Balto 22d Jany 1841

Mr Berner

Dear Sir

Yours of 12th Inst is this day received, I showed it to Mr Raybourg; and he begs me to say, he would rather be deprived of the Cows milk a little longer, than that she should be driven to Baltimore before both herself and the Calf are well able to travel — so do not hurry yourself to send her during this inclement weather

respectfully

My dear Sir

Yours of 23 Inst with Mr Raybourgs pretty little heifer Dutchess and calf, reached me in safety about 3 O Clock to day; both seem in good health, the calf's tail shows as if it had a Tax, tho I have not yet asked Davidson any thing on the subject; it is a pity the calf was not weaned a day or two after its birth, it would now be much easier to rear it, & still have the use of a greater portion of her milk

Mr Raybourg has paid me the seventy Dollars which I herewith enclose to you in Virginia Bank notes all but one of 5 notes of Washington County Bank — It is all good however, it was not convenient for him to give a Bank check

I am greatly pleased with the looks of Dutchess, both as regards her appearance for Milk, and her form, no doubt Mr Raybourg will be much pleased with her; He intends to raise the Calf, & requests you will give its pedigree both by Dam & sire if you can add any thing to that already given me — with kind regards to all your family believe me dear Sir yours sincerely
