C. D. No 6. Filed 11th June 1852 by Christian Keener
Jno Carrere Clerk

A Copper Mine
Right at our own doors—

Sir; Without wishing to occupy your time with any needless preamble I take this method of informing you that a charter has been obtained for the purpose of forming a Company to purchase the well "The Bare Hill Copper Mine"

That there are but few objects of investment presenting themselves that hold out greater inducements than the one now presented to your Consideration. Ever since back as twenty five or thirty years ago the strong indications of Copper led to several Excavations which were pursued for a time with but little success and abandoned until six or seven years since when other and stronger appearances of Copper ore led to the further prosecution of the work and from that time to the present upwards of One thousand Tons of Copper ore have been Excavated; and within the last few months twenty to forty tons per month have been raised; Shafts have been sunk to the depth of about Two Hundred feet and a clearly defined vein averaging about 2½ to 3½ feet has been fairly opened, and shew that there is every reason to believe these mines contain a very large deposit of Copper Ore—and which opinion is greatly strengthened by the primative mineral formations that surround it which by miners and mineralogists are considered of the most favorable Kind.

This is not far off Golden California Schemes. It is a plain, home spun Copper affair—a mine of wealth right at our own doors—

within six or seven miles of the very spot where I am writing; and all that is wanting to make it such is an increased working capital— The mine with about ninety three acres of Land the machinery tools &c are offered at a reasonable rate, and any one can for the small fraction of a dollar get out on the Susquehanna Rail Road to the Washington Factory and see for himself he need take nothing on trust— During the last two months upwards of fifty tons per month, usual quality were raised, clearing about $1000, per month over Expenses. We have a market on the spot for all the ore we can raise and the yield is from fifteen to thirty three per cent. In May and June upwards of fifty tons per month were raised and sold. Large Blocks or samples of the ore are to be seen at my office, were the books are now open for subscription, and where all necessary information can be obtained. It is only proposed to raise a sufficiency of the Stock to form the Company at present— say $35,000. a great portion of which is already subscribed for. If you desire an interest in the same, please call on me without delay, as I wish to close the subscription before the 31st inst.

And oblige Yours truly
Christian Keener
No 160 Lombard Street

The terms are easy— not exceeding $10. per share, monthly after the formation of the Company. Plan of Subscription

1000 Shares at $100 = $100.000 of which the present proprietor retains one quarter; and for which Stock is to be issued to him; and we pay him for the mines and ninety acres with Machinery, tools &c, Balance to be subscribed $75.000.

Baltimore July 12th 1851.

Defendants Exhibit O Filed by Defendant 25th May 1852.
Jno Carrere Clerk
