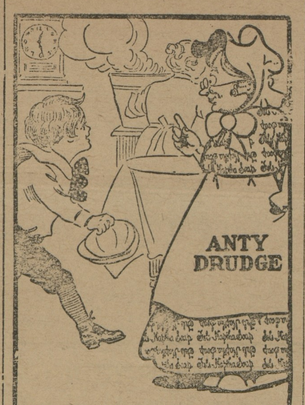
FOR FLETCHER'S
CASTORIA



Tommy—"Gee, ma, ain't lunch ready yet? I was kept in school and I got to hurry back. I hate washdays. I was kept in 'cause teacher asked me where the home of a swallow is and I said, 'It's the stummick.'"

Anty Drudge—"Well, Tommy, I've just been telling your mother about Fels-Naptha Soap, and after this you won't mind washdays, because she'll get her work done in plenty of time to have lunch ready for you and she'll have time to rest herself, too."

Would you like to cut your work in half? Would you like to get your wash on the line next washday in half the time it used to take? Would you like to know a way to make clothes sweet, clean and white without hard rubbing or boiling, and a way to do all your housework easily, quickly and thoroughly?

Use Fels-Naptha Soap in cool or lukewarm water. It will do all these things.

Better buy it by the box or carton. Follow easy directions on the Red and Green Wrapper.

Seed Potatoes
FOR FALL CROP.

The planting of Seed Potatoes in June and July is increasing to a wonderful extent. A great many farmers claim that they give better crops planted at this time than they do when planted in the spring. Potatoes planted in June and July mature in the cool weather of the fall, at a time when they can be harvested to best advantage.

The Seed Potatoes we offer are put in cold storage early in the season, so as to keep in first-class, vigorous condition.
