Under these Circumstances can it be said there is no Difficulty risk or Hazard in obtaining the Bank Stock? — that nothing more is required of the Agent than to call on the Trustees to demand and to take an Assignment or Transfer of it and then to hire a Broker to sell and dispose of it? — And is it expected that the Trustees whose immense Property has been thus seized and confiscated will raise no Difficulties nor start Objections & Obstacles? — that they will try no Efforts to retain the Stock as a Pledge or Security? — that they will use no Endeavours to harass and perplex the State so as to oblige them to compromize the Affair and grant a Compensation? — that ~~they will~~ without any Inducement to avail themselves of the ample Indemnification in their Hands they will part with it on Demand and commit themselves to the Justice and Generosity of the State which already totters beneath the Weight of its public Debt? — They, who entertain such Expectations, must possess but little Knowledge of Mankind and of the Power & Force of human Attachments. These peculiar Circumstances of the Case prove the peculiar Nature of the Agency and explain the Intentions of the Assembly in directing that the Agent should be a man of Abilities & Address.
