Dear Sir — York 22nd June 1815

We received your favor this Morning by Charles & this Evening Mr S. Worthy arrived safe — Your former Letter did not arrive until after Charles had left Town 2 or 3 Hours. — Considering the Heat of the Weather & the exposed situation of the parts I am surprised more of it did not go last Trip, we now send him 3 Dozen of Stone Jars which we have filled to day & think they will be more fortunate, as often as he chases to send them we will fill & return them by the person who brings them we send them in a Box just made to hold 3 Doz it will lie much better on the boards than a Barrel & the Bottles are much easier packed in it when he wants to return them. — Did not you get a set of Gears for the Pony, it is difficult to get them to borrow here & if we were to get a set made for him it is probable they would not fit the Horse we might buy. If you have them Cakes could bring them up in the Stage If you have none to spare we must do the best we can — We got 50 dozen of Bottles on Monday that would have pleased you both for size & shape this enabled us to send to Hanover this morning, Gettysburg & Carlisle next week — about 50 Dozen more will complete us & will make no space — I had a Letter last Night for J. G. White Sons about Rye & Corn these Articles must be high in B. more — We send the Linen & Salts. the latter is not as clean as we could wish but the drops will
