Inspection to be done on the buy boats, three fourth of the shell to be returned to the oyster bars and the other fourth to be used for roads. There has been very little travel this week because of the muddy roads. During such weather if travel was suspended as much as possible especially with heavy teams it would materially lessen the expense attending the repairs to the public highways.

One of the greatest improvements to the public roads that we have noticed for some years is the bridge across Fannels Branch on the road from Fairlee to Chestertown, built last fall by W. S. and A. M. Culp. Undoubtedly it is the best bridge in the county. The filling in around the bridge was under the supervision of Messrs. J. R. Bryon and George Hendrickson on one side and on the other side by the Lusby Bros. The removal of a great deal of earth was necessary from the hills on either side but it was very expeditiously managed and favorably commented upon.

For some years Fairleeans advocated the necessity of bridges over the two branches between Fairlee and Chestertown, the other branch being at Mr. J. P. DeCourse's gate. The bridges are built and we say well done to our County Fathers.
