in the plea aforesaid - In Testimony whereof I have hereunto subscribed my name
Seal and affixed the seal of Calvert County Court this 20th day of November in the
Place year of our Lord eighteen hundred and forty three -
Wm. Hance, Clerk of Calvert County Court -

Richard W. Cox, a witness of lawful age being then produced on the part of the Caveators and duly sworn and examined on the interrogatories already filed by them deposeth as follows:

To the 1st Interrogatory answers yea that he was acquainted with the said Joshua from year 1819 until his death - To the 2d. Interrogatory answers he did not see the said Joshua very often prior to his death he usually came to witness house on business he saw him more frequently on business than any other way - To the 3d Interrogatory answers that the said Joshua was last at witness house he commenced talking about his child he asked said deponents wife to come and see his wife and his little son he the said Joshua reckoned that he was the finest little fellow. the deponents wife had never seen he also asked witness to come and see him, but the said Joshua said he was almost afraid for him to come and see him, because witness children were all girls and he was afraid that witness would take it from him, he was asked by Mr. Barber what name he intended to give it, and he said he expected to give it some old family name.

And thereupon the said Caveators by their proctor aforesaid exhibit the following addition interrogatory to be propounded to said witness -
Are you or not acquainted with the land of the deceased formerly owned by John Wilkinson called Youngs Attemp: If yea what is the value thereof. To which said interrogatory witness answered yea but does not know the name of the land, it is just before the door of witness, the land is worth five or six dollars per acre he reckons but does not know the number of acres.

Benjamin Gray a witness of lawful age being produced on the part of the Caveators and duly sworn and examined on the interrogatories already filed on the part of the Caveators deposeth as follows.

To the first interrogatory answers yea he was acquainted with the said Joshua about twenty or twenty one years. To the 2d. Interrogatory answers yes. he was during the whole course of his acquaintance with him. To the 3d. Interrogatory answers from what little he knew of it he manifested a pretty good feeling for his family. To the 4th Interrogatory I had at one time about ten days before his death such conversation he sent for witness at that time witness went and found the said Joshua in bed sick he then manifested a good deal of thankfulness for witness coming he asked his wife to withdraw from the room she did so his child was then setting on the floor in the same room, he commenced the conversation by pointing at the child that little child he said has caused all the bad feeling to exist between me and my brother and he then said I would wish that child to inherit my estate witness then replied, the law would make every provision, he then said I want my wife well taken care of or well provided for witness told him the law would make provision for her also, he then said there was an instrument, witness did not ask him what kind of instrument he the said Joshua then paused for a minute and said I was thinking fifty dollars, he then paused again, while in this state his brother Capt. James L. Sedwick came in the room and our conversation then stopped on the subject, this was the only conversation he had

with the deceased on that subject at the commencement of the conversation he the said Joshua said he were glad to see me he wished to advise with him on that occasion.

And thereupon the Caveators aforesaid exhibit the following additional interrogatory to be put said witness 1st Do you know the land devised in the will of deceased as the land occupied by Murray If yea what is the quantity of said land and its value - To which the said witness answers - He knows said land he cannot speak positively of the number of acres, he thinks there are one hundred and fifty or sixty acres the land is poor, he supposes that the land is worth four or four and a half dollars per acre -

Dr. John L. Parker a witness already produced and examined on the part of the Caveators being again produced and examined on the interrogatories of Caveators already filed answers as follows -

To 2d. Interrogatory says that he was several times in the course of the year 1842 at the house of the said Joshua and the said Joshua's wife and child was at the House of the said witness and that the conduct of the said Joshua towards his wife and child was uniformly kind and affectionate - To the 4th. Interrogatory he answers about the first October 1842 I was called to see Mr. Joshua Sedwick and child as Physician witness continued to visit the said Joshua and child for several days he went to see Mr. Sedwick on one occasion, he thinks on Sunday evening the day before witness did not visit him he said that James Sedwick and Sarah Sedwick came to his house from church the day before, and he observed to his brother he supposed he would hardly stay long enough from church to close his eyes - he was to die. he then pointed to his little child lying in the cradle and the said Joshua being sick himself in bed he said that child was the cause of all the grievance or ill feeling between himself and his relations and that the would be a match for them -

And thereupon the said Caveators exhibit the following additional interrogatories to be put to said witness 1st, Do you know the land upon which the deceased Joshua Sedwick resided if yea what is the quantity of said land and its value -

2d. Do you know the land described in the will of the deceased as the land occupied by Murray - If yea what is the quantity of said land and its value:

3d. Do you know the land described in the will of the deceased as the land purchased of Richard Mackall - If yea state the quantity and its value -

To the first answers he knows the land and he has road through it frequently he supposes the tract of land contains four or five hundred acres and his knowledge is derived solely from riding through said land -

To the 2d. Interrogatory answers he knows said land and supposes it contains one hundred and fifty or sixty acres - To the 3d. Interrogatory he knows said land and has understood from Dr. Broome who sold the land that it contained one hundred acres or upwards -

Whereupon the Caveatees aforesaid object to all such parts of the answers of said Witness to said additional Interrogatories as relate to the quantities of acres contained in said tracts of land and move the Court here to reject the same and the Court upon consideration sustain the objection and reject the said testimony -
