
3 Outstanding Buick Features

The power and dependability of the Buick valve-in-head motor, the positive yet easy action of the Buick multiple disc clutch and the Buick torque tube drive rear axle with its certainty of performance—are three of the principal reasons why more Buick cars are in use today than any other make save one.

We'll be pleased to have you ask for a demonstration.

MEN'S SUITS!

$16.50

AND UP

It is needless, too, for us to tell you about the make of these fine suits or the materials used, as these clothes are nationally advertised and so well-kkown that we need not go into details about them.

It suffices to say, however, that they were designek by the country's formost authorities on Men's styles and were cut from the best patterns, allowing for comfort as well as for style. Single, Double-Breasted and Sport Models—Built on Quality, Growing Quality.

ORDER NISI

In the Orphans' Court of Kent County, Maryland. Ordered this 16th day of May, 1922, that the sale of the real estate mentioned in these proceedings made and reported by Benjamin Comegys Emory, Trustee, under and by virtue of power and authority contained in the Will of William N. Emory, deceased, and by an order passed in this Court be ratified and confirmed, unless cause be shown to the contrary on or before the 29th day of July, 1922, next; provided a copy of this order be inserted in some weekly newspaper, published in said Kent County, at least once a week for four successive weeks before the 24th day of June, 1922, next.

The Report states the amount of sales to be $14,750.00.

EDWARD A. SCOTT,
J. HENRY THOMPSON,
W. K. HUDSON,
Judges Orphans Court.

True Copy, Test:
S. G. CALDWELL, Register of Wills.

NOTICE TO CREDITORS

Notice is hereby given that the undersigned has obtained from the Orphans Court for Kent County letters testamentary on the personal estate of JAMES T. ANTHONY, late of said county, deceased. All persons having claims against said deceased's estate are hereby warned to exhibit the same, with the proper vouchers thereof, to the undersigned on or before the 8th day of October, 1922, otherwise they may by law be excluded from all benefit of said deceased's personal estate.

All persons indebted to this estate must settle at once.

Given under my hand this 4th day of April, 1922.

E. RUMSEY ANTHONY,
a8-4t. Executor.

Farmers, List Your Repair Needs

It would be hard to find a farmer who at some time or another had not lost valuable time waiting for necessary repair parts. Take this territory and total up the time lost in this way and it will astonish you. And all because repairs are not odered as early as they should be.

There is no better time than right now—just before the busiest season on the farm—to go over your machines carefully, make a list of repairs you are likely to need and send it to us. With this list in our hands, we can order our stock so as to be prepared to meet every call promptly.

Repair part service is a necessary part of our business. We realize what it means to you in time and money to get what you need at once. Help us to help you by making up your list now and sending it in to us.

PAUL COMEGYS
Millington, Maryland

THE UMPIRE CALLS "PLAY BALL'

By Paul West

This world's a diamond, with the bases laid,
And on it Life's great game of ball is played.
The teams are Human Beings versus Fate.
And Time's the umpire watching by the plate.
We're at the bat. Our purpose o'er and o'er
To wield Ambitions club and try to score.
To try to solve the curve the pitcher throws,
And lam the sphere where not a fielder goes.
Some of us seem to bat with skill immense,
Knocking long homers o'er the deep-field fence.
Others bunt infield hits, but wildly race,
And beat the ball down to the primal base.
Still others, though they strive their best, no doubt,
Fan wildly at the air, and then—strike out;
Then seek the bench, downcast, with visage drawn,
Crestfallen, shamefaced, blue, ambition gone!
Or rage the umpire, growling like a bear:
"You robber! That decision wasn't fair!"
That's not the game! Be not a grouch or quitter!
What though you're not a straight 300-hitter?
You've got another chance. Stand to the plate,
Grab tight your bat, get braced and calmly wait!
Wait for a good one. Let the others rip,
And when it comes—now! Lam it hard! and zip!
It's got to go! And so must you, old man!
Hike for the base. Keep going—yes, you can!
Steal second! Good! Now, easy—not too gay
There! Get a lead! A hit! Now you're away!
Keep on! Don't stop! Don't lose that dandy stride!
You've got to beat the throw-in! Slide, now Slide!
Hurrah! You did it! Score? Of course you scored!
See—there's your tally marked up on the board!
And now you'll win the game—no doubt at all!
You just can't lose, old man, if you'll PLAY BALL!

POULTRY

HOW LEG WEAKNESS AND THE GAPES ALSO TAKE THEIR DEADLY TOLL

If proper precautions are taken such diseases as leg weakness, gapes and many other kindred ills can be avoided. Consequently we must constantly keep on the watch for signs of their appearance. Experienced poultrymen, with a keen knowledge of the business, can usually "scent" the approach of disease before it actually makes its appearance to others, and this power of observation should be developed as much as possible so that unfavorable conditions which usually accompany and are responsible for these troubles may be remedied before the ailments become so firmly fixed that it is almost impossible to combat them successfully. An ailment may be merely a weakened condition of the chicks brought about by improper brooding or by the ravages of vermin, or it may be one of the more serious diseases which often attacks growing stock.

Leg weakness is by this time familiar to every raiser of chickens in Kent county. It sometimes develops and spreads rapidly before it can be stopped. It is not contagious and should not be classed as a disease at all. It is more a condition of weakness developed by unfavorable conditions. Forced feeding, resulting in a rapid growth, develops a body too heavy for the legs to support, but in all probability this weakness is caused by insufficient exercise which would soon strengthen the muscles of the legs to the extent that the legs would be able to support the fast growing body. The ailment is more or less confined to chicks kept in brooders or on house floors of wood or concrete, or on dry sand covering such floors. It usually begins after about three weeks have expired and continues as long as the conditions remain the same, developing new cases continually. Changing to outdoors and putting a good litter in which they are forced to scratch for their grain will soon bring about a decided remedy in these conditions. Chicks with hens seldom contract this trouble, early hatched chicks, kept in close quarters being far more susceptible to it.

Gapes, next to bowel ailments, is perhaps the most bothersome of all ailments to which chickens are susceptible. This trouble we have always with us, and unless more attention is given to preventive measures it will bother us for many years to come. The worms are found in pairs, the male and the female, are so intimately joined together that the bodies must be torn in order to separate them. These worms are taken from the soil in the form of eggs, which hatch in the windpipe and unless removed choke the chicken to death.

Prof. Harry Rickey says that the eggs of the gap worm are found in the earth worm, and they may possibly be in other worms and insects which are picked up by the chicks and so furnishes further means of infestation. It can, therefore, be seen how easily the disease may be spread and carried over from year to year, and how difficult it is to control. If taken in time before the soil becomes contaminated gapes may be prevented by moving chicks to new ground each year, disinfecting, etc. At the Bramble Poultry Farm we have used the same ground for many years, and never had a case of gaps. We believe this is due to the fact that twice a year we plough this area up and seed it with rye, which is allowed to reach maturity if possible.

Prof. Rickey says that affected chicks may be treated successfully by inserting a feather with the blade stripped from the quill, with the exception of a small tuft at the end, well down into the windpipe, then twisted carefully and withdrawn, bringing with it some of the worms. This must be repeated until practically all are removed. With this treatment, he states, there is some danger of injuring the lungs or the lining on the windpipe. A horsehair is also used by some in about the same way. These methods, however, require considerable time. A plan frequently used with success is to place the sick chicks together in a box, cover the top with a bag and sift into the box air-slacked lime. The dust causes the chicks to sneeze or cough violently, thereby forcing out the worms.

ROCK HALL

Miss Gladys Collison has been quite sick the past two weeks from a severe nervous affection.

Weldon Blackiston will be employed on the steamer Louise this summer, where he will be pleased to see his friends.

Mr. and Mrs. Howard Newnam, of Chestertown, visited over night the latter's parents, Mr. and Mrs. John Collison.

Mr. and Mrs. John Downey have as guests their son-in-law and daughter, Mr. and Mrs. Johnson and family, of Baltimore.

Miss Mary Downey and Miss Naomi Thomas have been visiting in Baltimore.

Capt. and Mrs. Charles E. Davis entertained for several days the latter's sister, Mrs. Irene Holley, of Havre de Grace.

Mrs. Allie Harrison was over night guest of her brother-in-law and sister, Mr. and Mrs. William Biggs.

Mrs. Franklin Shreck, of Baltimore, visited her son and daughter-in-law, Mr. and Mrs. Alvin Shreck, over Decoration Day.

Miss Gladys Culley, of Galena, was Sunday guest of her parents, Mr. and Mrs. Edgar Culley.

Miss Horace Willson, of Baltimore, is the guest of her mother, Mrs. Horace Willson.

Mr. and Mrs. Harry Webb were recent hosts to their daughter, Mrs. Clifton Kendall, and Mrs. Webb's sister, Miss Ella Bruff, of Baltimore.

Mr. and Mrs. Roland Miller, of Chester, are guests of the latter's parents, Mr. and Mrs. Edgar Judefind.

The Adventist School closed Friday, the teachers, Mrs. Witt and Mrs. Sewell, giving the children a nice treat of ice cream and cake.

KENNEDYVILLE

An AEROLUX Haven of Comfort

A sizzling, blistering summer's day—pedestrians passing with wilted collars and torrid dispositions—the folks next door chasing the elusive, shady portion of their open porch—and you as cool as the proverbial cucumber behind your AEROLUX Shades.

Are you missing it! Is your porch too hot for rest—too public for comfort? AEROLUX will convert it into the coolest, airiest, most comfortable room in the home.

On such a porch mother can relax from the cares of a summer household. Baby is always ready for the refreshing daily nap—no need to coax, for the porch is airy and secluded. It's an ideal place for sister to entertain. And dad—it's his favorite location! He claims the most comfortable corner the very first day—and is secluded enough so that he can slip off his shoes without being arrested.
