Lancy 26th 1826

Sir We cannot engage to supply you with the seed and think you had better not depend upon us for it – we have made the contract for the Mill –

Respectfully yours
J. B. Darby

Dear Sir

Hagerstown Jany 25th 1826

You will find enclosed a letter addressed to Mr Gunton which is submitted to you, as I wish to have your approval of its contents and the course I have at length determined to pursue, being entirely different from that fixed on when we last conversed on the subject, upon mature reflection I determined that it would be impracticable if not impossible to take an inventory with any kind of accuracy at the time fixed on by Mr G, and that the sooner his real disposition towards me could be ascertained, and a very material alteration made in my favour the better, under this impression the enclosed was penn'd, being as brief as the nature of the case would admit, much more might have been said in reference to the instrument under which I now act, and the effect produced thereby but thought best to make no comments thereon wishing to reserve that for another communication

Robert Gunton Esq
Hagerstown
Washington Co Md

Dr Sir
Yours
Thos Kennedy
