other, and by being so thoroughly powdered, so completely sub-divided into the most minute particles, start at once and together, act in unity, and with the combination of two distinct but equally necessary powers. If you doubt this, apply a ton of your own mixture side by side with the manipulated, weigh the product of crop, and you will want no further evidence; more than one have satisfied themselves in this way. Independent of which take a ½ ton of the best Phosphatic Guano, and a ½ ton of the best Peruvian, allow $1 for new bags which you get, wear and tear of machinery, factory rent—steam engines and repairs—coal, laborers, store rent, clerk hire, advertising, loss in Guano, besides various items, "too numerous to mention," and it comes considerably beyond what we actually ask you for it; it is in buying the Phosphatic Guanos by the thousands of tons, in very large quantities, that gives me a moderate profit. Certainly I can buy it at a less price than you possibly can. Wait one moment, Sir, you seem to be a fair man—there, sir, there is a true calculation of what you have to pay for the best Phosphatic Guano, if you were lucky enough to get it.

Now sir, do you complain of price? there lies my profit in the Phosphatic Guano, it does not come out of you.

F. Come! come! Mr. Kettlewell, don't get excited, I am only repeating what others have said, who wanted to sell me Phosphatic and Peruvian Guano, and perhaps who knew as little upon the subject as I confess I did; you have very much interested me, and the question is as important to the farmers as it is to you. We want a substitute for Pernvian Guano, all admit that, who have continuously used it, and I am much disposed, from this interview, to believe that you have found it for us; and if that be the case, you ought not to be repaid by suspicions, doubts or prejudices, but by a fair trial upon the merits of your article, and if it turns out to be what you have stated, then by a generous patronage, and confidence so long as you maintain your standard! A farmer cannot produce anything like the sample in this bottle!

K. No sir, I have taken a ton of Peruvian Guano and reduced its lumps with the most elaborate care upon my farm, as perfectly as any farmer could do, then manipulated another ton of the same by machinery to a condition as powdered as the sample you hold in your hand, sowed them side by side upon the same land, and there was a difference of upwards of 4 bushels of wheat per acre, in favor of the latter. The smallest particle you see in that bottle is amply capable of discharging its whole duty. Many small lumps in the Peruvian, when the farmer has done his best, kills the seed, and burns up the land; these are important facts and truths, which every farmer should know, even if they do not buy my manipulated.

F. Can I see it in the bags?

K. Yes sir, walk into the store; there it is.

F. Is that it? I took that for the Peruvian Guano.

K. No, sir, that is the originator, "Kettlewell's" Manipulated Guano, branded upon every bag—but no one could tell it from Peruvian by its outward appearance—the bags—the odor—the whole appearance so resembles Peruvian that it cannot be told until you examine its completely pulverized condition; here are no lumps; no dirt; perfectly dry; entirely uniform, and admirably prepared for the drill, or the farm hand to apply.

F What did you say the price was?

K. The price varies with the price of Peruvian Guano, which was last fall $55 per ton, but this year has been advanced by the agents to $60 per ton—I then sold the No. 1 manipulated at $45 per ton and the No. 2 at $40 of 2000 lbs. So long as Peruvian continues at its present price the No. 1 will be $47 per ton and the No. 2 $42 per ton of 2000 lbs. I have not advanced fully with the Peruvian. In actual value to the farmer, in crop and land, these prices ought just to be reversed, the manipulated advanced to the price of the Peruvian, the Peruvian reduced to the price of the manipulated. Thousands who have used both will confirm this.

F. What quantity do you apply per acre, of the manipulated?

K. Precisely the same quantity you would apply of Peruvian Guano, not cost for cost, but pound for pound; your crop will be fully equal, nevertheless—in all probability more—and the service it will render your land in durable improvement, will be a full equivalent for the cost, independent of the crop.

F. Would you recommend its application with the drill, or broadcast?

K. It is in a most perfect condition to apply with the drill; wheat flour could be scarcely more so, and so far as the cost of the manure is concerned, there is a great economy in this mode of application; but you must not forgot that using the Manipulated Guano is like using bone-dust, and therefore sown broadcast gives permanent improvement to the whole land. With this explanation, every farmer can exercise his own judgment.

F. It is a new thing in our neighborhood, although I have heard it spoken of by those who have used it, with a praise that justifies all you have said; I will therefore this time divide my purchase, half of your manipulated, and half of the Peruvian, which you can supply, and test the matter myself. I will also take one ton of the No. 2, as I cannot otherwise than feel the force of what you have said in reference to its durable qualities. I am the owner of my own land, and feel an interest in its improvement equal to crop.

K. That is the only true system of farming, better understood, perhaps, and more practiced upon by the intelligent German farmers of Pennsylvania, than, as a system in any other State of the Union.—Here, sir, is a large packet of certificates which perhaps you would like to examine. They are worthy of confidence and respect, coming from sources entitled to consideration—they embrace every description of soil, from limestone to sand—the growth of almost every grain or plant—from the practical farmer, the extensive planter, and the amateur, and from every quarter of Maryland, Virginia, Pennsylvania, North Carolina, Georgia and South Carolina, &c.; and in conclusion, I challenge the publication of a solitary instance where my Manipulated Guano has failed to produce a first crop of anything that grows or requires manure; inferior, less in quantity, weight or quality, (I except the growth of straw, or the stalk of the corn) than the Peruvian Guano; and after ten years of toil, unremittingly employed in reaching the article I now present to the public, I will abandon the field if it does not produce a very far superior second crop, or crop of clover, without the addition of any second application. The additional quantity of phosphate of lime, the condition of the Manipulated Guano experience—and a most extensive practical demonstration fully justifies this declaration.

F. What are your terms?

K. Cash, or satisfactory paper, interest and exchange added.

TESTIMONIALS.

The following letter is from the careful, prudent and reliable society, popularly known as "Shakers," from their head quarters, New Lebanon, N. Y. Testimony from such a high source, must and will command attention:

NEW LEBANON, July 15, 1858.

Friend G. Ober, Gen'l Agent for Kettlewell's Manipulated Guano: Your favor of June 30th came to hand in my absence. In reply I would say: Your *Manipulated Guano* we have thoroughly tested, and on our medical gardens we find it fully equal to Peruvian Guano, for promoting the growth of our medicinal herbs. Where we have tried it side by side with Peruvian Guano on some crops, and we find on many of the plants, to be superior to any thing we have ever used—Peruvian Guano not excepted. EDWARD FOWLER.

PETERSBURG, VA., July 14, 1858.

Mr. John Kettlewell—Dear Sir: Your favor of the 9th inst. was duly received, and we regret that we have not been able to procure the promised letters and certificates in regard to your Manipulated Guano, which certainly should have been ready, but the writer, who attends to such matters, was suddenly and unexpected called to the West about a month since, and was unable to attend to this matter before leaving. You say you wish to have your pamphlet out in a few days, and we must send these certificates on immediately. This will be impossible as all of the persons live in the country, and it would require some time to write them and receive their answers. We will therefore only give you the names of some of our most successful farmers who have given your Manipulated a fair trial side by side with the Peruvian, and who are now using the Manipulated exclusively, and in preference to all other manures. Mr. Francis R. Wills, of Prince George county, Va., gave it as fair a trial as any one could give, and we would be very glad to annex his certificate, but as he lives in the country we shall not have time to get it, and will simply relate what Mr. Wills stated in our office some two months since in the presence of some six or eight gentlemen, directly after he had sold his tobacco in West Hill Warehouse, and Mr. B. B. Vaughan, one of the Inspectors of the Warehouse will certify to the correctness of Mr. Wills' statement so far as the prices obtained for the tobacco made with the respective manures. Mr. Wills' Post Office is Petersburg, Va., and we will be pleased if any gentleman will correspond with him in regard to this matter. In the spring of 1857 Mr. Willis bought of us half a ton of Peruvian Guano and half ton of your Manipulated, which he applied on a small lot near his home—dividing the lot in half, he applied the half ton of each manure on each side of the division, and planted the tobacco on the same day—worked it all alike—cut it at the same time—kept it separate, but cured it in the same barn and with the same fires. At the time he cut it he states that he thought the tobacco made from the Peruvian Guano was the best, but when he looked at it after being cured he found that the crop where the Manipulated was applied was much heavier and of a rich oily nature, while that made from the Peruvian was light and a dry leafy substance.—He brought crops to our city and sold it on the same day in West Hill Warehouse. The crop made from the Peruvian brought $7 per hundred lbs., and that made from the Manipulated brought $9¼, and the latter weighed much heavier. This is the general report of every one who has given your Manipulated a fair trial, and from the reports we have of it, and from all that we know of it, we believe it to be the safest manure a farmer can apply to his land. We annex Mr. Vaughan's certificate and the names of farmers who are using it largely and successfully. Very respectfully,

JOHN ROWLETT & CO.

My agents in Petersburg, Va., Messrs. John Rowlett & Co., refer to the following well known *Virginia* names as a reference to the quality and results of my article bearing my name. It will be observed that they have generally selected one from each county:

R. P. ATKINSON, Dinwiddie County.
H. A. WINFREE, Chester County.
F. R. WILLS, Prince George's County.
T. B. DYSON, Nottoway County.
Major R. N. NEBLETT, Nottoway County.
J. W. COOKE, Belfield County.
J. S. HARRIS, Brunswick County.
W. M. GILL, Dinwiddie County.
O. P. HARE, Prince George's County.
J. W. REESE, Belfield County.
Dr. G. H. HUNT, Greensville.
B. SMITH, Lunenburg County.

PETERSBURG, VA., July 14, 1858.
West Hill Warehouse.

Messrs. John Rowlett & Co.—Gents: In reply to your favor of this date, I have to state that some time in the early part of this year, the Inspectors at this Warehouse sold for Mr. F. R. Wills, a successful farmer of P. George's, and a gentleman of high character and undoubted integrity, two lots of loose tobacco, one of which, as stated by him, was made on land where Manipulated Guano had been used and the other where Peruvian Guano had been used; the former bringing $9¼ per cwt.; the latter only $7. As indicated by the prices, there was a very marked difference in the two lots so far as to the quality and character of the tobacco; that of the former being heavier and rich; of the latter thin, bony, coarse and poor.

In addition, I will state that so far as I am informed, the tobacco grown on land where "Kettlewell's Manipulated Guano" has been used is generally of a superior quality, and consequently several of our large tobacco growers are now using this guano on their tobacco crop in preference to other manures.

Very respectfully yours,
B. B. VAUGHAN,
First Inspector, West Hill Warehouse.

HICKSBURG, DORCHESTER CO., MD., July 10, 1858.

Dear Sir: I can say to you briefly in regard to the use by me of your (Kettlewell's) *Manipulated Guano*, that whilst the scab has most seriously impaired my crop, that its results were superior to the use of *Peruvian*, and that I would prefer it—certainly as leave use it as the Peruvian at the same price in the production of a first crop. From my knowledge of your article, I have great faith in its value for a second crop. Your friend,

ROBERT F. THOMPSON.

P. S. I have my grain in market, and find the quantity about equal, but the quality of the grain grown from the Manipulated decidedly of better quality. I shall continue to use your article.

JAMES T. DEANE, of Richmond, writes under date of July 6th, in the following extract: "My trip to my farm was a hurried one, consequently unsatisfactory—I saw enough, however, to satisfy me of the superiority of the Manipulated over the Peruvian, and but for the rest, my wheat crop would have exceeded any ever before grown on the place, it does not do so now."

BALTIMORE, July 12, 1858.

Dear Sir: In answer to your enquiry I take great pleasure in stating, as you know, that I have sold a very large quantity of your Manipulated Guano, scattered throughout Baltimore and Hartford counties, Maryland, and the border counties of Pennsylvania, and that I have, with a constant personal communication with the best farmers of this model farming country, heard but one universal expression of testimony, that of approval. As a producer of a first crop it is fully equal to Peruvian Guano, and in durability and all else its master; such is the universal opinion and experience. Your friend,

CHARLES B. GREEN.

NORFOLK, July 14, 1858.

John Kettlewell, Esq.—Dear Sir: Yours of the 8th inst. is to hand, contents noted. Absence from home has prevented an earlier reply.

Those of our farmers and truckers who have tested your Manipulated Guano, inform me that they consider it equal, if not superior, to the Peruvian.

Mr. David Creecy, a neighboring farmer and trucker, informed me, "That after several years of experience in the use of other Guanos, he had found none that would produce the same lasting effects on soils as your Manipulated. The second, and frequently the third crop being equal to the first, or land where your Fertilizer is used, if mixed with the soil in the same way, and in same quantity as the Peruvian, will produce the second and third year crops *equal to the first.*" I can safely say, from facts and information elicited, that there is no manure superior to your Guano, and I have no doubt, as soon as its valuable properties are better known, that most of our farmers, planters and truckers will purchase it in preference to any other.

Respectfully yours, &c.,
B. S. BOCKOVER.

Extract from a letter of Howell E. Warren:

FARMVILLE, VA., July 12, 1858.

"Every person to whom I have sold your Manipulated Guano have approved of it, and some consider it equal to Peruvian Guano.—One gentleman, Mr. Joel J. Scott, who has, until recently, been one of our best farmers in Cumberland county, Va., gave as his opinion, that it was superior to Peruvian Guano; he used it more extensively than any other of my customers. I have no doubt it is a valuable manure. I remain, very respectfully,

HOWELL E. WARREN.

In a personal interview with my friend and agent, R. C. Carter, Esq., of Denton P. O., Caroline co., Md., he authorized me to say in his name, the universal satisfaction which my Manipulated Guano had afforded, with one exception—namely; he had heard that what had been used by Jacob Morgan, Esq., had not turned out so well—but immediately on Mr. Carter's return home, I received the following letter:

CAROLINE CO., MD., July 7, 1858.

Dear Sir: When in Baltimore I stated to you that I had learned that Mr. Jacob Morgan's wheat was a failure, where your Manipulated Guano was used, but am happy to say now, that I have just learned from one of Mr Morgan's neighbors that his best wheat is from the Manipulated, even surpassing the best No. 1 Peruvian. Respectfully yours,

R. C. CARTER.

HANOVER, PA., July 10, 1858.

Mr. John Kettlewell—Dear Sir: We have sold considerable of your Manipulated Guano last season, and as far as we can learn, has done remarkably well on fall and winter grain—Wheat and Rye—and no doubt will want considerable this season to supply the demand, as there is already inquiry making for it.

Yours truly,
HOSHOUR, KLINEFELTER & Co.

ANNE ARUNDEL CO., July 12, 1858.

Mr. John Kettlewell—Dear Sir: You asked me to say what "the Manipulated Guano" has done for me; I reply with pleasure, that I used only 150 lbs. per acre on my wheat last fall, and until, and up to the time when the crop was struck by rust and scab, I had a fair prospect of 20 bushels to the acre. My wheat, though much injured as above mentioned, is the best (I think) in my neighborhood, and I attribute its escape from total destruction, in a great degree, to the use of "the Manipulated." The crop ripened so early and rapidly that it escaped the withering effect of the hot sun.

I prefer it greatly, and think it more valuable than the pure Peruvian.

Yours, respectfully, FRANK. A. BOND.

W. M. WATKISS, Esq., of Charlotte County, Va., writes:

"In the application of the ton (Kettlewell's Manipulated Guano) last summer, at the rate of 100 lbs. per acre, at the last working of the crop, I saw no difference in effect compared with 100 Peruvian Guano applied at the same time, nor could my overseer, the experiment being fairly made. Nor can I or he see any in the wheat which followed the tobacco crop.

YORK, July 10, 1858.

To John Kettlewell, Esq.:—We have sold a considerable quantity of your Manipulated Guano, from which we infer that it has been approved; we have had no one particularly to come to us and make statements of trial, comparing with Peruvian Guano, but we have never had any complaints; we expect still to sell it in common with other Fertilizers.

Respectfully yours, F. A. & S. SMALL.

The following parties, principally residing in Frederick County, one of the most extensive Grain growing counties of this State, have used my Manipulated Guano; and although I have not conversed or had any communication with them, yet I refer to them without hesitation, because I know many of them to be the best farmers of this State, and if my Guano has, in any way come short, it should be known. In a subject so important, the truth, the whole truth, and nothing but the truth, should come out:

Randolph Shafer, Middletown, Steven R. Bowlers, do., Benjamin Routzahn, do., Robt Shafer, do.; Wm. Fogle, Liberty, A. C. Devilbiss, do.; Charles Lease, Mount Pleasant, Henry Storr, do., Jacob Barrier, do., G. W. Buckey, do., Saml. Neesbaumy do., Ephraim Creager, do., Daneil McDaniel, do., George Riner, do.; Jacob Booker, Johnsville, J. A Hartsock, do.; M Zimmerman, Creagerstown; Moses Grabill, Woodsboro'; Wm. Murphy, do., Geo. McCoskery, do.; Prof. D. Baltzhoover, Emmettsburg; Daniel Shellman, Frederick, Jacob Walker, do., Lewis A Barr, do; Henry Stouffer, Walkersville; James Graham, Ladiesburg; Landers & Keefer, Mechanicstown; Wm. Steckman, Jefferson; Hanson Ecker, Graceham, Augustus Hoover, do.

ISAAC T. ROBINSON, of Glenalta, Marion County, Ga., writes: "Where the Manipulated was used on Cotton, it is fully 100 per cent better than on some land on which nothing was applied.

"The test of Manipulated Guano and Peruvian is about equal now, but of course the making season is yet to come."

NEAR LAYTONSVILLE, MONTGOMERY CO., MD., July, 1858.

Mr. John Kettlewell—Dear Sir: As agent for the sale of your valuable Manipulated Guano, you have requested me to report the standing of your Guano in our county with our farmers. I have to report universal satisfaction; I name N. C. Dickerson, E. R. Griffith, J. Warfield, Walter Magruder, H. Crawford, F. M. Griffith, and could go much further, were it necessary, who believe it equal, if not superior, to the best Peruvian Guano for the first crop. I bought of you in the spring of 1856, known then as Reese's Manipulated Guano, and have been your constant patron since. I have tried on all crops in all waps, and do not hesitate to say that I esteem it superior to Peruvian Guano—because it produces an equal crop, when first applied, if not better—far better in second crop, and admits of no comparison for grass. I use no other than the "Manipulated," and rest assured as long as you keep the article to the present standard, it must supercede the Peruvian with us. Respectfully yours,

URIAH H. GRIFFITH.

In addition to names given by our agent above, we name A. B. Davis, Dr. F. Howard, E. J. Hall, near Brookeville, F. Valdevar, near Colesville, &c.

WASHINGTON CITY, July 12, 1858.

Dear Sir: In affording the information you ask for, it gives me pleasure to say that I have not only not heard a solitary complaint in regard to your "Manipulated Guano," of which I have had considerable quantities, but one constant and general applause *as being precisely the article wanted by the farmers.* They prefer it even to Peruvian, even those who have yet to test its lasting and durable qualities—among the many who I have heard express this opinion, was John M. Dorn of Loudon County, Va., Benj. Caywood of Fairfax, in Loudon, Martin Irich, Va., T. Connally, and indeed all with whom I have ever conversed with, that used it. Yours, respectfully,

R. J. RYON.

Mr. John Kettlewell, Baltimore.

ALEXANDRIA, July 17, 1858.

Mr. John Kettlewell—Dear Sir: Your favor of the 9th inst. has been received, asking us to give such information as we have in regard to the results of the Manipulated Guano we have sold. In answer, we have to say, that we believe it has given general satisfaction to all who have used it. We have heard a number of gentlemen who have tried it, say they preferred it to Peruvian at the same price, and we believe a large quantity could be sold this fall but for the scarcity of money and the failure in the wheat crop. Very respectfully yours,

ROBINSON & PAYNE.

Extract of a letter from G. W. Fitzhugh to Messrs. Robinson & Payne:

CATLETT'S, FAQUIER CO., VA., May 25th, 1858.

"I take great pleasure in saying, in reply to your query, that I think that the Manipulated Guano far superior to the Peruvian Guano, or any other manure I have ever used, and now expect to use it this fall. I hope Mr. Kettlewell will meet with heavy sales as he certainly deserves success. My wheat is now heading, and is considerably in advance of my neighbors." Yours, truly,

G. W. FITZHUGH.

SUDDLERSVILLE, July 10, 1858.

Mr. John Kettlewell—Dear Sir: Your Manipulated Guano having been very extensively used in this section of Queen Anne's County, and ourselves among that number, we feel it but an act of ordinary justice to you, to express our decided approval of it as our preference, for crop and land, over all other fertilizers.

We are ignorant of any instance wherein the production of a first crop it has failed to equal Peruvian Guano, whilst the greater quantity of Phosphate of Lime, or Bone Dust, that it contains, necessarily gives to the soil a far more durable improvement, and a greater certainty of a larger clover or second crop.

The condition also gives it a leading advantage, being perfectly pulverized, dry, uniform and ready for application by hand or drill.

Maintain your standard in which we have every confidence, and the unquestioned merits of your Manipulated Guano will meet with increased favor. It is the article which every farmer wants, Bone Dust and Ammonia, in natural proper proportions. Respectfully, &c.,

JOSHUA MAY,
WM. A. BARWICK,
J. B. SPARK.

Messrs. Robinson & Payne—Gentlemen:—Kettlewell's Manipulated Guano has made quite a stir, and for the future will be used in preference to Peruvian Guano. Heartily your friend, R. B. SUTTON.

Milleville, King George's Co., Va.

Letter from Col. W. W. Bowie, Md.

ENGLINGTON FARM, July 14, 1858.

My Dear Sir: The Manipulated Guano I procured from you this spring did not reach me in time for my oats. I tried it along side the *best Peruvian*, on corn and potatoes and garden vegetables. As far as at present tested, its effects are fully equal to Peruvian, although I used, as near as I could, only 80 lbs on the same quantity of ground that 100 lbs. of the best Peruvian was used. I did this because it was so finely pulverised, it could be distributed more easily, and I concluded must act with greater quickness and force, on that account. I like it so well, that in future I shall use no Guano, unless it be "Manipulated." It is certainly much *cheaper*, more convenient, and must be more lasting as to its strength as immediately seen in its effect; it is *one-fifth* superior to the Peruvian, when used as we commonly use it, badly or imperfectly pulverized. In great haste, your ob't serv't,

W. W. W. BOWIE.

MONTGOMERY CO., MD., Jan'ry, 1858.

John Kettlewell, Esq.—My Dear Sir: In compliance with your request, I will now furnish you with my experience in the use of your Manipulated Guano—my attention had first been directed to it while on a vist to your farm in Anne Arundel Co., in the summer of 1855—the effect being so powerful on the crop of grain and grass; this was before you had introduced it to the public. I urged you then to do so—and purchased of you in the Spring of 1856, known then as "Reese's Manipulated Guano." I had known you for several years and had implicit confidence, that all guano manipulated by you and emanating from your extensive works, could be relied upon—since that time I have purchased from you, and I may say, that my confidence in the "manipulated" has been increased by its use and thorough trial.: My crops of wheat, tobacco, corn, &c., have been the remark of my neighborhood, and in order that its superiority as a fertilizer may be manifest, I will here state, that I stepped off a lot of ground in the midst of my corn field of last season, certainly not exceeding one acre, which would not have produced more than three barrels, measured the product in the presence of several neighboring farmers and found the yield to be 10½ barrels of prime corn—this was but a fair average of the yield of the field, and produced by the application of 100 pounds to the acre, broadcast. My wheat crop, harvested last summer, yielded in same ratio. My tobacco is very superior to what I have raised with Peruvian Guano, and its effect upon grass exceeds any thing I ever saw or used. Respectfully yours, N. C. DICKERSON.

AGENTS.

The following are my authorised Agents for the sale of Kettlewell's Manipulated Guano:

Deane & Hobson, Richmond, Va.; John Rowlett & Co., Petersburg, Va.; Hart & Hayes, Fredericksburg, Va; B. T Bockover, Norfolk, Va.; P. A. & S. Small, York, Pa.; Robinson & Payne, Alexandria, Va.; Howell E. Warren, Farmville, Va.; Baker & Bros., Winchester, Va.; Wm. H. Tenney, Georgetown, D. C.; R. J. Ryon, Washington, D. C.; Uriah H. Griffith, Montgomery Co., Md.; V. S. Brunner, Frederick City, Md.; C. A. Miller & Co., Monrovia, Frederick Co., Md; Houshour, Klinefelter & Co., Hanover, Pa.; C. I. L. Grafflin, St Johns Run, Md.; Rhett & Robson, Charleston, S. C.; N. A. Hardee & Co., Savannah, Ga.; Henry Nutt, Wilmington, N. C.; A. A Willard, Washington, N. C.; H. S. Stites, Elkton, Md.; Richard C. Carter, Denton, Caroline Co., Md.; Bastress & Winter, Oxford, Pa.; Jacob Tome, Port Deposit, Md.; O. M. Winston & Co., Ayletts, Va; C B. Green, corner of Gay and High streets, Baltimore, Md.; Edward Fowler, New Lebanon, New York.

☞Former and old certificates heretofore published, from equally responsible sources, have generally not been republished, but entirely new and recent ones adopted.

G. OBER, GENERAL AGENT,
No. 8 Bowly's Wharf, or
JOHN KETTLEWELL, Baltimore.

☞Terms Cash or approved paper, interest added. aug25 1m

FOR RENT,

For the year 1859, the HOUSE and LOT in Cambridge, now occupied by Elias Griswold, Esq. Apply to
aug25 JOHN R. KEENE.

FOR RENT,

For the year 1859, a good FARM in Blackwater, in a very healthy location. To a good tenant this is a very desirable place, and is one of the finest situations in the county for raising stock. Enquire of the Editor of "Democrat." aug25-3t

FOR SALE,

A fine BLACK HAWK STALLION, four years old last Spring. Sired by Felton's celebrated horse, "Ticonderoga," and out of an "Archy" mare. Enquire of the Editor of "Democrat." aug25-4t

ARE YOU FOND OF COFFEE? That is to say GOOD COFFEE? You are? Well then throw aside your old Coffee Pots, and call at JOHN G. ROBINSON'S, and get one of "THE OLD DOMINION" Coffee Pots, which is constructed upon scientific principles, and preserves the natural flavor of the coffee in boiling, which otherwise would escape, thereby requiring one-fourth less coffee, and producing a much stronger, more richly flavored, and healthy beverage. Call and examine them. aug25.

Dr. THOMAS B. CHASE,

HAVING removed to Cambridge, respectfully offers his services to the public.
OFFICE ON MAIN STREET, adjoining the residence of Mrs. Dixon. aug18-3m

REMOVAL OF CONFECTIONERY STORE.

THE subscriber most respectfully informs his friends, and the public generally, that he has removed to the Store next to the tailor shop of I. Newton Elston, and opposite to the store of Wm. Creighton, where he will constantly keep on hand a fresh assortment of

Choice Confectionery.

He returns his thanks to his many friends, and earnestly solicits a continuance of their generous support and patronage.
aug18-3m HENRY BYRN.

Negroes Wanted.

I will give the highest cash prices for any number of likely young Negroes that are slaves for life. Persons having such property to dispose of, will do well to see me before selling elsewhere, as I am determined to buy, if any are put in market.

ROBERT P. LECOMPTE.

Cambridge, Md., Aug. 11, 1858-3m*

P. S. Persons who are visiting Baltimore, with slaves for sale, will do well to see Mr. Henry Fairbank, N. W. corner of Baltimore and Paca streets.

A CARD.

ALL persons indebted to me are respectfully and earnestly requested to make immediate payment. I intend leaving in September and must close my books before that time. I have sold out to I. N. ELSTON who will carry on the tailoring business in all its branches, at the OLD STAND, next to J. B. Lake's store. [jy28] M. L. STREET.

FASHIONABLE TAILORING.

The subscriber, having bought out M. LUTHER STREET, is prepared to cut and make up all kinds of garments for gentlemen and boys in a manner that will compare favorably with the best of city work. All work made by him is warranted to fit.

His shop is the old stand, adjoining the store of J. B. Lake and nearly opposite the hotel of John Bradshaw.

I. NEWTON ELSTON,
jy28 Cambridge, Md.

Overseer Wanted.

THE undersigned wishes to employ a man to take the entire charge of a Farm. One who understands the proper management of a Farm, with large stock, the controll of hands, and who can come well recommended for honesty, industry and sobriety, may hear of a good and permanent situation by immediate application to BENJ. G. KEENE.

VALUABLE REAL ESTATE FOR SALE.

BY virtue of authority vested in me by the last will and testament of Dr. William Jackson, late of Dorchester county, deceased, I will sell at public sale in the town of Vienna,

On Saturday, Sept. 11, 1858,

in front of A. S. Evans' Hotel, between the hours of 2 and 6 o'clock, P. M., all the

REAL ESTATE

of which said Dr. Wm. Jackson, died seized, consisting of a

VALUABLE FARM,

near the town of Vienna, embracing about

264 Acres, more or less,

called HALL SEAT and BROWN'S MEADOWS. On this farm there is a large surplus of fine RED and WHITE OAK

TIMBER.

The soil is kind for corn and other crops. The BUILDINGS are sufficient and in good repair.

Also, a HOUSE and LOT, in the town of Vienna, where I now reside, with all the necessary out buildings for a comfortable family residence.

Also, one other LOT, containing about 2 ACRES, on Front street, and extending thru' to Middle street.

Also, one ½ ACRE LOT with brick-ley House thereon.

Also, one ¼ ACRE LOT of MEADOW LAND adjoining the last aforesaid lot.

Also, one ¾ ACRE LOT on Water street, with water lot and privileges.

Also, two 2 ACRE LOTS on Middle street, extending through to Back street.

Also, three 7 ACRE LOTS, adjoining each other, and on the Back street.

All the aforesaid lots are under a good enclosure, and in a high state of improvement.

Further description is unnecessary. All wishing to purchase are invited to call and examine the property for themselves.

The terms of sale will be 10 per cent of the purchase money on the day of sale, and the residue in equal annual instalments of one, two and three years from the day of sale, secured by bond and security to be approved by the subscriber, bearing interest from the day of sale. WILLIAM S. JACKSON,
aug4-ts H Executor.

A CARD.

FROM

Dr. JAMES M. JARRETT,

of the New York Lung Infirmary:

MY connection for the past eight years with the above Institution, as Chief Physician, and a twelve years' course of steady devotion to the Cure of Pulmonary Consumption and its kindred diseases, together with my unrivalled opportunities and advantage of pathological research—added not a little to a perfect system of *Medical Inhalation*—has enabled me to arrive at a decisive, direct and successful course of treatment for the positive and radical cure of all diseases of the *Throat, Lungs* and *Air-Passages*. By Inhalation the vapor and curative properties of medicines are directly addressed to the diseased organs and the integument. I do not advise the use of Medical Inhalation of any kind, to the exclusion of *general treatment;* and although I consider it a useful adjuvant in the proper management of those fearful and often fatal diseases, yet I deem it very necessary that each patient should have the benefit of both general and local treatment. The success of my treatment in the above diseases, and the high character of the Institution over which I have so long had the honor to preside, are too well known to need any eulogy or comment from me. At the solicitation of many private and professional friends, through whose philanthropic aid the above charity has been long and liberally supported, and after due consideration, I have concluded to make such arrangements as will bring the benefits of my experience and treatment within the reach of all, and not confine myself, as heretofore, to those only who entered the Infirmary, or who were able to visit me at my office. Hoping, therefore, that the arrangement will give entire satisfaction, both to my professional brethren and the public, I would respectfully announce in conclusion, that *I can now be consulted personally or by letter*, on all diseases as above, and that the medicines, the same as used in the Institution, prepared to suit each individual case. *Inhaling Vapors, Medical Inhalers*, &c., &c., will be forwarded by express to any part of the United States or the Canadas. TERMS.—My terms of treatment by letter are as follows, viz.: $12 per month for each patient, which will include medicine sufficient for one month's use; also, Inhaling Vapor, and an Inhaling Apparatus. Payment as follows: $6 to be paid to Express Agent on receipt of the box of Medicine, and the balance ($6) at the expiration of the month, if the patient be cured or is entirely satisfied with the treatment. Patients, by giving a full history of their case, and their symptoms in full, can be treated as well by letter as by personal examination. Patients availing themselves of Dr. Jarrett's treatment may rely upon immediate and permanent relief, as he seldom has to treat a case over thirty days. Letters for advice promptly answered. For further particulars address

JAMES M. JARRETT, M.D.,
No. 820 Broadway, cor. Twelfth st., N.Y.

N. B.—Physicians and others visiting the city are respectfully invited to call at the Infirmary, where many interesting cases can be witnessed, and where our *improved apparatus* for the inhalation of medicated vapor can be seen and inspected. aug 4-6m

To my Old Customers.

THE subscriber takes this method of informing his old Dorchester friends that he is prepared to furnish them a good article of

BOOTS AND SHOES,

AT NO. 276 WEST BALTIMORE ST.,
☞*UP STAIRS,*☜
(a few doors above Hanover Street,)
BALTIMORE, MD.,
