Tuesday - Police came - I went below with L-d - would have noticed any fire in the furnace if I had made any. I had been fully occupied up stairs in getting things ready for letters that morning.

Seen by Dr Bacchi ~~about 2 in Broadway~~ ~~He getting into trousers~~ - Dined at home. If any fire L-d must have made it after -

Find out where (probably near the Med. Col. in Cambr. St) L-d procured potash - it was not for me - he no doubt thought he could destroy the remains with it. Must have been Monday. I had no use for it then. Besides I only use what chemists know as "Pure Potash" & it comes sealed up - I get it of Brewer Lurkin & Stevens usually. The common potash is another thing & very impure.
