The New Butter Extractor.

The *American Farmer* says: An ingenious fellow in Sweden has invented a machine for making butter from milk nearly fresh from the cow and it now looks as though a great revolution in butter making is about to occur, brought about by this wonderful machine. The whole process of extracting butter from milk by its use is a mystery to us and we can only stand back in amazement and await further developments. The success of the process, however, is proven beyond doubt, and the following description, taken from Hoard's Dairyman, will throw some light upon the methods of making butter by means of the Extractor:

"One month ago, the machine was set up at 90 Wall street, New York, and has since been astonishing every manipulator of milk, cream and butter who has inspected it. It takes sweet milk at a temperature of 62 degrees, runs it through the machine at the rate of 1,500 pounds per hour—the skimmed milk—there is no buttermilk about it—coming out at a point on the periphery of the bowl, and the granulated butter from the center. The machine is much like the Danish-Western separator, as to the main bowl; and it has inside of the said bowl another device called the "disturber," into which the cream enters as it seeks the center, and as we understand it from the cut and the explanation, a secondary separation is effected in the disturber that eliminates all the serum of the milk from the fat, save a little more than 1 per cent. of the caseine matter. As the most perfect churning of the purest cream obtainable, by any of the old processes, leaves one per cent.; and the great bulk of the butter has 2 to 3 per cent., and some of the poorest from 6 to 7 per cent, it will be seen it turns out butter essentially the same as to freedom from the matter that makes butter go rancid, as we get from best churning. It is also true that to get butter, through churning, as free from caseous matter as good butter makers get it, the cream has to be acidified, and put in condition to have said decaying matter washed out as much as possible.

From this fact, have we not assumed that cream must be acidified, in order that the butter may have long keeping qualities, when in point of fact, all we accomplished was to get rid of the caseous matter, and in doing so, did no good to the butter fat, and may be damaged it a little, by forcing it to be in contact with matter just in first stages of decomposition? We raise the question—we are hardly clear about it ourselves. But however it may be the butter Extractor takes out the said matter, almost entirely, and that without decomposing it a particle, and gives the fat nearly pure. Not having the said caseous matter in it, that is found in greater per cent. in most butter, the claim is made that the butter being nearly pure fat, will, when salted and packed, keep longer, than average butter, and for immediate use is unsurpassed in sweetness, freshness and high flavor.

Whether any of these claims will have to be modified, the incipient revolution is hardly well enough established for us to yet determine. That sweet and pure butter can be spun right out of milk, at the rate of one pound per minute, from milk, of which it takes twenty-five pounds to make a pound of butter, is the simple truth.

Skimmed Milk for Heifers.

Concerning this subject Mr. A. F. Abbott writes: "For the past four years I have made a practice of feeding skimmed milk to heifers until a year or more old. I have one now that has had it daily for twelve months. This has been her only extra food besides hay since four months old. Whether sweet or sour it is eaten with as keen a relish as though just from the cow. A heifer three years old in March was fed in the same way. She came in when two years old and averaged a pound of butter a day after the calf was weaned, April 15, until December, and six pounds a week through the winter and gave two quarts of milk a day up to the time of calving. The other heifer, now a yearling, has every indication that she will develop into as good a butter maker. These heifers retain their appetite for skimmed milk after they come into the dairy themselves, and the question whether skimmed milk might not be fed to cows to advantage is an open one.

Editors amount to something in Germany. For instance, the editor of the General Post Office Journal is called a Reichsoberamtszeitungschreiber.

Married women claim a great ma... things, but we have never heard ... boast of being older than her h... band.

A hen out West has just laid ... egg as big as a bowl. It is the f... time we ever heard of a bowl eg... hen.

Adam had one thing in his fa... Eve could not ask him wether he ... loved any other woman before he ... her.

FARMERS!

LOOK SHARP!

AND

Study Your Interest Well!

The Farmers' Fertilizer Company

Again calls the attention of Farmers of Carroll and adjoining counties to its large and carefully selected stock of

FERTILIZERS

Which are manufactured of PURE material only. These goods have been thoroughly tested and have in every case proven satisfactory. The company therefore feels justified in saying that its goods are the best in the county. In addition to this the company assures the farmers that its prices are the lowest for the same quality of goods of any factory, agency or house in the county for the following reasons:

1st. It buys its material from 75 cents to $2.00 per ton less than any other home companies because of buying in larger quantities.

2nd. It has no agents.

3rd. It pays no premiums and, better than all, instead of conceding a gain of from $5.00 to $10.00 only on $800 purchases it assdres to every purchaser an advantage of from $25.00 to $30.00 PER TON, according to the quality of goods, less than any other establishment in the county, which is a saving of from $25.00 to $16.00 on $800 purchases.

With a view to economy the Farmers' Fertilizer Company carries no more varieties of brands than is needed for the production of a good crop. What it has, however, are pure and suited to the soils of the county.

The company will take pleasure in mixing at a reasonable cost any formula desired.

Farmers who furnish their own sacks will be allowed $1.00 for each ton of Fertilizer purchased. CASH SALES will be allowed a discount of 2 per cent.

In addition to its well known

BRANDS 1, 2 AND 3,

Three new Brands have been added, ranging in price from $17.00 to $19.00 per ton, which are from $2.00 to $3.00 per ton cheaper than any goods of the same quality on the market.

To be convinced of the truth of these declarations call at its factory and see for yourselves.

E. M. BISH, Sup't.
