Mr. and Mrs. Ikey Rosenstein were looking over the fashionable spring coats in an exclusive Woman's Shop.

Mrs.: "Look, Ikey, here's a nice coat."

Mr.: "Oi! Oi! Rebecca, but see the price!"

Mrs.: "Oh, Ikey, don't be Scotch."

HUSBAND DISTRIBUTES BOOKLETS

Wife Tries Compound

Every year the Pinkham Medicine Company distributes about 30,000,000 booklets from house to house. Mr. Ted Hinzman does this work in Lodi, California. His wife writes: "It was in these little books that I read about so many women being helped by the medicine. I thought I would give it a trial and I can truly say that it has done me good. My neighbors and friends ask me what I am doing to make me look so much better. I tell them that I am taking Lydia E. Pinkham's Vegetable Compound."

FIVE CO. ALFALFA CAMPAIGN NEWS

Alfalfa, one of the best forage crops for making milk flow, needs a sweet soil to grow in successfully. Being a crop that is capable of taking nitrogen from the air (a legume) it carries on its roots certain bacteria. These bacteria will not thrive in acid soil, therefore will not be there to cause the plant to take nitrogen from the air, if the soil is acid.

Extensive soil testing campaigns in Kent and Queen Anne's counties discovered that very few fields did not need lime at all and most of them need lime from 500 to 3000 pounds per acre. The other three counties in thi scampaign will likely find conditions somewhat similar.

The question then confronts the farmer, who is intending to plant alfalfa, as to how much is necessary to change his soil from acid to sweet

All county agents in this Five-County Alfalfa Campaign are, or will be equipped to test samples of soil brought in to his office, which will result in the farmer knowing how much to apply.

It is just as foolish to apply an excessive quantity of lime, when it is not needed, as it is to try to grow alfalfa on ground that does not have enough lime.

To obtain a fair sample of soil from the field in question, not less than three samples should be taken from any one field and in large fields over 30 acres, one sample for every ten acres is advised. These different samples from the same field should be thoroughly mixed together after drying out, and after properly marking a bag as to the field in question a cup full is sufficient to bring in to the Agent's office. By the use of a spade driven down about 6 inches and the handle moved back and forth a few times, the spade can be removed and a half inch slice taken off the edge of the cut. All the slices will be mixed together for the composite sample.

The service rendered by County Agents is free and will often save the farmer many dollars in lime money.

OLD VETERANS HOLD RECEIPTION

A big crowd was at the Armory here last Friday night for the first annual homecoming celebration held in honor of the veterans of the old Volunteer Fire Company of 1898. One of the features was a street parade at 7 o'clock, which preceded the exercises in the Armory. In the line of march were fotry or more "veterans" of '98, with their ancient fire pump and hose carriage, followed by the present fine equipment consisting of three large fire trucks and hose and ladder trucks, members of the present company, headed by its band of forty pieces, C. Arthur Bacon leading, the Ladies' Auxiliary with Mrs. James G. Beck at the head, members of the associate committee, and a large number of school children. This feature of the event was in charge of Fred S. Russell and Wm. H. Elliott. Following the parade a program of speeches and music was rendered. W. G. Smyth, president of the fire company, presided, and delivered the address of welcome. The response was made by Alwyn M. Culp.

The feature of the Armory exercises was the presentation of a portrait of M. Wilbur Thomas, former postmaster of the town, and successor of the late T. D. France in the presidency of the fire company. The portrait was a gift from the associate members to the fire company in recognition of the valuable services rendered by Mr. Thomas during his term in office, because it was largely due to his efforts that the nucleus of the present company and splendid equipment was held together. The presentation speech was made by T. D. Bowers, and was accepted on behalf of the company by Wm. L. Fowler. Short talks of '98, and following music by the band and community singing under the direction of J. Hydie Thompson, member of the present company, refreshments of ice cream and cake were served under the direction of the Ladies' Auxiliary of the company. The committee in charge of the arrangements was T. D. Bowers, W. L. Fowler, W. A. Burk and W. G. Smyth.

HOME DEMONSTRATION NOTES.

Wednesday, June 6, Betterton Women's Club, at the school house at 2 p. m.

Thursday, June 7, Flatland Women's Club at Mrs. Elwood Fowler's at 2 p. m.

What do you want your motor oil to do?

Prevent wear?
The first duty of a motor oil is to protect your engine against destructive friction: to assure smooth, noiseless motion, without loss of power, to all its complicated parts. The sturdy, heavy body of Sunoco (heavier type for type than any oil we know) gives the safest lubrication to every moving part and insures greater quietness.

Increase power?
Perfect as piston rings are, they can't and don't prevent gasoline from leaking into the crankcase, nor do they prevent leakage of power. The heavier the oil body, the more perfect the piston seal will be. Sunoco's heavy, sturdy body insures greater power, and less leakage of gasoline.

Eliminate hard carbon?
When any compounded motor oil is burned, a thick, sticky deposit is left on cylinder walls, piston heads, valves, etc. This collects dirt brought in through the carburetor and breather pipe; also gasoline soot. The heat of the engine then bakes it into a hard carbon deposit. Sunoco Motor Oil, when subjected to high heat, does not leave a sticky residue, because every drop is wholly distilled—*not compounded.* That's why there's no hard carbon when you use Sunoco.

Blue Sunoco Motor Fuel gives more power, and eliminates knocks... Use it with Sunoco Motor Oil, and get a matchless combination.
