IN THE CIRCUIT COURT FOR CARROLL COUNTY, IN EQUITY.

No. 4599 Equity.

Ex. Parte. In the matter of the Trust Estate of Charles E. Roop and Elizabeth S. Roop, his wife. H. Scott Roop, Trustee.

Upon the foregoing Petition it is ordered this 12th day of May, A. D. 1911, by the Circuit Court for Carroll county, sitting as a Court of Equity, that this Court take jurisdiction in the Trust Estate of the said Charles E. Roop and Elizabeth S. Roop, his wife, and that the said Trustee settle said Trust under the supervision and control of the said Circuit Court for Carroll county, sitting as a Court of Equity. And it is further ordered that the said H. Scott Roop, Trustee in the above named cause, give the usual notice to creditors of the said Chas. E. Roop, who were such prior to the 11th day of May, A. D. 1911, to file with the Clerk of the Circuit Court for Carroll county, on or before the 28th day of June, A. D. 1911, by causing a copy of this order to be published in some newspaper in Carroll county, once a week for four successive weeks before the 12th day of June, A. D. 1911.

It is the best medicine ever sold over a druggist's counter.

A SMOKELESS BOILER.

Utican Produce a Boiler That Will Burn Soft Coal and Show no Smoke from Chimney.

Utica Daily Press.

The press a few days ago contained an article on "Smoke Nuisance and the law." This article laid stress upon the serious conditions existing in all cities as the result of the use of soft or bituminous coal. This problem is in the most acute stage where soft coal is the only available fuel.

It will be interesting and gratifying to Uticans to learn that during the last twelve months there has been successfully worked out and perfected, by a local manufacturer, a boiler with its furnace of such an arrangement that all objectionable smoke is consumed and prevented, from escaping from the chimney. The manufacturer referred to is Hart & Crouse Co., of this city. This company, which has a large boiler business is those parts of the country where the smoke problem is the worst, has for a number of years been keenly alive to the need of something which would eliminate smoke, and the new boiler is the work of the company's engineers.

The boiler is of the cast-iron, horizontal sectional type. The peculiar feature consists of the presence of two fires instead of one. The upper fire is made to burn downward instead of upward, and on top of this down-burning fire all raw fuel is fed, with the result that corbon and smoke-producing elements of the coal are practically all consumed as they pass down through the bed of live coals. The second and lower fire burns on a grate some two feet lower than the upper fire and the products of the two combustants meet midway and thereby produce an absolutely white hot super-heated fire chamber in which all unconsumed products of the coal capable of furnishing smoke are completely brought into combustion. All waste fuel which is caused to fall from the uppr grate by stoking, is caught and consumed on the lower grate, which entirely prevents the waste of any fuel.

The company did considerable experimenting with this boiler in 1909, placing many of them in western cities where the smoke conditions were very bad. The boilers proved successful from the start. A number of improvements were made as the result of a season's experience, and last year the company had a very large business on this type of boiler and their success was proved beyond all doubt. Their favorable recognition will the more clearly be emphasized by the fact that orders of this type of boiler for the first quarter of this year exceed the total of last year's business.

This new boiler has completely verified the contention of experts on combustion that smoke from the chimney is a waste in the coal bill. Not only is it the testimony of all building owners who have had these boilers installed, that dark smoke is entirely eliminated and nothing seen except occasional puffs of light grayish smoke when the boiler is being stoked, but they universally acknowledge that they are able to save from one-fourth to one-third in the fuel expense over the old and wasteful method. The company has received hundreds of letters bearing testimony to these facts, and in many cases the showing is the more notable because the cheapest and dirtiest grades of coal (often merely slack and screenings) are being used.

It is the company's contention that particularly in the residence and business sections it is no longer necessary that there should be a continuance of the reunions expense, not to speak of the unsanitary conditions which soft coal smoke produces. Since the new boiler's success and merits have become so widely recognized, a number of cities in the west have taken steps through their police building department powers to compel new building operations to use smoke consuming device. Even in Utica, where soft coal is burned, there is room for for improvement in smoke conditions, as anyone will observe on certain days.

From a desire for cleanliness and economical fuel costs the fine new factory of the Hurd & Fitzgerald Shoe Co. (on the corner of Main and First streets) just being completed, has been equipped with these new smokeless boilers, and passersby will never be able to accuse this firm of contributing to the smoke nuisance.

NOTE—The Westminster Hardware Company is the agent for this city.

TUBERCULOSIS FIGHTERS WANT NEW HEALTH COMMITTEE.

A protest is registered in a statement given out today by the National Association for the Study and Prevention of Tuberculosis against the existing conditions in Congress which require measures concerning public health to be referred to a committee on commerce. At the same time, a plea was made for a new Committee on Public Health in the House of Representatives, similar to the one now existing in the Senate.

The National Association in its statement supports the Committee of One Hundred on National Health in its assertion that under the present division of committees, owing to the large number of measures before the Committee on Interstate and Foreign Commerce, public health matters do not receive the attention they deserve. The statement says that hogs, cows, and steel rails receive much more attention than the most vital of all matters, public health and the prevention of disease. At the present time, the anti-tuberculosis workers declare, no committee in the House has any direct responsibility for health legislation. It is therefore suggested that a new committee be formed, similar to the one in the Senate.

The National Association is appealing to its 510 affiliated associations in all parts of the United States to support the movement for the formation of such a committee in the House.

BIG TASK NEARS COMPLETION.

Result of Seven Years' Work on the Panama Canal.

Washington, May 20.—Uncle Sam has taken stock of what has been accomplished at Panama after seven years of hard work. May 4 ended the seventh year of canal construction by Americans. Only one-fourth of the great task of excavation remains to be done, for the "ground hogs" has removed 138,000,000 cubic yards from the line of the canal. That leaves only 44,000,000 yards to be cut away.

The placing of the concrete in the locks is more than 52 per cent. completed, the installing of the lock gates has begun and 70 per cent. of the filling for the Gatum Dam, which will feed the canal with water, has been done.

The lock gates are staggering in their vast proportions compared with the timeber gates of the canals in this country. Each leaf, of which there are two in a gate, is seven feet thick, 65 feet long and from 47 to 82 feet in height, there being no less than 92 of these leaves. Special hoisting machinery has been installed to place these massive of steel.

One of the unexpected obstacles in the construction was the development of 22 slides in the Culebra cut within a distance of nine miles, but it is stated that these will not delay the completion of the canal as the earth can easily be removed by dredges after the water is turned on.

BACKACHE IS A WARNING.

Westminster People Should Not Neglect Their Kidneys.

Backache is nature's most frequent signal of sick or weakened kidneys. To cure the pains and aches, to remove the lameness you must reach the cause—the kidneys. If you have pain through the small of your back, urinary disorders, headaches dizzy spells, or are nervous and depressed, start treating the kidneys with a tested kidney remedy. The slightest symptom of kidney trouble may be nature's warning approaching dropsy, diabetes, or fatal Bright's disease. Doan's Kidney Pills should be used at the first sign of disorder. Doan's Kidney Pills are especially for sick kidneys—have been curing kidney trouble for over 75 years. Read Westminster testimony.

M. E. Campbell, E. Main St., West- Doan's Kidney Pills, procured at Moore's Drug Store, whenever I have been in need of a kidney tonic and they have always given satisfactory results. For backache and other kidney disorders I consider this remedy unequaled."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.
