Hick's Forecasts for October.

The storm period in progress at the close of September will be felt the first two days of this month in the eastern parts of the country while the high barometer and change to fair and colder weather will have advanced eastward beyond the central valley of the Mississippi.

On and touching the 4th and 5th look for return of higher temperature, falling barometer and more falling weather. All these October disturbances will wind up with rising barometer, change of winds to northwesterly and much cooler weather.

The first regular storm period proper for October is central on the 11th, and extends from the 8th to the 12th. The moon being in perigee on the 7th and on the celestial equator and new on the 8th, expect very prompt developments, in the form of falling barometer, change to quite warm, and followed by rain, wind and even thunder storms as early in the period as the 8th to 9th. Later in the period these storms will spread to the east, and along with the rising barometer behind the storms, an early touch of boreal weather will come out of the northwest, attended by high, autumnal gales over the like regions. It is possible also that delayed equinoctial storms may reach the southern coasts at this period. Within forty-eight hours of noon on the 8th' seismic disturbances in many parts of the Earth need not cause surprise.

The next storm period will be central on the 16th, 17th and 18th. This is a Vulcan reactionary period and it will bring on a disturbed weather condition that will run, most probably, into the regular storm period following. The Mercury brace shows that a Mercury equinoctial disturbance is central on the 26th, reaching from the 18th to the close of October. This fact will tend to a prolonged spell of unsettled, disturbed weather.

During the regular Vulcan period central on the 22nd, the already unsettled elements will return to very decided storm conditions. From about the 21st to the 24th general and active autumnal storms may be expected. A very depressed barometer will advance from the west, attended by storms first of rain and probable thunder, followed by early spurts of snow and sleet in northern extremes. Heavy northwesterly gales will visit the great lakes and the north Atlantic coasts at this time, and a general and decided change to colder will spread over most parts of the country with the anti-storm area that follows this period. The culminating crisis of this period will fall on and touching Monday the 24th. On and about this date will also be another period when earthquake shivers will be reported from different quarters of the globe. Look for frost well to the southward, with some freezing to the north at the end of and for some days following this period.

The last period of disturbance in October, blending with Mercury equinox, is central on the 27th and 28th. At this time look for a reaction to warmer, with falling barometer and return of rain and thick cloudiness and mist, amounting to sleet in many sections northward.

The month will go out with anti-storm ares spreading eastward from the west-northwest causing general change to much cooler.

Letter to Dr. Geo. E. Baughman

WESTMINSTER, MD

Dear Sir: The cheapest thing in the way of sending anything over the world is a postage stamp; and the cheapest way to shed water is paint.

Not whitewash; paint. Do you happen to know—it don't belong to your business to know about paint, you know—do you happen to know that most of the markers of paint stuff it out with lime and clay and sand and water and air?

They do stuff it out in the can; but not on the house. They make more gallons to sell or to buy; more money to pay for paint; more money to pay for putting it on; a good deal more money to pay for putting it on; but no more beauty; more rust; decay; disappointment; loss.

Devoe is your paint, because it's all paint, no sham, and full-measure.

Yours truly

The cheapest Watches that ever were sold,
Made of pure metal, both silver and Gold;

To see these fine goods 'tis really a treat,
And in quality and price they cannot be beat.
Now Clocks, my dear friends, I sell them so low,
A 10-dollar bill will buy a whole row;
Now facts are facts, come see for yourselves
The beautiful goods in case and on shelves.

Made of good metal, both Nickle and Gold;
We will test your eyes gladly, without any fee,
So you will always be happy, because you can see.
If your glasses get broken, disabled or bent,
We'll examine them freely, without costing a cent;
If, of new frames or lenses you stand in need
We can furnish them for you, Yes, Indeed.
