Order of Publication.

J. Evan Thomas,
versus
Laurence A. Thomas, R. Snowden Thomas, Thomas Jones, Mary A. Wright, Annie M. Whitaker, William T. Hepbron, administrator of Daniel W. Turner; unknown heirs of Daniel W. Turner, Sarah E. Turner.

In the Circuit Court for Kent County, in Equity.

THE OBJECT OF THIS BILL is to enforce a vendor's lien against the unknown heirs of Daniel W. Turner, late of Kent county, Maryland, deceased, and for the resale of certain real estate belonging to said decedent, sold to said decedent by the late Richard S. Thomas, the purchase money for which real estate has never been paid, or title passed for same; and for the distribution of the proceeds of such sale to the legatees of the said Richard S. Thomas or to whoever the same may belong.

The bill states that a certain Richard S. Thomas, late of Kent county, deceased, in his lifetime sold certain valuable real estate situated in or near the village of Still Pond, Kent county, Maryland, to one Daniel W. Turner at and for the sum of fifteen hundred dollars, but the said Daniel W. Turner departed this life without having paid the purchase money for, or receiving a title for the same.

The Bill further states, that letters of administration upon the estate of Daniel W. Turner, deceased, as aforesaid, were granted unto William T. Hepbron, who has filed in the Orphans' Court his administration account upon the personal estate of said Daniel W. Turner, which shows the estate of said Turner to be insolvent, and the personal property to be insufficient to pay his debts.

The Bill further states that the said William T. Hepbron, administrator, as aforesaid, has, since the death of the said Daniel W. Turner, regularly collected and received the rents from the said real estate, but has never accounted to the complainant or any one else interested therein.

The Bill further states that by the last will and testament of the said Richard S. Thomas, deceased, that this complainant, Lawrence A. Thomas, R. Snowden Thomas, Thomas Jones, Mary A. Wright and Annie M. Whitaker are the residerary legatees of the said Richard S. Thomas, and are entitled to the proceeds of the said real estate, sold, as aforesaid, by Richard S. Thomas to Daniel W. Turner, as above set forth.

The Bill further states that no deed was ever given to the said Daniel W. Turner by the said Richard S. Thomas for said lot of land, and the legal title now abides in the residerary legatees of the said Richard S. Thomas.

The Bill states that complainant is willing to give a good and valid deed to the heirs of the said Daniel W. Turner, or to any one else who may be entitled thereto, upon the payment of the purchase money, so as aforesaid due for the same; and though the time has long since passed which was limited for the payment of the said purchase money, the legatees of the said Richard S. Thomas enjoy neither the possession of the said real estate nor any of the rents or revenues arising therefrom, but the same are paid to the said William T. Hepbron, who has never accounted to the complainant for any part of the same.

It is thereupon ordered, this 14th day of July, 1892, that the complainant, J. Evan Thomas, by causing a copy of this order to inserted in some newspaper printed and published in Kent county, Maryland, once in each of four successive weeks before the 15 day of August, next, give notice to the said Sarah E. Turner and the unknown resident or non-resident heirs of the said Daniel W. Turner of the object and substance of this bill, and warning them to appear in this court in person or by solicitor on or befor the 2nd day of September, next, to show cause, if any they have, why a decree should not be passed as preyed.

SAMUEL G. FISHER, CLERK.
True copy, Test:—
SAMUEL G. FISHER, CLERK.

(Read before the Farmers' Institute Delaware at Spring Branch, on the 20th of July.)

Cause and Cure of Peach Yellows.

BY T. R. COUSEY, ESQ.

GENTLEMEN:

The executive committee having some trouble to procure speakers for this occasion requested me to give the members a talk on a subject of my own choosing. But, being unaccustomed to addressing public assemblies, I preferred to commit my thoughts to paper and have concluded to make a short article on the subject at the head of this paper.

That is, "The Cause and Cure of Peach Yellows." While doing so I do not claim to have discovered a sovereign remedy for this scourge. Such a claim would be presumptous in a layman in so short a time, while the scientists have been seeking it for several years and have not yet found it. All that I claim for my treatment is that trees that were so far gone last summer as to have all the limbs cut off but one, that the limbs on that limb are now clothed with healthy foliage, and were loaded with peaches before the hail storm beat them off. Some other trees that were treated the same, or at least so ordered, show unmistakable signs of yellows. Whether these trees were faithfully treated or not, I am unable to say, as it was entrusted to others. I only hope that by perserverance we may find something or some treatment that will arrest this limb destructor of our orchards.

When peach growing was in its infancy on this Peninsula there was no talk of yellows. It might have existed elsewhere but it was unknown here, and why is it here now scientists thus far have been unable to explain. They have made the discovery that where one tree in an orchard is attacked, others are liable to follow. But they have not told us why, whether through the roots, from living insects or atmospheric influence. If this problem was solved we believe that a remedy could be found. It would seem that with all their learning and all the out lay by the Agricultural Department in this branch that something definate should have been discovered before this. They tell us that when a tree shows unmistakable signs of yellows it should be pulled up and burned. We might, perhaps, have found that out without the aid of science. Now, what we want the scientists to find out and tell us is, the cause of yellows. If we knew this we could intelligently seek a remedy; but, so far, nothing but pulling the trees out has been advised.

This advice is cehap, but it costs money, and no little to grow an orchard to maturity and it is anything but pleasant to be compelled to pull it out just as it arrives at an age to come into profit—at leas: that is my experience, and after two or three years' experience, in that line I began to study the question of arresting the disease, and I discuss it from this standpoint.

It is well known that small pox, diptheria, scarlet fever and some other malignant di seases, are as surely fatal to the human without treatment as is the yellows to the peach tree. But with timely and judicious treatment, many, if not all of these cases are curable. This being so, why may not the same laws govern the vegetable kingdom?

With this theory in view, I commenced last fall some experiments on an orchard that was being pulled out at the rate of nearly a hundred each year, and I adopted the practice of an old doctor which, perhaps most of you have heard before, but being applicable in this case, I will repeat it. It was said that he had a large bottle into which he emptied the remnants of all other bottles, and when he was called to see a patient whose case he knew nothing about, he dosed them out of the big bottle, thinking that some one of the articles in it might suit the case. So on that line I procured several different chemicals hoping that some one of them might suit the case of the yellows. I at first had the earth removed for a few inches around the root of each tree and a shovel of dry lime and a quart of salt put around each (half a pint of salt would have been better) but I started in for heroic treatment,—kill or cure.

Before using the wash we went over the orchard and cut out every diseased limb we could, in some cases the entire top was removed; of course these were pulled out. But where a single limb remained apparently healthy that limb remained and the tree was treated the same as others. But, believing then as I do now, that tight bark is the yellows, I had the bark split on two sides of each tree, thinking that this might possibly release the pressure on the sap vessels and allow the natural flow. Now what causes this tight bark is for the scientists to discover. It may be insects in the bark or it may be something else. Or if they can prove that the tight bark theory, is false, and can tell us what is the cause perhaps we can find a remedy.

After having the diseased wood removed and the bark split, (on two sides, I ordered three) I had a wash made of five pounds of sulphate of copper, one pound of paris green to a barrel of water and lime enough to make a thin wash. With this I had the trees washed last fall before the leaves dropped. This spring there was a prospect for a fair crop of peaches on many of the trees, on some of the trees that had the entire top removed except a single limb. That limb was full of peaches until the hail beat off all but two. These I hoped would remain so that I might see whether they matured or prematured. But the foliage having been beaten off as well as the fruit, the trees looking more like December than May, they fell off also. These trees are again clothed with healthy foliage.

With this treatment the orchard remained until about the first of June on account of my inability to attend to the combination of the chemicals intended to be applied. As soon as I was able to attend to it I had the following mixture prepared: first I placed in a barrel one common pail of plaster one bucket of water; to this was added one quart of ammonia and well stirred (lime would not do this work as it volatilize the ammonia and render it worthless, but the plaster has a tendency to fix it instead of dissipating it). The barrel was then filled with water, to which was added five pounds of sulphate of copper and ten pounds of salsoda and half a pound of paris green. The ammonia and salsoda are used to invigorate, the sulphate of copper and paris green as insecticides for any insects that may be harboring in the bark. I feel quite sure that the trees would have been in better condition than they are if the above application had been made in the early spring.

I regret very much the failure of the peach crop. Had it remained it is possible that I might have been able to have imparted valuable information to the peach growers of the Peninsula, but as it now stands there is nothing definite or certain as the result of my experiments. All that I can now say is, that some of trees that had as high as diseased limb cut from them are at this time showing healthy foliage. What may be the future results, time alone can prove.

The cost of materials used was about a dollar for each hundred trees. If we have a crop of peaches next year, and those diseased trees do not premature their fruit, we will have conclusive evidence that we are on the road to the discovery of something that will wipe out the peach yellows instead of the yellows wiping out our orchards. If, on the other hand, should our experiments prove an entire failure it will only be at the cost of a few dollars and a few days' labor investigating a subject of great importance to the people of this Peninsula.

My intention now is to push the investigation still further and should I hit upon a remedy it will be given to the Farmers' Institute and through them to the peach growers, unencumbered by patent claims.

At Narragansett.

Haud—How delightful the world would be if there were no men in it.

Margy—Yes; it would be just like one great long visit to the seashore.

Two Odds Are Even.

Sue—How did you and Tom Hillow happen to get married, Blanche?

Blanche—We were both single, you know.

"Yes."

"Well, we married to get even."

TOSSED BY A WHALE.

The schooner Lulu lies on the way at Captain Hunt's wharf at the foot of F. street in quite a dilapidated condition. Her stem is smashed, bottom scraped as though she had been drawn across the bight and about a quarter of her rudder is missing It all happened in this way:

The evening of July 10 Captain Ed Burke was at the wheel sailing northwest under a stiff breeze. The vessel is of five tons burden and was loaded with four and a half tons of fish. He was just off Point Canoyas, 250 miles south, and was homeward bound. All at once the little craft reared out of the water, the stem went down into the sea and a crashing told that something unusual had happened.

John Fitzhughes was sitting forward near the port rail and went overboard head first, but in the descent he grabbed a loose line that hung over the side. The vessel next raised out of the water from the middle, as if forced up by a powerful jack screw. She went up like a flash and fell back just in time to right herself. Then something struck the rudder a powerful jolt and the tiller threw Captain Burke sprawling to the deck. By this time Fitzhughes had managed to climb aboard, and a huge whale, appearing to be wounded threw water from his spouting apparatus all over the vessell. The monster swam rapidly away, spouting at irregular but frequent intervals, and the two old salts got down on their kneos and offered up fervent thanks for their safe delivery.

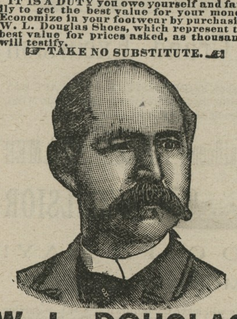
The schooner arrived here yesterday afternoon and is now undergoing extensive repairs.

Hard to take—the big, old-fashioned pill. It's pretty hard to have to take it, too. You wouldn't, if you realized fully how it shocks and weakens the system.

Luckily, you *don't* have to take it. Dr. Pierce's Pleasant Pellets are better. They're sensible. They do, mildly and gently, *more* than the ordinary pill, with all its disturbance. They regulate the liver, stomach and bowels, as well as thoroughly cleanse them. They're the original Little Liver Pills, purely vegetable, perfectly harmless, the smallest and the easiest to take. One little Pellet for a gentle laxative—three for a cathartic. Sick Headache, Bilious Headache, Constipation, Indigestion, Bilious Attacks, and all derangements of the Liver, Stomach and Bowels are promptly and permanently cured.

They're the cheapest, too, for they're *guaranteed* to give satisfaction, or your money is returned. You pay only for the *good* you get.

IT IS A DUTY you owe yourself and family to get the best value for your money. Economize in your footwear by purchasing W. L. Douglas Shoes, which represent the best value for prices asked, as thousands will testify.
TAKE NO SUBSTITUTE.



W. L. DOUGLAS
$3 SHOE FOR GENTLEMEN,
THE BEST SHOE IN THE WORLD FOR THE MONEY.
A genuine sewed shoe, *that will not rip,* fine calf, seamless, smooth inside, flexible, more comfortable, stylish and durable than any other shoe ever sold at the price. Equals custom made shoes costing from $4 to $6.
$4 and $5 Hand-sewed, fine calf shoes. The most stylish, easy and durable shoes ever sold at the price. They equal fine imported shoes costing from $8 to $12.
$2.50 Police Shoe, worn by farmers and all others who want a good heavy calf, three soled, extension edge shoe, easy to walk in, and will keep the feet dry and warm.
$2.50 Fine Calf, $2.25 and $2.00 Workingmen's Shoes will give more wear for the money than any other make. They are made for service. The increasing sales show that workingmen have found this out.
Boys' $2.00 and Youths' $1.75 School Shoes are worn by the boys everywhere. The most serviceable shoes sold at the prices.
Ladies' $3.00 Hand-sewed, $2.50, $2.00 and $1.75 Shoes for Misses are made of the best Dongola or fine Calf, as desired. They are very stylish, comfortable and durable. The $3.00 shoe equals custom made shoes costing from $4.00 to $6.00. Ladies should wear W. L. Douglas Shoes when they can get them. Beware of dealers attempting to substitute other makes for them. Such substitutions are fraudulent and subject to prosecution by law for obtaining money under false pretences.

FOR SALE BY C. F. STAM.

Tutt's Tiny Pills

To cure constipation purging the bowels should be avoided; it weakens their power of motion. A gentle aperient effect is only required. Tutt's Tiny Liver Pills are prepared with special views to the permanent cure of COSTIVENESS and HEADACHE. They are mild and remain in the system until they act on the liver, cause a natural flow of bile and their tonic properties impart power to the bowels to remove unhealthy accumulations. Good appetite and digestion result from the use of these little pills. Price, 25c. Office, 39 Park Place, N. Y.

THYMO-CRESOL

—OR THE—

"COLD WATER DIP."

Is unrivaled as a Sheep-Dip, Cattle Wash, and secticide, Disinfectant, &c. One or two applications in a year to Sheep not only keep them in health, but also increase the growth and improve the quality of the fleece, to a surprising degree.

—FOR—

TICKS, LICE, SCAB, MANGE, SCREW WORMS, THRUSH, SCRATCHES, WOUNDS, &c., &c.,

For all Skin Troubles, and for ridding all kinds of Live Stock from parasites, it has no equal. It is also wonderfully effective in many infectious and contagious disease, such as

PLEURO-PNEUMONIA, SWINE-PLAGUE, CHICKEN-CHOLERA, &c.

In such cases it is administered internally as well as externally.

It is used and recommended by the leading Veterinarians in both hemispheres. Its uses upon a Farm are innumerable.

GENTS' LACE SHOES.

In this line we are always particularly well stocked in Sizes, Styles, and Grades, because the Lace Shoe is one of the very popular styles of Gentlemen's Footwear; they mould themselves to the instep and are easily adjusted to a snug fit without being too tight. We are showing some very elegant shoes in this line, made on the latest lasts, and models of style and fitting qualities. This, together with the best of stock and extremely low prices makes it safe to promise we can please you in Lace Shoes.

Ladies' Dress Shoes.

Daintiness of finish and glove-like fit signalize our Dress Shoes. Add the gloss of Fine Material and the Tone of the Newest Style, and you have the perfect Shoe. Such we offer you every season, but particularly this season, when fresh modes and larger demands are encouraged by the fact that ladies have learned that a proper adornment of the foot is as necessary as a stylish hat, and manufacturers plan to give maximum comfort and standard goods at the minimum of fair prices.

FOR Spring and Summer 1892

You Will Find Us at the Top in Footwear!

Our stock is right up to date in the matter of Styles. We are always in the front rank, displaying the Choicest New Novelties as fast as they appear. We keep a Thoroughly Modern Line of Goods in all departments, and make it our special pride to be at all times fully stocked with the Latest and Best.

Ladies' Low Shoes.

Dress seasonably, and you find comfort. The season is at hand when the Low Shoe becomes indispensible, for they fill the requirements that exist between the light boot and the slipper, and the class we carry will fill this want well, economically too, as you will find upon investigating our prices. A neat Shoe is desirable, and one combining excellency of material and fairness of cost is just what we can supply.

26 SOUTH CALVERT STREET, BALTIMORE.

POWELL'S PURE DISSOLVED SOUTH CAROLINA BONE

$12.00 a ton

This article is sometimes called **Dissolved Rock**—if Potash is wanted with it we charge 50 cts. a ton additional, which includes the cost of thorough mixing. Dry and in good condition for drilling. Powell's Raw Bone $30.00 per ton. Valuation in Ga. $11.70 per ton. **Powell's** Green Bag, Yellow **Bag** and Red Bag Fertilizers are considered the best complete Fertilizers for Wheat and Grass. Full information about freight rates.

Cash, including bags in carload lots of 12 tons or over, less quantities $12.50 per ton, no charge for drayage. **Powell's Dissolved S. C. Bone** is generally conceded to be the best made. As proof of this in the States where it is most largely sold the Agricultural Experiment Stations give it the following values:—Ohio, $25.95 per ton; W. Va., $24.81 per ton; which is from $2.60 to $4.00 per ton greater than other brands.

A pamphlet on Wheat and Grass by twelve leading agriculturists mailed free on receipt of three 2-cent stamps. Private formulas, Alliance, Grange, and Farmers' Clubs orders, manufactured specially without extra charge.

W. S. POWELL & CO., CHEMICAL FERTILIZER MANUFACTURERS. Importers of Potash and other fertilizing Chemicals. Dealers in all kinds of fertilizing materials.
202 to 219 Bowly's Wharf, BALTIMORE, MD.
