Baltor Jany 1837

My dear father — I wrote to the Bk in Feb & think they will postpone proceedings until the latter end of March at which time they write be as early as if now sent bot — I have seen Mr O B. but the return of his Sons & his own circumstances I think write prevent his immediate operation I however still think he will save us harmless. — If Stuth calls on you to buy land just show him the patent, uncles will (heretofore examined by Roberts or Annapolis before he bot) Mr Taneys opinion & one or both of the Mr Keys release all in yr possession I had a conversation with him Rogers will explain the causes which produced it — R & I have seen to day all the fine English & Scotch stock & more bot in, in the orig imbo & he write give you the details. In my opinion there is nothing equal to the Durham I never saw such Colts full bred as a 2 & 3 yr old fillies perfect beauties — the sheep with the scab but such fleeces or forms I never saw believed to average 8 lbs — I am disposed to think you can sell my crop as well there as here I find it would take too much running about & the loss if any would be small — As to myself I can say nothing in regard to future motion I hope that as relates to that something will turn up beneficially at all events I do not feel much depressed — Rogers will take yr wool sacks, with love to all yrs sincerely O B. B

No. 1 Patent of Rogers Range to John Ross for 200 acres 20 Oct. 1749
