POTATO GROWING.

A Profitable Product When Properly Grown.

There is probably no farm crop in which inexperienced farmers suffer greater disappointments than in potatoes. They read in the papers of large yields, and observing that the market price is high, a great many rush into the business, and of course overdo it. This is cause number one. Potato culture in these times requires a great fund of practical experience. It also requires the man who begins it to be prompt with every demand, whether it be in cultivation, in bug poisoning, and in late years in spraying the vines to prevent mildew and blight, which are the usual causes of rotting of the crop. It is no wonder with so many things to attend to that some are neglected Hence potatoes are commonly deemed a precarious crop. Accidents of season excepted, they need not be. We believe it is possible every year to grow potato crops that will pay larger profit than any grain crop, provided the proper conditions are fulfilled.

In the first place, the farmer who would grow potatoes extensively must be near a market, by which we mean a good shipping station, where there is enough competition to insure fair prices. Farmers who are within three or four miles of freight cars can draw two and sometimes three loads per day. When the distance is so far that only one load per day can be drawn, it adds heavily to the expense of marketing, and requires a high price to make the crop pay. This high price cannot always be depended on. Every few years the potato market is liable to be glutted, and only those who keep expenses down so as to be able to market cheaply can come out without loss. Some fifteen years ago the price of potatoes was very low. We remember one farmer who sold his whole crop at the station for 25 cents a bushel. "But," said he, "I did not lose anything. I had 300 bushels per acre, and they cost me in heaps on the field eleven cents per bus. As I had only a mile to draw them to the station, I could do it, because I drew 7 or 8 loads per day. If I had to use one day to draw one load, the cost of man and team would eat up all the profits." This is an extreme case, but it shows how much may sometimes depend on nearness to markets.

With potatoes at present prices they will bear carriage long distances. This is one reason why when potatoes are high new supplies often come from unexpected sources, potatoes that would ordinarily reach market.

The largest potato growers usually sell most of their crop to shippers. They have not time in the busy season to peddle it, and to store through winter and sell then involves much additional labor and possible heavy loss. There is always some heavy wasting from evaporation, and often from rot. Unless the potatoes are kept very near the freezing point, the eyes start, and this wastes the potato rapidly, besides involving extra labor. Few who have kept large stock over winter care to repeat the experiment. Often, if the price is low in the fall, it is comparatively still lower the next spring. The best pay for keeping is in years of undoubted scarcity, and when a fair price is paid in the fall. Even then a cautious cultivator will sell the bulk of his crop then, and only hold over what he is sure he can dispose of without much inconvenience.

In planning for potato planting the soil should be well drained, but enough moisture should be secured to keep the potato tops green as long as possible. Moisture is more important for potatoes than manure. In fact, the use of manure in growing potatoes lies in its capacity to keep the soil moist. But it is also liable to cause rot, and moisture is better secured by plowing under green clover, and by subsoiling allowing the potato roots a wider range for moisture than they would otherwise have. Wood ashes and salt applied to the ground after potatoes are planted also help to keep it moist. Where the soil is well drained deeper planting is also advisable, as this starts the first set of roots farther down, insuring them more equable temperature, and fewer alterations from wet and dry than nearer the surface.

Where potato land has been subsoiled most if not all the fertilizer required will be mineral, and this mainly to grow the stems and leaves. These last draw from the air the carbon which supplies the starch in the tuber of which it mainly consists. If the leaves cannot be kept vigorous and healthy, the potato itself will suffer. The grower who thought when the potato beetle first came round that he would beat this enemy by cutting down the vines on which they had fed, found that he had ruined his crop as surely as the bugs could have done.

Choice Sheep Wrinkles.

Mark those ewes that have disappointed you; don't be fooled twice by the same sheep.

Any breed of sheep is good if they have a shepherd; all breeds are poor if they are neglected.

Fowls of any kind are a nuisance about the sheep barn, and should be carefully excluded.

Mix a little sulphur with salt; it enriches the blood and disagrees with ticks and other parasites.

After weaning lambs, milk the ewes twice a week and keep them on the shortest pasture until dry.

Examine carefully every ewe's udder before deciding to retain her as a member of your breeding flock. If you find one side spoiled, reject her.

Do not overstock; better keep too few than too many. If a flock of 100 sheep could be made as profitable as a flock of 10, shepherds would be "clothed in purple and fine linen."

Old, broken-mouthed ewes are dear at any price. If they cannot be sold to the butcher feed them to the crows in the fall—they will get them anyhow before "the voice of the turtle is heard in the land."

Give mixed feed, and always remember that oats should constitute a part of the food of the "golden hoof." If you are feeding a mixture of equal parts of cornmeal, ground oats and wheat bran, and forget to exchange it for something else every thirty days, as the books direct, don't be alarmed the sheep won't be insulted.

Do not be deceived because the frost protects you at present against the loss of ammonia in your manure heap. Continue to use plenty of absorbent material, as the warm day may entail more loss than aware of. The freezing of matter become finer, and it falls to wing, decomposition being

value from the

WINTER CATTLE FEEDING.

The Higher the Feed, the Greater the Profit.

We are asked our "idea of feeding cattle this winter." It is a fact borne out by the experience of many feeders during a number of seasons, that the higher the feed, the greater the proportionate profit in cattle feeding. It is probable that part of the profit is obtained by more careful, economical feeding than when grain is plentiful and cheap.

If he had cattle in good shape that would make prime beef, we should feed them this winter and turn them off as soon as ready for the market, which, by the way, answers the second question asked by the same person: "When do you think the best time to sell cattle?" Fat ones we presume are meant. Sell when ready for market.

Had we poor or indifferent cattle we would either sell them now for what they would bring, or else carry them through the winter as cheaply as possible and have them hold their own or gain a little, then fatten them on grass and dispose of them as soon as ready. To do this first provide them with warm quarters, if the same be made of poles and straw, or wild hay, then feed them hay and enough grain to keep them in good heart. If we did not have feed enough to do that, we would sell off enough of the stock to make the grain properly feed the balance.

If part of our winter's roughage consisted of standing corn stalks or range, we should house at night and on stormy or extra cold days, and feed entirely in-doors on those days. In doing this we should endeavor to make every pound of grain fed do its utmost. Would feed all grain, either whole or ground, in tight troughs, so that there would be no waste by trampling under foot in stable, or in mud out of doors, for this reason would feed with the stock confined by stanchions or otherwise.

Every man must weigh his own circumstances, surroundings and capacity, then use his judgment about the chances for profitable feeding this winter—in fact he must do that any winter, any time.—*Farm, Field and Stockman.*

Poultry Pickings.

A fowl should not be fed for twelve hours previous to killing.

Ordinarily it is not a good plan to try to hatch ducks too early. They will thrive better after the weather gets warm and settled.

It has been thoroughly settled that the hens will lay more eggs, and the eggs will keep longer and better, without roosters than with them.

Burnt corn with the cob makes the best charcoal for hens, being far superior to wood charcoal which contains but little nutriment. Twice a week is often enough to feed it.

The sweepings of the foddering floors and mangers can be profitably fed to the fowls, letting them do their own sorting. They can do it much better than you can, and not make so much fuss about it.

Sunshine is a good medicine for laying hens, with a liberal allowance of the proper kinds of food, both dry and green, with lime in some form and good pure water. Poultry will not thrive if neglected. Water is of the utmost importance to their health.

If farm fowls do not pay for their keeping something is wrong. The fowls are not the cause of it either. It is a slow and difficult task to overcome prejudice on the part of the farmer who will not listen to arguments. In spite of this fact the development of farm poultry interests goes on.

THE waters of Lethe (forgetfulness) are not good for house plants.

"Well I won't make that Thousand Dollars, but I will make enough in savings on my shoes to pay me for my trouble.

HE MARCHED WITH SHERMAN TO THE SEA;

Trudged all the way on foot, over mountain and through morass, carrying knapsack and gun, slept on brush heaps to keep out of the mud, caught cold, from the effects of which his friends thought he would never recover. Lingering with slow consumption for many years, he saw Dr. Pierce's Golden Medical Discovery advertised in a country newspaper, and he determined to try it. A few bottles worked a change; six months' continued use cured him. Always too independent to ask his country for a pension, he now says he needs none. He helped save his country, he saved himself! Consumption is Lung-scrofula. For scrofula, in all its myriad forms, the "Discovery" is an unequaled remedy. It cleanses the system of all blood-taints from whatever cause arising, and cures all Skin and Scalp Diseases, Salt-rheum, Tetter, Eczema, and kindred ailments. It is **guaranteed** to benefit or cure in all diseases for which it is recommended, or money paid for it will be refunded. Sold by druggists.

Copyright, 1888, by WORLD'S DIS. MED. ASS'N.

For BOYS' & YOUTH'S.
$2 & $1.75 SCHOOL SHOES.

W. L. Douglas Shoes for Gentlemen are made in Congress, Button and Lace, sized 5 to 11, including half sizes and widths, and all styles of toe. Boys' sizes 1 to 5 1-2, and youth's 11 to 13 1-2, also half sizes in each.

W. L. Douglas $3.00, $2.50 and $2.00 Shoes for Ladies are made in "Opera" and "American Common Sense." Sizes 1 to 7, and half sizes; C (except in $2.50 shoe), D, E, EE widths.

W. L. Douglas $1.75 Shoe for Misses, 11 to 2 and half sizes, regular and spring heels.

CAUTION! BEWARE OF FRAUD. Do you want to wear the genuine W. L. DOUGLAS SHOES? If so, read this caution carefully. W. L. Douglas name and the price are stamped plainly on the bottom of all his advertised shoes before leaving the factory, which protects the wearer against high prices and inferior goods. If a shoe dealer attempts to sell you shoes without W. L. Douglas' name and the price stamped on the bottom, and claims they are his make, do not be deceived thereby, although the dealer may be your personal friend, put him down as a fraud.

It is a duty you owe to yourself and your family during these hard times, to get the most value for your money. You can economize in your footwear if you purchase W. L. Douglas Shoes, which, without question, represent a greater value for the money than any other make in the world, as thousands who have worn them will testify.

Wanted—A local agent in every city and town in the U. S. not already occupied. **Correspondence invited.**

If local advertised agent cannot supply you, take no others, but send direct to factory, enclosing advertised price. **To Order by Mail,** Gentlemen and Boys will state size usually worn, style and width desired. Ladies will please state style desired, size and width usually worn, and if a snug or loose fit is preferred. Misses size and kind of heel. **W. L. DOUGLAS, Brockton, Mass.**

WANTED—An Agent for these shoes in this vicinity.

BROKEN LOTS

—IN—

MEN'S, YOUTHS' and CHILDREN'S CLOTHING.

WE HAVE had a good trade right along this season, no room to complain, and consequently we naturally conclude that Honest, Well-made Garments, at Fair and Square Prices, are appreciated every time. Now, as trade commenced early with us, necessarily leaves a good many Broken Lots, 36x40 of one kind, 35x37 of another, &c., which we can afford to close at a Small Margin Above First Cost, as no middleman gets a slice of our stock; they come direct from the manufacturer to us. We have sold a great many suits and the broken assortments we have bunched together and marked them down.

IN OVERCOATS

our trade has been correspondingly large and the remnants will be closed at the same reductions. Having a nice line of these goods, all new this season (as we carry no goods over) and not expecting margins to be made in sixty days, we can and will put a price on them that they must go. We have been selling goods in Chestertown so long now that the trade is fully aware of our full assortment without enumerating kinds, and the close price at which we sell these goods has never been more fully appreciated than this season. We can please you in style, quality and price.

Nice Line of Furnishing Goods as Usual

BOOTS and SHOES!

What we have left in Boots we will close at Cost, for instance: A Man's First Quality Kip Boot for $2.00, Good Solid one for $1.65; 22-inch Leg, Double Upper, Three Sole Oyster Boot $2.25; Boys' and Youths' in like proportion. We can save you 20 per cent. on these goods as we don't intend to carry one single pair over. In Men's Fine Shoes we are selling a great many and carry the Most Complete Line in Town. We are also getting up a nice trade on Custom Goods. Make any style to measure and guarantee a job in every case. Men's Rivited $2.75, Boys' Rivited $2.50. Embrace the opportunity is the invitation extended by

A. FRIEDMAN,

Opposite Stam's Hall. *Chestertown's Leading Clothier.*

STOVES! STOVES!

Heaters, Cook Stoves,

RANGES!

WE ARE HANDLING S. B. SEXTON'S FIREPLACE HEATERS, NAMED

"Grand" and "Inaugural."

These Heaters are put up with a guarantee of entire and perfect satisfaction, and to give as much heat as any other heater and to use less fuel. The heaters take the lead wherever sold.

HOWE'S VENTILATING STOVE

is the newest and and best novelty out in Stoves. It ventilates the room of all impure air and heats it with pure air.

"The Perfection Meat Cutter"

is also something new, and is equalled by none. It cuts 3 pounds meat per minute. No knives to break or sharpen. Does not mash, but cuts the meat.

Call and see these novelties and keep up with the times. We have a fine line of

Guns and Sporting Goods

Do not forget we are prepared to do all kinds of TINWORK at BOTTOM PRICES.

We thank our friends and the public for past favors and solicit the continuance of their patronage at the Hardware, Stove, Tin and House-Furnishing Store of

THOMPSON---Up Town.

"Hello, Where's Bill Thompson?"

WHY, I'VE MOVED

INTO my NEW STORE, directly opposite to where I have been for the last eleven years, and would be pleased to have you all come and see me. I shall try to keep as usual a full stock of

Groceries, Provisions, Boots and Shoes, Hats and Caps, Domestic Dry Goods, Tinware, Queensware, Hardware, &c.

all of which will be sold at close bargains. We make a specialty of

BOOTS and SHOES

and would mention a few of our leaders: 1st, That Lady's Kid Front, Glove Kid Top, Worked Button-hole Shoe, at $1.75, have sold 1,400 pair of them in a little over three years, and every lady that buys one pair of them wants them again. 2d, A Man's Solid (guaranteed) Plow Shoe at $1.00, same as is sold elsewhere for $1.25. 3d, A Lady's Good Lace or Buttoned Shoe for $1.00. 4th, Our Double Upper, 22-Inch Leg Oyster Boot at $2.75 a pair.

Lime, Hair and Whitewash Brushes.

We are selling the W. J. Lime, which is said by both masons and carpenters to slake at least one-fourth more than other limes.

FLOUR! FLOUR! FLOUR!

We have also Lea's and Gambrill's brands of Flour by the pound, bag and barrel, but please bear in mind that we sell Flour by the Barrel for cash only.

Our aim is to keep a little of everything and while we do not expect or wish to sell all the goods that is sold in Chestertown we would like to sell a small share of them. Thanking you all for past favors and patronage we only ask a continuance of the same.

Resp'y, &c., WM. C. A. THOMPSON.

WE EXAMINE EYES FREE!

YOU THINK YOUR EYES ARE GOOD!

If you have them examined you will probably find that there is something wrong with them, and that glasses will be a great help to you.

We use Inimitable "OLA MANTA" lenses, which are made only by us, and recommended by leading Oculists as the best aids to defective vision. Solid Gold Spectacles $3.00; usual price $5.00. Steel Spectacles - .50; usual price 1.00. Artificial Eyes inserted 4.00; usual price 10.00.
