would of course make a suitable alteration in the contract to suit circum=stances. If you recollect, I told you that he promised me the same work for $62.50 :- As I was not at home when he called and have not been able to see him, I cannot assign the reason for this difference.

Now, sir, you may have the stones which have already been quarried for the regular rate at which they are sold in the neighbourhood - which is, I believe, forty five cents per perch ;- All other stone which you may chose to quarry you may have for 12½ cents per perch. I doubt whether there are any thing like stone enough, ~~to fill~~ already quarried, to fill the kiln. — Mr. Beaver will haul them, and also the wood which you have al=ready cut.

I have spoken to Mr. Long about burning the coalpit of which you speak in your letter. He tells me that he is ready whenever ~~it is prepared~~ the wood is cut and prepared, and will undertake to burn it for $1.00 per hundred bushels, free of all other charges against you.

My best respects to your family, and believe me

Sir, yours with esteem

Isaac Van N Pabbey
