ELECTION RETURNS.—The special election in the 19th and 20th wards for a member of the second branch of the city council to fill the vacancy occasioned by the resignation of Benj. F. Zimmerman, took place yesterday, and resulted as follows:

| Wards. Democrat. | | Wards. Know Nothing. | |
|---|---|---|---|
| 19th Chas. Towson, | 371 | 19th John Hilbert, | 457 |
| 20th " " | 416 | 20th " " | 469 |

Hilbert's majority 130.

The vote at the election in October last in the same wards showed the following result:

| Wards. Democrat. | | Wards. Know Nothing. | |
|---|---|---|---|
| 19th Chas. Towson, | 519 | 19th Zimmerman, | 812 |
| 20th " " | 512 | 20th " " | 761 |
| | 1031 | | 1573 |

Zimmerman's majority 542.

This shows a decrease in the vote, as compared with the last election, of 503 in the 19th ward, and 397 in the 20th, and a total decrease in the two wards of 900 votes *Balt. Sun.*

☞We are advised by the St. Louis News, that the Legislature of Missouri has just passed a bill authorizing the construction of a bridge across the Mississippi at the above named city, in which measure it has been anticipated by the Legislature of Illinois. It is an important step in which all the State are more or less interested.—The distance from the Missouri shore at Bloody Island is set down at about 600 yards, and a suspension bridge over this abyss is spoken of. We doubt if the business which is verging thither will be satisfied with a bridge simply for common carriages. The most important railways in this country will be in a few years seeking a connection, as we believe at St. Louis, with the Pacific Railroad, and they will not stop for the Mississippi.

☞The severity of winter was felt in England during the first week in February, the same period of its greatest severity in this country. A London correspondent says—The various parks have presented more the appearance of as many fairs in honor of some great National event, than the usually quiet promenades. The ice has been literally covered with human beings, sliding and skating. In St. James Park above 15,000 persons have been counted at one time on the ice. The Serpentine River, in Hyde Park, had 8,000 upon the ice. The Thames above Richmond is completely frozen over, and no craft, even of the smallest description, can either pass up or down the river. Nearly all the steam vessels plying above London Bridge were compelled to be laid up.

☞A correspondent of the National Intelligencer points out what seems to be an erroneous construction but upon the new letter postage law passed at the late session of Congress. It has been very generally stated that the provision in relation to pre-payment would take effect on and after the 1st of July next, but as the law itself declares that it shall take effect and be in force from and after the commencement of the next fiscal quarter after its passage, and as it was approved on the 3d of March, the correspondent referred to contends, and it would seem correctly, that it will take effect on and after the 1st of April ensuing, that day being the commencement of the fiscal quarter.

*Mayoralty Election.*

CHICAGO, March 8—The Know-Nothings have elected their Mayor by 344 majority. There is great rejoicing. A large procession marched thro' the streets, headed by a German Band.

CHURCH SUITS IN BOSTON DECIDED.—The suit pending between the heirs of John Hancock, of revolutionary memory, and the Brattle street Church, Dr. Lothrop's, in Boston, has been decided in favor of the church. The decision gives the church absolute control over the property, the limitation to the heirs being pronounced void.

The Supreme Court at Boston has also decided the long pending Federal street Church case in favor of the present occupants of the church, the Unitarian Society of Dr. Gannett. The property involved is valued at between $85,000 and $95,000.

THE MCDONOUGH ESTATE.—The heirs of a man from New Jersey, named Spencer, have made a claim on this estate for about $5,000, with 10 per cent. interest thereon from 1815. A letter from N. Orleans, in relation to this claim, says:

If any portion is allowed, compound interest cannot go into the account, as it is contrary to our law. The executors of the estate have filed an answer in court, denying any indebtedness and a perscription of over thirty years. It is an unjust claim and will be strictly atrended to by the executors, whose duty it is to protect the estate as long as it is under their charge.

☞The Washington Sentinel, whose editors are Democrats of the straitest sect comments as follows upon the last veto:

Our views upon the veto power have been often expressed, and are well known to our readers. We believe they are not only in accordance with the long established views of our party, but are, we honestly believe, formed upon the true spirit in which it was provided in the Constitution. We must be permitted to say, however, we conceive its abuse quite as dangerous as its exercise was intended to be salutary.—Without having had the opportunity to read the message, and hence being ignorant of the reasons which the President assigned for it, we unhesitatingly express the opinion that in ordinary cases of the appropr ation of money, the exercise of the veto power did not enter into the contemplation of the framers of the Constitution and the founders of the republic

☞Judge Mason, the American Minister in Paris, is said to have almost entirely recovered his health. During his illness, the Emperor and all the Imperial family manifested much interest in his welfare, and at thel ast diplomatic gathering at the Tuilleries the family of Mr. Mason were present, and were warmly con-

PETTENGILL & Co., Newspaper Advertising Agents, are agents for the *Cambridge Chronicle*, and are authorised to receive advertisements and subscriptions for us at the same rates as required at this office. Their receipts are regarded as payments. Their offices are at New York, 122 Nassau street, and Boston, 10 Spring street.

☞WM. H. PEARE, Esq., SUN IRON BUILDING Baltimore, is our SOLE authorised agent in that city, to receive subscriptions and advertisments for the CHRONICLE. *His receipts will be considered as payments.*

**PARTICULAR NOTICE.**

Persons indebted to the Cambridge Chronicle, will please call immediately and settle their accounts. We are endeavoring to make the "Chronicle" as interesting a journal as any on the Shore—yet unless our patrons and advertisers be kind enough to pay up old standing accounts, we may fail in the attempt.

☞We have purchased Mr. Beal's subscription books, for which we paid the cash and sincerely hope all concerned will regard this notice.

☞The American Organ holds the following language in relation to the position of the party it represents:

Any northern man who thinks the agitation of the question of slavery a matter of more importance than the success of American principles, has no business in our order, and the sooner we get clear of all such, the better. Any southern man who can see nothing good in the order, because there are anti-slavery men in it, has no business in the order, and the sooner we get clear of them, too, the better. The croakings, the taunts, the ravings of our enemies shall not force us into recognizing slavery, either *pro* or *con*, as one of the elements of our organization. We say to the Richmond Enquirer, the Union, the Washington Sentinel, *et id omne genus*—you may *affect* as much horror as you please for abolitionists—and rail at us as much as you choose—but still you shall not drive us into the denunciation of every man who thinks slavery a great evil—and, moreover, the American party do not intend to allow you to destroy this Union, because your co-workers in mischief will agitate about slavery. On the other hand we say to the New York Tribune, the National Era, the Albany Journal, and all birds of that feather, you shall not force us to become pro-slavery advocates nor do we intend to allow you to destroy the Union because there are slaveholders in the order.

☞The life of man is a series of revolutions from the cradle to the grave, he is tossed about on the great ocean of life as a shuttle-cock, while circumstances of which he is but the sport, shapens his manifest destiny. The phenomena of coporeal movements, in spite of him have a unity of action, and betwixt the history of the human races, the revolutions of empires and the individual man, the strongest relations of affinity may be traced. Each phaze is a natural series of events—infancy, childhood and decline. The same is true with disease, each one has its revolution, remission, intermission, paroxysm and decline. The phenomena of disease then is as deversified and inscrutable as the phenomena of living organized matter—from nature alone must we learn our knowledge of her laws and designs. Profiting by the experience and lessons thus taught, I am enabled to present to the notice of the intelligent and afflicted remedial agents to cure disease incident to all, and which are not to be heeled lightly nor despised for the good that they already have accomplished.—More than twenty thousand suffering mortals have been restored from sickness to health by their use. That Medicine which has the power to paralyze the devastation of CHOLERA, to strike powerless *Consumption*, or to turn back the setting tide of life's feverish dream," are not to be heeded lightly. IRONTON, O., March, 1853.

I feel it a duty that I owe to my fellow sufferers, to state that I have experienced great relief from the use of Sellers' Liver Pills. I have suffered severely with the Liver complaint for several years, so much so that both myself and friends have thought that I could not survived but a short time. Much money had been expended in the endeavor to procure relief from the physicians, but all in vain; as a last resort on the recommendation of my brother, I procured some of Sellers' Liver Pills, at your store, and found great relief from their use, and in the continued use of them since, I have almost entirely recovered my health. His method, which has been adopted by Mr. Damer, both in the Italian and English styles, renders the exercise truly healthful, and many persons, in the first stages of Consumption and Asthma, have been materially benefitted by his system of Inhaling, instead of Exhaling, in producing vocal sounds, inasmuch as the chest is always kept inflated.
