From the best information that I have been able to procure the following is a true state of the cases of the several prisoners in our Goal. Daniel Johnson an Inhabitant of Worcester County has been absent some time from his usual place of abode, and was taken by Capt. Chadwick on Board Travers's Vessel, at the time Travers himself was taken. there is likewise a letter from Travers / among the papers I gave you / informing his Friend, that Johnson was a Friend to Government. John Gunby, nothing more appears against him than being taken in Travers's Vessel and the Deposition of Molvin that you also have. John Coe, am not certain in what manner he was taken, as will appear, but you will find among the papers, a kind of parole and protection included. — Wills was taken up some time about the first of June as a suspicious person, he pretends he had been taken by the Barge and had made his escape from them. I am rather inclined to think from appearances that he was Pilfer, having several times dropped in his own account of himself a Bottle of Aqua Fortis was found in his pocket, which I imagine was intended as a Ploy, provided he should be detected —

I am Sir your very humble Servt.

Rob Done
