DEATHS FROM AUTO ACCIDENTS

In 1930, with a total population in the State of 1,625,270, there were 331,648 licensed automobiles in Maryland, an average of one to every five persons in the State. A report prepared by Dr. John Collinson, Chief of the Bureau of Vital Statistics of the State Department of Health, shows that during the year there were 406 deaths from motor vehicle accidents in Maryland, 334 white and 72 colored, or 25 in each 100,000 of the total population, white and colored.

What this signifies may be gathered by a comparison of these figures with the deaths from other causes. For instance, there was a serious flare-up of typhoid in 1930, causing 104 deaths—7.4 in each 100,000 of the total population; whooping cough was responsible for 73 deaths, 4.5 in each 100,000 of the population; diseases of the arteries caused 419 deaths—25.6 to each 100,000 of the population; diabetes caused 349 deaths—21.3 to each 100,000 of the population. Camparing the 406 deaths from motor vehicle accidents, with the 1618 due to tuberculosis, or 98.9 to each 100,000 of population, it will be seen that automobile accidents wert responsible for one-fourth as many as tuberculosis.

Of the 406 deaths from motor vehicle accidents in Maryland last year, 160 occurred in Baltimore City and 246 in the counties. There was an apparent decrease of 20 per cent in Baltimore City, but not an actual decrease, as deaths that were due to hit and run accidents in the city were recorded as "homicides" and were not included among those listed as due to "automobile accidents." In the counties there was an increase of 29 per cent over the number recorded in 1929.

The total number of deaths each year from motor vehicle accidents in the State, for the last five years, has been as follows: In 1926, 178 in Baltimore City and 163 in the counties; in 1928, 181 in Baltimore City and 161 in the counties; in 1929, 192 in Baltimore City and 191 in the counties; in 1930, 160 in Baltimore City and 246 in the counties. The counties in which the greatest increases have occurred were Allegany, Frederick, Baltimore and Harford. Of the 406 deaths last year, 15 were among babies and young children up to four years old; 40 among girls and boys from 5 to 14; 285 were in the age group from 15 to 64 and 66 in the group 65 years old or older.

"These figures speak for themselves," Dr. Collison said. "They also show that the slogan of every automobile driver should be "safety first. '"

Zeke — Speaking of royal blood — one of my ancestors lost his head completely over a beautiful princess.

Pete—And how did it turn out?

Zeke—Guillotine.

RUM PRISONER FLEES CENTREVILLE JAIL

Spurning celebration of Independence Day in the Centreville jail, as the guest of the Government, Frank Benascika took French leave on eve of the national holiday and hasn't been seen since.

Benascika had but one more month to serve of a four-month sentence on the charge of manufacturer and possession of liquor. Records revealed that at the time of his arrest he gave his address as 1020 Low street, Baltimore.

Records revealed that Benascika pleaded guilty to a charge on April 9 and was sentenced the following day. Due to crowded conditions in the Baltimore jail he was sent to Centreville jail.

Mosquito (working on hairy hand of toil)—Do I bore you?

Editor (smashing mosquito with copy of Hot Town News)—Oh, not at all. But may I ask what kind of an impression my paper makes on you

Buncrust — I notice Vassapupolis doesn't speak so well of his wife any more. When they married he told me he proved his faith to her.

Piebust—Yeah, but the pin scratched him terribly.

CHESTERTOWN MARYLAND

to enjoy.... the benefits of better, and faster threshing...

IN Case Threshers there are many unusual advantages which account for the uniformly high quality threshing being done by Case users.

Take the smooth grain pan, for instance. It really starts the cleaning action. As the grain is carried back to the conveyor sieve, a rolling, sifting motion lifts the chaff to the top where it is easily blown off.

Dividing strips, running lengthwise in the pan, aid in delivering the grain evenly to the conveyor sieve.

The cleaning shoe has remarkable capacity. An underblast fan is so directed that there is no lodging of chaff on the sieves. This increases the cleaning action.

So well is the Case Thresher thought of that there are more in use today than any other make. That's because it is giving uniform satisfaction, not only in the cleaning of the grain, but in faster and better work.

It's your turn to enjoy this satisfaction. If you are thinking of getting a thresher, come in and see us.
