NEW STYLE VERTICAL

THE VICTOR!

[illegible] durability and [illegible] FOR CANE MILL has no equal. [illegible] fluted roll is the important feature that regulates the feeding of the mill. The ridges seize upon the cane as soon as presented, thus relieving the labor so often necessary to force the stalks to an entrance between smooth rolls, and at the same time secures its direct passage to the discharge roll.—They also break the woody fibre at short intervals, and thus rupturing the cells cause the more ready flow of the juice. We also have horizontal mills, for horse, water and steam power.

It is estimated that 20,000,000 gallons of syrup have been manufactured on the above Evaporator in the past season. We also have Plantation Pans, adapted to a brick arch. Circulars and Pamphlets with full description and price list, sent to all applicants.
