Dear Sir

Your favour of the 21st I have just received & am highly gratified with the effect produced by the dissemination of my address. I hope you will put it into the hands of such of your representatives as are hostile to the protection of American Manufactures.

The speculation you propose could hardly be formed here. The current of fashion wd. be against them — & without the aid of the fashionable world, nothing effectual could be done. Even in Ireland, where there is not half the enterprise that prevails here, & where beauty & fashion countenanced them; & where they were forced into existence by the most abject misery of the lower classes, they were but temporary. Association, of the poor, melted away through the temptation offered by cheap foreign goods. Nothing but government protection
