The convention will be composed of approximately 27 clergymen and the same number of laity. PEACE DECLARED

For the past three years Still Pond Grange has been afflicted with a disease known as "Lethargy." Now if you do not know the meaning of the word, consult Webster! Some of the so-called leaders, realizing that desperate measures were to be employed if the Grange was to survive in the locality, and tired of bearing the burden of both regular attendance and regular dues, with no apparent recognition by the town people of Still Pond, decided that something startling must be done to wake them up.

So we moved our property, after a vote had been taken to the school house at Betterton, and from then on, the cure was begun. We think now, that it is complete, and starting with Saturday, March 20, meetings will be resumed at Still Pond school house, and the work will be taken up exactly as it was left on November 8, 1919, when the vote to move was taken.

Worthy Master Black decided that for any special meeting, or any special vote, a written notice was necessary to all logical members, and that no one in arrears for three months was entitled to a vote. That whenever there was a laxity in enforcing the rules of the order, everything was to be decided by digest, absolutely.

For the benefit of the Grangers in the county, I am sending this notice, so that there will be no chance for anything like this to happen again. We have accomplished what we set out to do: Arouse interest in the Grange work in Still Pond, and quoting the words of a new song "Oh you'd be surprised" at the number of folks who found out after it was gone, what a fine thing it was after all.

We bespeak for the new set of officers, soon to be elected, the same support which has always been given the old "stand-bys," and we hope all Grangers will be benefitted by the little storm which has been hanging over Still Pond for some time.

An OPPORTUNITY Is YOURS
If You Will Grasp It NOW

NOTICE

Important To All Residents of Kent Co.
Department of Roads and Bridges,
Kent County, Maryland.

On Maryland Day, Thursday, March 25th, a legal holiday, has been set aside for Good Roads Day in this county. Owing to the very extreme winter that we have had it is necessary that numerous washouts throughout the seven districts be repaired at once in order for the traveling public to travel the roads and bridges in safety. Therefore, the roads engineer asks all Kent County residents to lend him a helping hand and devote one day to work on the roads and bridges throughout the county. It is impossible for the roads engineer and his forces to fix all the bad places at once and will take sometime to get them repaired, and by devoting one day each year in the spring to roads and bridges the public will be doing a big thing towards helping in the upkeep of the traveled roads and small bridges.

Whenever you know of a bad piece of road or a small trunk that is in bad shape go to that particular place on Good Roads Day and do what you think is best to repair it. Use your own good judgment and you will find that lots of good work will be done and by everybody taking a hand in the work the results will be surprising.

The roads engineer will be glad to explain the plan in general to everyone, and will in person drive over the roads on Good Roads Day and give any advice he is able to.

Good Roads Day has been successful in lots of other states and I am sure after it is tried out in this county that the traveling public will be more than pleased with the results, and will look forward each spring to the one day that will be set aside for Good Roads Day in this county.

Would suggest that the women make up nice lunches for all and carry the lunches out to the men that are doing the work, which will greatly increase the efficiency of the plan.

Particular attention must be paid to all ditches and now is the time to open up that particular ditch that you have always thought should be done in order to properly drain that bad piece of road. Wherever you can find sand haul it to the clay sections and spread. Put gravel in the holes and they will hold. On the necks where shells are available plug the holes with shells. Through roads where there are woods cut around the curves so as to make the road safe for travel. Fill the low place good and high. Put your teams on the day and haul material.

Use any kind of drag that you can get and drag the roads good.

(Signed) GAULT APPLEGARTH,
Road Engineer.
