Pomona Grange Meeting.

The quarterly meeting of the Pomona Grange of Kent County was held at Still Pond. The day was one of sunshine and a good crowd for the occasion. The business meeting was held in the morning, followed by the customary bounteous and appetizing "Eastern Shore" dinner.

The afternoon meeting was open to the public and over one hundred representative farmers, farm women and others were present. The program consisted of two principal addresses interspersed with musical numbers and recitations. E. C.Remsburg, Pomona Master of Frederick County Grange was the first speaker. Mr. Remsberg spoke of his work with the Grange and also with the Farm Bureau. He said there was no conflict between the two, but one helped the other and that the Farm Bureau was much needed by the farmers. Mr. Remsberg cited several instances of how the Farm Bureau was bentfiting the farmers in the Western Maryland counties where organized. One co-operative effort of the Farm Bureua cited Mr. Remsberg was the purchasing of a train of 43 cars of steers from a western ranch and feeding out and co-operative selling of same at a good profit.

One of the greatest addresses ever delivered on Agriculture in Kent county, in the opinion of a large number of those present, was given by Dr. Walker. of California. Dr. Walker is a farmer, a member of the California Prune Growers Association, Organizer and President of the California Farm Bureau and Vice President of the American Farm Bureau Federation. Dr. Walker told of the present organization of the Farm Bureau. which is in over 3,000 counties and in every State in the United States. Maine alone is the only State whose Farm Bureau is not affiliated with the National Farm Bureau and they are expected to come in soon. In the economic field, Dr. Walker cited the necessity of farmers organizing by stating that the farmers of the United States compose one-third of the working people of the United States, but that of every one hundred dollars received by the working people, the farmers only received sixteen dollars, while the other two-thirds received the other eighty-four. Dr. Walker stated that one of the greatest aims of the Farm Bureau was to build and maintain a high standard of citizenship in the rural districts of America. After pointing out the various big legislative accomplishments of the Farm Bureau, Dr. Walker stated that of the many millions of dollars the Farm Bureau was spending, it was not spending one cent for the purpose of fighting any other organization. but all was used to further constructive programs for the benefit of the farmers.

An interesting clay pigeon shoot was held Thursday afternoon at Crumpton. in which a number of local and visiting marksmen participated. Splendid scores were made by J. W. Marsten, of Harrington; W. J. Beechum, representative of the Winchester Arms Co.; Dr. Merritt Brice and Paul Comegys, of Millington; Jerre Godwin and J. W. Herd, of Crumpton; Howard Hopkins, and Charles Clough. of Price.

Pioneering for petroleum

THE oil geologist is expected to put his finger on the map and say "Drill here". His responsibility is heavy, for sinking oil wells is a costly and laborious work, and the real map of the oil field lies hidden beneath the surface. Last year there were drilled 5406 dry holes—failures. It costs from $40,000 to $100,000 to drill a deep well, varying with the locality.

The geologist forms the first link in the chain of specialized experience required for success in the oil industry. For over fifty years the Standard Oil Company (New Jersey) by combining the functions of producing, transporting, refining and marketing, has made possible the daily delivery to your door or filling station of products of sustained quality. Ask for Polarine and "Standard" Motor Gasoline by name.
