Baltimore Decr. 1st 1825

Mr C Birnie

Sir, Yours of the 29th Ultimo is before me – I think that you told me that you had considerable blue grass as well as permanent rock on your farm, I therefore think it best to send you a barshare plough with two shares, one with a coulter, & the other share to work without a coulter, by this you will be able to accertain which of the two will answer you best, & these ploughs are mostly ordered with an extra share, so that one may be in use while the other is repairing – The price of this size plough with the barshare & coulter are $14,00 without the coulter $12–00 extra barshare $2–50 each – If you should feel disposed to try the cast share probably you would find them to answer a valua – ble purpos on some part of your farm, & to be kept in repair much cheaper, there would be $10– extra cast shares 50 cts each, wrought shares made after the pattern of the cast share would be (well steeled) $2–00 each, of these we make numbers that are well liked – I enclose the price of my straw cutters on a card, I sell them only for cash & could not vary the price of them –

Your very Obt. Servt. Jonathan S Eastman
