OCTOBER TIME TO PLANT FLOWER

In most any grounds around the home of Chestertown the women can be seen working among plants and flowers, either superintending in trimming and cutting or else actually planting and pruning plants herself.

There are lots of women in Kent who really have no garden, but like to surround themselves with plants of some kind. All the old tomato cans are used for flower pots in a lot of instances, and the reason they do not have more of a success is because their knowledge is limited. They probably do not read the scientific articles and the "Question-and-Answer columns of the garden writers and so do not know the simplest secrets of making flowers bloom early and long.

For example, the average inexperienced flower grower does not stop to think the best time to get ready for flowers next May is to plant them or move them in September or the very beginning of October.

It is easy to have splendid perenial plants that will come up years after year if you will think about it in time. The reason why September is a good time is that if you wait until spring the plants will not bloom next year, and if you put them in earlier than September the hot sun will wither them, while a latter moving means that they may be caught by the frost.

Young plants that have sprung up earlier this year may be moved now and will get their roots established before freezing weather. Friends with gardens are glad to share these seedings. Peonies and iris will tranplant well at this season and be ready to begin work the moment spring breaks.

The bulbs for next April's beauty should be put in any time from now on. It will not be too late up to November for most things, but the earlier the better, for then it will be sure to be done. But the main thing is to get the ground enriched and ready now for the young hollyhocks, columbines and other hardy plants that you will want to have bloom next June.

Sunshine and Cloudland

The sunniest region of the world is probably the Nile valley, in Upper Egypt, while the greatest prevalence of clouds is found in certain areas on the borders of the Arctic and the Antarctic.

No Positive Deadener

No material substance is known that is an absolute nonconductor of sound.

FOR SALE

Two Superior Grain Drills; One McCormick-Deering Ensilage Cutter. These machines are not new but are capable of doing a lot of work yet. Price right. Jones and Satterfield, Chestertown, Md. Phone 51. s28

GROWERS CHANGE MEETING DAY

The Maryland Turkey Growers' Association of Kent county have changed the day of their regular monthly meetings from the fourth Thursday of each month to the fourth Wednesday. This change was made at the request of a number of members who belonged to a county organization meeting on that same date.

The next meeting of the Growers will therefore be held at the Court House on Wednesday, October 23rd, at 1.30 p. m.

Response to the card questionnaire is not being made as fully as was expected. Some who have sent in cards stating the number of birds they have available for Thanksgiving and Christmas have neglected to sign their names and give their address. In this way the work of the secretary will be seriously hindered and any who realize they have sent in their unsigned report are asked to drop a postal to Mrs. Nell C. Westcott stating the number of birds again and giving their own names. It can then be recorded on the original card and put on file.

KILL WORMS the APPROVED WAY!

IODINE VERMICIDE for Poultry kills roundworms and tapeworms—all of them, and without danger to the birds.

Merely squeeze 1 oz. of diluted solution (for half-grown birds ½ oz.) from a dosing appliance inserted into the gizzard of each bird. In addition to killing intestinal parasites, the Iodine in this very assimilable form helps to overcome the bad effects caused by poisons from the intestinal parasites.

IODINE VERMICIDE

Now sold only in concentrated form—1 lb. of the concentrated material sufficient to treat 125 birds. Will not throw birds off egg production.

Used by leading poultrymen—approved by agricultural colleges and experiment stations.

ORDER OF PUBLICATION

Henrietta E. Bishop
vs.
James E. Bishop

In the Circuit Court for Kent county In Equity, No. 2585.

The object of the Bill filed in the above entitled case is to procure a decree for divorce a vinculo matrimonii for the plaintiff, a resident of Kent County, Maryland, from the defendant, a non-resident of the State of Maryland.

The Bill states:

1. That on the 17th day of April in the year 1922 she, Henrietta E. Bishop, was married to her husband, James E. Bishop. The said marriage took place in Washington, District of Columbia, and that after said marriage she resided in the City of Washington and in a suburb between Washington and Baltimore. That she lived with her husband about two years and that he deserted her some time during the month of June 1924.

2. That, though the conduct of your Oratrix towards her husband, the said James E. Bishop, always has been kind, affectionate and above reproach, the said James E. Bishop has, without any just cause or reason, abandoned and deserted her, and has declared his intention to live with her no longer, and that such abandonment has continued uninterruptedly for at least five years, and is deliberate and final, and the separation of the parties beyond any reasonable expectation of reconciliation.

3. That since their separation your Oratrix was compelled to make her own living and she took up nursing and maintains her home with her father, William C. Townsend, in Kent County, State of Maryland. She is a resident of Kent County, State of Maryland, and has been such since separation.

4. There has been one child born as result of said marriage namely James E. Bishop, Jr., age six.

5. That since said desertion by the said James E. Bishop, he has failed to support her but does contribute towards the support of the child. Your Oratrix does not know the whereabouts of her said husband although she has been advised by some member of his family that he had left the State and is now in Miami, Florida, and that he is not a resident of the State.

6. The last known address of the said James E. Bishop in this State was Chestertown, Maryland, and after his removal from Chestertown he lived at 1223 Vermont Avenue, N. W., Washington, District of Columbia.

It is thereupon, this 7th day of October, 1929, ordered by the Circuit Court for Kent County, in Equity, that the Plaintiff, by causing a copy of this order to be inserted in some newspaper published in said Kent county, once in each of four successive weeks before the 11th day of November next, give notice to the said James E. Bishop, non-resident defendant, warning him to appear in this Court in person, or by Solicitor, on or before the 25th day of November next, to show cause, if any he has, why a decree ought not to be passed as prayed.

TESTISG OF DAIRY HERDS REVEALS IMPRESSIVE FACTS

Four months ago a Herd Improvement Association was formed by 27 progressive Kent county dairymen. Each month since these men have been finding out that "guesstimates" are not to be compared with the facts revealed by these very accurate servants, viz.: Milk scales, Fat test and Feed Bill in measuring dairy practices. From time to time some of the results will be called to the consideration of the other dairymen of the county.

Follows a comparison of results between two similar herds in the association. One member feeds his cows during their dry or rest period. also feeds well during the summer, especially during drought periods. Another member felt that it is poor economy to feed grain except during the winter months. The grain fed herd of eleven cows during September averaged over one thousand pounds of milk per cow. The other herd of twelve cows averaged four hundred seventy-nve pounds. The value of the milk produced by the grain fed herd amounted to $171.52 over and above the cost of the feed and pasture. The other 12 cow herd's product was worth $129.71 over pasture charge. A difference of $41.81 more profit for the smaller herd.

Not only does good feeding pay during the short pasture season, but also as a means of maintaining and stimulating production during the fall months during which the amount of the higher priced "basic milk" is determined. Supplying the cow with adequate material with which to work her magic of converting feeds into food enables her to sustain production during the lactation period. Naturally also the cow well fed during the dry period is kept vigorous and contented, enabling her to produce larger and better calves, worth more to raise or to veal.

Farmers realize that it is poor economy to employ labor to work at half speed or to hire willing labor but handicap it by lack of tools, equipment, or materials. The same logic applies to the dairy cow. If an efficient workman is worthy of his hire, likewise the dairy cow is worthy of adequate feeds, care and management. If she has not inherited ability to respond to feed, by production, she should be sent to the butcher. Better a few good cows well fed than a lot of boarders to eat the profits of the good cows.

Power of Passion

The passions are the only orators that always persuade they are, as it were, a natural art, the rules of which are infallible; and the simplest man with passion is more persuasive than the most eloquent without it.—La Rouchefoucauld.

Bird Lifetime

It is believed that song birds average from 6 to 10 years of life, but they have been known to live longer in captivity. Small birds 10 years old are old. From records of banded birds, few birds besides sparrows live to 6 years. Usually birds live only about 2 years.

We'd Never Mention "SPIT"

When he makes cigars ... he spits on the ends!

were there not millions of spit-tipped cigars being sold daily ... smoke certified Cremo—avoid the spit menace

How often have you been disgusted with the filthy, germ breeding places where some cigars are made ... dark, stuffy factories ... warm, dingy shops and windows ... where cigars are rolled by careless, dirty lips and fingers and spit on the ends! What a far cry this is from the modern method of manufacture used by Certified Cremo.
