SOMETHING NEW TO SMOKERS!

ADVANTAGES OF THE

PATENT GRANULATED

SMOKING TOBACCO.

IT has the flavor of the best Havana Cigar. It has the flavor because it is manufactured from the finest part of the leaf, and of the choicest Tobacco, previously reduced to a comminuted state.

Owing to its "Granulated" state, the ashes of this tobacco never rises up in the pipe; while the ashes of all other smoking tobacco does, often falling on, burning, or soiling the clothes.

A pipe full of the "Granulated" will last longer in smoking than any other form of tobacco.

The flavor of the last inhalation is as pure as the first; its "Granulated" condition preventing the tobacco in the bowl and the pipe from becoming impregnated by the smoke, as it is drawn through it.

The "Granulated" does not foul the pipe or stem nearly so much as any other tobacco; nor does it leave any unpleasant taste or foulness in the mouth, so usual and strongly marked, after smoking other forms of tobacco.

The above advantages of the "Granulated" (are not vague and theoretical, but) are simple and practical points which may be tested and proved by actual trial. Let each one verify for himself the important advantages claimed.

Intending to make a speciality of the Segar and Tobacco trade in connexion with the Watch, Clock and Jewelry business.—We invite those fond of a *Good Segar* to give us a call, promising them something nice in that line. Also, the Patent Granulated Smoking Tobacco, warranted to be superior to any Tobacco in market, always on hand.

The Great Destroyer has come!

Appearance of the Asiatic Cholera in the United States!

THE ZINGARI BITTERS.

The Only Sure Antidote for Disease!

As a Preventative it is Infallible!
As a Cure it is Certain!

The appearance of the Asiatic Cholera in the United States has given rise to the just apprehensions of all classes. The National Congress has appointed a special committee to ascertain what means are necessary to insure the proper quarantine at all the ports on the Atlantic coast, while the authorities in the great commercial cities on the sea-board are actively engaged in enforcing such sanitary measures as will secure the cleanliness and promote the healthfulness of the communities in their charge. These proceedings are all laudable. Cleanliness and temperance are the first great essentials necessary to safely guard against attacks from the Cholera, but greater than all these efforts of Congress, more potent than the proceedings of municipal bodies, and infallible beyond all doubt is the

Great Zingari Bitters,

as a sure preventative of Cholera. The discoverer of the component part of this Bitters, an eminent Egyptian physician, had much experience in Egypt, where the Cholera rages with tremendous virulence. He had long seen and felt the want of some remedy which would strike at the root of the disease and so prevent much of the suffering which the human family has been compelled to endure from this scourge. The result of his thoughts and labors at length presented themselves in the production of the wonderful

ZINGARI BITTERS.

It was not long before this Bitters was recognized and accepted in all parts along the Mediterranean coast, in the south of Europe, among the semi civilized tribes of Africa, and by the ablest practitioners of the old world, as the only sure and certain preventative or cure for the Cholera. The ZINGARI BITTERS act on the organs of excretion and secretion, keeping up a perfect balance between them. It is composed entirely of roots and herbs, so nicely concocted that every organ is acted upon and put in tone. Its taste is pleasant and its effects prompt and lasting.

For travelers who are subject to all the changes of climate and water, the ZINGARI BITTERS is a companion that should never be left behind. It is for sale by all the druggists in the United States.

NEW STYLE VERTICAL MILL.

THE VICTOR!

For completeness of adjustment, strength, durability and working power, THE VICTOR CANE MILL has no equal. The fluted roll is the important feature that regulates the feeding of the mill. The ridges seize upon the cane as soon as presented, thus relieving the labor so often necessary to force the stalks to an entrance between smooth rolls, and at the same time secures its direct passage to the discharge roll.—They also break the woody fibre at short intervals, and thus rupturing the cells cause the more ready flow of the juice. We also have horizontal mills, for horse, water and steam power.

Cook's Sugar Evaporator.

First Premium at Forty State Fairs!

12,000 IN USE, ALL FULLY WARRANTED.

COOK'S EVAPORATOR is simple, yet scientific in its construction. It consists in an evaporating pan of sheet metal, copper or galvanized iron, placed on rockers with wooden sides, and so divided by ledges as to form a continuous tranverse channel over a heated and cooling surface of from 75 to 125 feet.

It is estimated that 20,000,000 gallons of syrup have been manufactured on the above Evaporator in the past season. We also have Plantation Pans, adapted to a brick arch. Circulars and Pamphlets with full description and price list, sent to all applicants.
