## BIBLE STUDIES

### JEHOVAH'S SUFFERING SERVANT

Isaiah 52:13; 53:1-12—July 9

*"Jehovah hath laid on him the iniquity of us all."*

IN this study we have a Divinely drawn portrait of the experiences which God fore-ordained should come upon the One whom He has promised shall ultimately be the great Messiah of glory who will exalt the nation of Israel and through it pour blessings upon all the families of the earth. Thus it is written, "In thy Seed shall all the families of the earth be blessed." Much of the prophecy of this study has already been fulfilled, but not all of it—the glorious features are yet to come, and we believe are nigh, even at the door.

These prophecies were written nearly seven hundred years before our Christian Era. They had their most striking fulfilment in the personal experiences of Jesus. However, it should not be forgotten that a faithful handful, a "little flock," the followers of Jesus, have walked in His steps during the nineteen centuries of this Age; they have followed Him through evil report and good report; they have suffered with Him, and the reproaches of those who reproached Him have fallen upon them; and when the hour of glorious revelation, the Kingdom power, shall come, these will be with their Redeemer and share His throne and glory, and, as His Bride, share His name. "This is the name whereby she shall be called, Our righteousness of Jehovah."—Jer. 23:6; 33:16.

*By a Man Came Death.*

The key to the understanding of the long delay in the establishment of Messiah's Kingdom is found in the fact that the Church is a very part of Him, members of His Body. Had it not been the Divine intention to gather an "elect" few from Israel and from all nations to be the Bride of Messiah, and a sharer in His Kingdom, there would have been no need of the long delay between the sufferings of Jesus and the outpouring of the glorious blessings which His death secures.

Again it must be remembered that the elect Church is wholly different from the nominal church, as represented in its various systems. The true Church of God consists only of the saintly few who may be found inside and outside of all denominations of Christendom. "Gather My saints together unto Me, those who have made a covenant with Me by sacrifice." (Psa. 50:5.)

There are two reasons why the world and its great ones will be astonished when the Mediatorial Kingdom shall suddenly burst upon the world. They have heard such chimerical and unreasonable statements respecting Messiah's Kingdom, even from the people of God, that they will be taken completely by surprise when they shall behold the reality.

When it shall be ushered in, following a great social revolution, it will be so much more majestically grand than anything dreamed of that every mouth shall be stopped and, as the Lord through the Prophet declares, that Kingdom of Messiah shall be the "desire of all nations."—Hag. 2:6, 7.

**As Seen by His Followers**

Chapter 53, verses 1 to 6, pictures the experiences of Jesus as viewed from the standpoint of the disciples of His day and since. Following their commission, they have told the wonderful story of the Savior's love and sacrifice, even unto death. But how few have heard, in the true sense of hearing; how few have appreciated it; how few have seen in Jesus the Arm of Jehovah, stretched down for the relief of Adam and his race from sin and death! Only a handful, the saintly few, really and truly believe the message, for surely every true believer would not only accept the proffered share of the Redeemer's merit, but also the proffered share of His sufferings, that they might have a share also in the glory to follow.

*Wounded For Our Transgressions.*

The Scriptures explain that in the Divine arrangement our Lord buys Adam and his race, condemned through his fall. Being raised from the dead by the Heavenly Father, Jehovah, Jesus is now the glorified One, merely waiting for the completion of the Church which is His Body, that He may take to Himself His great power and reign, as The Messiah of Israel and of the world. During the Messianic reign, opportunity will be given to Adam and all his race to be resurrected or uplifted out of sin and death conditions—up, up, up to full human perfection and everlasting life—to all that was lost in Adam, to all that was redeemed through the cross. This is explained in the following verse: "He shall see His seed"—His progeny; so many of Adam's progeny as will obey Him He will adopt as His children, giving them life everlasting on the plane of human perfection.

## ADMIRAL PEARY'S GIFTS ON EXHIBITION.

**Collection Includes Model of Ship Used by Arctic Pioneers.**

Admiral Peary has recently deposited in the United States National museum four pieces of silver, a notable addition to the Peary collection, which has for some months been on exhibition in the museum. The new pieces consist of a model of the type of ship used by Hudson, Davis and Baffin in their exploration of the northwest passage and three loving cups presented to Admiral Peary in recognition of his discovery of the north pole. Two of the cups were presented by the citizens of Bangor, Portland and South Portland, Me., and one by the members of the Delta Kappa Epsilon association of New York city, of which the explorer is a member.

The ship is an exact model in silver of the type of sailing vessel used by the pioneer arctic navigators of the sixteenth and seventeenth centuries and was presented by the Royal Scottish Geographical society. On one of the sails is the following inscription in Latin:

This representation of a ship
such as was used by
John Davis, Henry Hudson and William Baffin,
Illustrious Arctic Navigators of the Olden time, has been presented by
THE ROYAL SCOTTISH GEOGRAPHICAL SOCIETY
in token of congratulation, admiration and recognition to
ROBERT EDWIN PEARY,
American citizen,
an explorer of the frozen arctic not less daring than his daring predecessors,
WHO WAS THE FIRST
to attain that thrice noble goal
so long sought by innumerable mariners,
THE NORTH POLE.
Edinburgh, 24th May, 1910.

The Peary collection also embraces the flags of the National Society of the Daughters of the American Revolution, the Navy league and the Delta Kappa Epsilon fraternity, which Admiral Peary carried with him on his dash for the pole, and sixteen gold and two silver medals presented to him in recognition of his arctic explorations by various geographic and exploration societies, including the great gold medal of the National Geographic Society of the United States and the gold medal of the Royal Geographic Society of Great Britain.

## KEEP THE FLIES AWAY.

**They Dislike Blue of Any Shade and Despise Hop Vines.**

With the hot weather at hand more than one Kansan is trying out the recently advanced theories of Dr. S. J. Crumbine, secretary of the state board of health, who declares he has learned of two methods by which the common housefly can be kept away from kitchens and barns. One is to paint the barn and kitchen blue, almost any old shade, and the other is to grow hops around the doors.

The blue paint idea came from France, where two scientists, Marre and Fe, found that cow stables which were painted blue inside were avoided by flies. It was also observed that kitchens and dining rooms which were papered in blue or painted blue also seemed to keep the flies away.

A missionary from India told Dr. Crumbine that hops were used by the natives of India in the place of screens. The hop vines were allowed to grow all over the little huts, and the people were never bothered with flies. Dr. Crumbine and several of his assistants have set out hop vines around the back doors. The vines are growing all over the buildings, and Dr. Crumbine is watching the vines this summer to note whether or not the hops are really effective against the flies.

## HOBBLED SCARECROW.

**New Jersey Farmer's Idea Meets With Signal Success.**

Amos Kidder, a New Jersey farmer, is boasting of a prosperous crop of sweet corn this season. Early in the spring he determined to try a new method of keeping birds from his field and erected in the middle of his five acre patch of newly planted corn a woman scarecrow—the first and only woman in a multitude of men scarecrows in these parts. He dressed her in hobble skirt style.

The crows, which are proving a veritable plague to other farmers, were evidently neither accustomed to Kidder's woman of fashion nor attracted by her, for with aesthetic eye and a fine sense of discrimination they passed Kidder's field by and favored the corn seed of his neighbors. Kidder has been roundly criticised by various women's clubs in this section for his irreverent and satirical use of feminine fashions.

## LIMB HAS 125 PEARS.

**While Thirty-eight Apples Cling to Twelve Inch Bough.**

Never before in the memory of the oldest inhabitant have Washington fruit trees promised to bear such loads as are indicated this year.

To illustrate the heavy growths of young fruit on typical trees exhibits have been made from all parts of the fruit section.

A fourteen inch limb bears 125 pears, while on twelve inches of apple bough thirty-eight apples are clinging. The marvels are two fifteen-inch cherry limbs which are bearing 302 young Royal Anne cherries.

**Mediterranean's Size.**

The Mediterranean sea if placed across North America would make sea navigation from San Diego to Baltimore.

**Lightning's Affinity For Oak.**

Electricity in the clouds, like its companion lower down, loves to seek the earth, the great reservoir of all electricity, and it finds the most available way to do so, choosing always the best conductor, conspicuous among which are the much maligned lightning rods, the high trees or the elevated steeples. It has its choice of trees as well as other things and will leap over half an acre of trees to find an oak, for which it appears to have a special attraction, and it will pass a high point to find a building that has metal about it.

## HOW TO SAVE MINERS' LIVES.

### Public Demonstration to Be Held at Pittsburg.

### PRESIDENT WILL BE THERE.

**Twenty to Thirty Thousand Miners Expected to Be Present—Exhibition by Trained First Aid and Rescue Corps.**

In line with its effort to reduce the number of deaths in the coal mines of the United States, the bureau of mines will hold a national miners' life saving demonstration on Sept. 16 in Arsenal park, Pittsburg. President Taft, Secretary of the Interior Fisher and Dr. Joseph A. Holmes, director of the bureau of mines, will attend and speak to the miners. The bureau of mines will have the co-operation of the Pittsburg Coal Operators' association and the American Red Cross. It is expected that between 20,000 and 30,000 miners will attend and that many of the important coal companies will send their trained first aid and rescue corps to take part in the exhibition. Already a number of teams have entered and are in training for the event, which promises to be the most important gathering of miners ever assembled.

Arsenal park is the site of the testing station of the bureau of mines, and the experts of the bureau are busy arranging for a unique program. The arrangements for the first demonstration are in the hands of H. M. Wilson, engineer in charge of the bureau of mines, Pittsburg. Major Charles Lynch, medical corps, U. S. A., in charge of the first aid department of the Red Cross, and Dr. M. E. Shields of Scranton, Pa., both of whom are pioneers in this movement, are assisting. The first aid to the injured work will be one of the features of the entire day. The teams from the various coal mines will not contest, but will give exhibitions of their skill in bringing injured miners from the mines and binding the wounds and fractures. Many of these teams have been instructed in first aid by the surgeons of the American Red Cross and also by the rescue corps of the bureau of mines.

**Thousands Injured Yearly.**

Between 5,000 to 8,000 miners are injured each year in the United States, some so seriously that they die perhaps months afterward, and others are so maimed that they are cripples for life. The work of the first aid to the injured teams is to give the proper emergency treatment so that injuries will be lessened in seriousness and some of the fatalities perhaps avoided. In the anthracite region of Pennsylvania the first aid work has been highly developed through the good work of the American Red Cross, and many lives have been saved through the prompt and efficient work of the members of the various corps. This movement has become so popular in the anthracite region that annual field contests between the teams are held each year in the presence of thousands of spectators. Prizes are given to the winners by the American Red Cross, and the operators join in with contributions of badges and cups. Following the example of the anthracite region and directly as the result of the instructions in first aid to the injured and in the helmet rescue work being introduced in all parts of the United States by the rescue cars and stations of the bureau of mines, teams have recently been organized in the bituminous mining districts throughout the country. The members of these teams are eager to show their skill and will take part in the exhibition.

**Real Explosions.**

In addition to the exhibition by the first aid teams the miners will witness gas and coal dust explosions in miniature, which will be staged in the great explosives gallery of the bureau of mines. In Arsenal park there will also be a temporary gallery, which will resemble a coal mine. This will be placed at the bottom of a natural amphitheater, giving a clear view to thousands of persons. There will be a gas explosion in this play mine. Miners will be entombed, and one of the government rescue corps in oxygen helmet will enter and save the men. One side of the miniature mine will be open its entire length in order that the onlookers may witness everything that happens in an underground horror except the loss of life. The famous oxygen helmets that members of the rescue corps of the bureau wear and which have been instrumental in saving a number of lives will be on exhibition and explained to the miners. The oxygen reviving apparatus, which automatically takes the poisonous gases from the lungs of an asphyxiated miner and fills them with oxygen, will also be demonstrated. This apparatus has already brought back to consciousness a number of miners given up as dead.

**Servants In China.**

In China you can have a dozen servants for a total of less than $100 a month. And they won't steal anything, they will do their work well, and they will stay after they have learned. In the Celestial empire there is no servant problem to vex the housewife's soul, but there are enough other problems to make up for it. Good water is one; sanitary arrangements are about forty-one.

**An American Asset.**

On the steamer returning home we met an Australian lady who was bringing her son to America to be educated. It was thought strange that she should want the boy brought here for an education, with so many world famous institutions of learning in Europe.

"I want my son to be taught consideration for women," she said simply, and after having observed conditions in several countries on the continent one might well understand the reason for this high opinion of American chivalry.—National Magazine.
