IF YOU ARE GOING

TRADE MARK

To Grow TOMATOES!

You cannot afford to take chances and use any other than T. R. HUBBARD & SON'S Specially Compounded Tomato Fertilizer. There is more of this goods used on Tomatoes and with better results than any tomato goods in the country. It is compounded on scientific principles the formula was obtained from the world renowned chemist, Dr. G. A. Liebig before his death, and in the event of a dry summer our patrons claim that they grow from 2 to 4 tons more tomatoes with it than from other goods costing more money.

What Some of Our Patrons Say:

Senator Wm. T. Hepbron, says: Your Tomato Phosphate is the best I ever saw. I have used it now for a number of years and always have a crop; even last year I had from 11 to 12 tons per acre all over. I want more.

Capt. R. S. Emory, says: On one occasion he grew over 16 tons per acre with it.

Mr. Geo. W. Collins, of Magnolia, Del., says: It beats the world, used our goods on three farms. On one he got 12 tons, on another 13 and another 16 tons per acre in 1897; said his tenants get tired picking and hauling they had so many. If you have any doubt as to this write him, the above is his address.

Baker & Morgan, the great canned goods people purchased over $1000 worth last spring.

J. R. Leager, Cheswold, Del., got at the rate of 13 tons per acre last year and year before.

Mr. Clay Stevens, near Crumpton, says: he has tested it with others and has always done splendidly for him; he realized $50.00 an acre in 1897, and last year had the best in the neighborhood.

Joseph Downey, Rock Hall, says: He could actually tell the difference in the tomatoes grown and brought to his cannery that were grown with peerless.

D. F. Loose, Cheswold, Del., got 3 tons more per acre than from another goods costing $3.00 more per ton.

S. M. Taylor, (the representative) of Kenton Del., says: He not only had a big crop, but his tomatoes did not blight and all his neighbors did.

We could go on and give you hundreds of testimonials but the best proof of the pudding is chewing the string. Send in your order as we have of this goods on hand now the largest stock we ever had and this goods has an Animal Bone Base, is amoniated with the Animal Matter on the Animal Bone, Fine Ground Fish and Nitrate of Soda. A good portion of the Phosphoric Acid is derived from the Animal Bone and the Potash is derived from Double Sulphate 90 per cent. and sylvinit and so far as plant food is concerned there is no better obtainable.

If you are going to grow Potatoes. Fertilize your Corn. Feed your Peach and pear trees. Top dress your Grass. Sow Oats or anything that will require Phosphates. **See or Correspond with Us,** and we will save you money.

T. R HUBBARD & SON,

Local Snap Shots

An effort is being made to have the sentence of Joe Wright, colored, commuted. He is sentenced to be hung March 24th.

Soup House.—Mr. John S. Vandegrift and his estimable wife have been engaged in a good work this week. On several days they served a wash boiler full of vegetable soup to needy persons. Mr. Vandegrift says many of those who received soup had been without food for three days.

Wild Geese in Town.—A flock of wild geese flew over Chestertown Tuesday afternoon and two of them alighted in Eliason's lumber yard. From there they flew over to Mr. J. H. Simpers' back shed and one of them was killed by Mr. Hopkins, an insurance agent, who happened to be in Mr. Jack Bradley's home in the rear of Mr. Simpers' store. The other goose made his escape. The goose killed by Mr. Hopkins was fat as butter and is supposed to have been searching for water.

He Stole a Ride.—Last Tuesday morning a special engine was sent from Centreville to clean the track of snow so that the north bound train would experience no difficulty en route to Townsend. A man who refused to give his name, climbed on the front of the engine before it left Clayton, and remained in his position, undiscovered, until the engine reached Price's. When he was discovered at this station by the engineer, he was almost completely covered with snow. He was placed in the engine cab and given a pleasant ride the remainder of the distance.

The Most Popular Lady.—An interesting contest is being conducted in Baltimore upon the part of the friends of several young ladies for a Knabe piano, valued at $500. The piano is offered by the *Morning Herald* and the Knabe Company to the young lady who receives the most votes through the coupon system inaugurated by the *Herald*. Every subscriber to the *Herald* is entitled to a vote for each coupon they cut out of that journal and fill in the name of their choice and forward the same to that office. The friends of Miss Janie McFeely, a popular young lady, formerly of Centreville, and now employed by Hutzler Bros., are making a lively contest in her behalf. She is a niece of Mr. James P. Parrott, of Chestertown. Chestertown has a number of young ladies clerking in Baltimore stores, any one of whom we are sure are deserving of the piano.

An Elegant Reception.

The Mt. Vernon Literary Society of Washington College held their annual reception at the Brown House on Front street, on Friday evening, Feb. 10th. Among those present were Messrs. Gill, Frazier, Baden, LeCompt, Scott Beck, E. Simpers, Sutton, Biddle, Powell, N. Jefferson, Dyott, Rude, H. Jefferson, Jones, Roe, Wheatley, Gum, Larrimore, Coulbourne, Marine, Noble, Roeser and Walls; Misses Hallie Toulson, Barbara Anthony, Irma Eliason, Helen Wilkins, Bessie Wheatley, Adele France, Jennie Hines, Freddie Strong, Cora Emory, May Jones and Mary Brown.

On account of the extreme cold the girls of Normal Hall could not attend. During the evening several games were played. The names of those who attended were written on the same piece of paper, a blank space being left in front of each name. Then descriptive adjectives were gotten, one from each guest, and placed before the names in the order in which they were written. When completed the result was read aloud, causing much laughter. On slips of paper twenty-five questions were written whose answers could be found on a penny. The prize which was offered to the one getting most of the answers correct was awarded Miss Cora Emory who answered every question correctly. The booby prize was won by Mr. Coulbourne. Other delightful games were played and a grand time enjoyed.

At 10.30 refreshments were served, consisting of ices, cakes, bonbons, fruits, nuts, etc.

A Girl's Chance of Marriage.—A painstaking statistician has figured out "The American Girl's Chances of Marriage," and will present his conclusions in the March issue of *The Ladies' Home Journal*. He has discovered that in some States a girl's opportunities are much greater than in others, and that in America they are much greater than in many countries of the Old World.

Feed the Birds.—Every farmer who has a covey of birds on or near his farm should not fail to feed them during the present cold snap. The Maryland Game Protective Association are making every effort to enforce the game laws, and farmers should aid them in every way possible.

R. BERGEN's new adv. will appear next week. He has returned from Northern cities with a stock of fresh goods of the latest styles and at prices to suit everybody.
