Hoffman Steam Coal Company, And what their value then was? if so state them particularly and their value!

Answer. I can. There was a dwelling house No 177 at the Hoffman Mines worth two hundred and fifty dollars. Another dwelling house No 178 at the same price, No. 179 At Hoffman Mine just such a built house, at same price, two hundred and fifty dollars, No. 180 at Hoffman Mines, dwelling house at two hundred and seventy five dollars. No. 181 worth $275. No 182 at the same place $275. No 183 at the Hoffman worth $80. Nos 184 & 185 a double house at the same place worth $450. No 186 — that is a black smiths shop at the same place $160 No 187, was the old stable at the Hoffman Hollow, worth $300 No 188, at the same place worth $80. No 189 is a leased house at the same place.

I did not value that, it belongs to an individual

No 190 is at the same place and leased by an individual

No 193 is at Hoffman Hollow worth $25.

No 194 at Hoffman Mine, worth $80.

No 195 at Hoffman mine leased by an individual. No 196 is a place above the mine, at what they call "Picton Hill" worth $75. No 197 at the same place aforesaid $60, No 198 at the same place $75. No 199 at the same place $75. No 200 at the same place $75. Now No 265, that a dwelling down at Hoffman Mine again worth $250, No 266, at the same place $250 No 267, at the same place $250 No 268 at the same place $250 No 269 at the same place $260 No 270 at the same place $250. No 262 that it appears is right on the line, at Flag Meadow, near Astor Mine $190 (No 263 at the same place $190.) No 220 is Astor Saw mill worth $1000 No 221 at Astor Coke yard $110 No 223 at Astor Coke yard worth $50. No 152 & 153 at Astor Coke yard, worth $200. Thats all

6th Interrogatory Are all the buildings of which you have spoken, on the property claimed by the Hoffman Steam Coal Company?

Answer They are, as far as I know the county surveyor, Mr. Brown has run the lines

7th Interrogatory Are not all these buildings you have named within the boundaries of said property as surveyed recently by Denton S. Brown?

Answer. They are all within the boundary, except that one I spoke of before — that is on the line.

8th Interrogatory

Can you say whether any improvements or buildings have been erected on said Hoffman property by the Complainant since said sale; and yea, state the same and their values, if the same be known to you, when the same were erected?

Answer. I cant tell you anything about the sale, but I can tell you when they were erected that were put there

Hoffman Load House and Tressling were erected in 1856

sometime in April and finished in July

There was 19,840 feet of Oak sawed lumber at $15.0 pr. hundred, 8,991 feet of pine lumber @ $1.37½ per hundred 2000 feet of shingling laths at 15.0 cents per hundred feet, 7000 laf shingles, as nearly I can recollect cost $6 a thousand, the Load House and Tressling are worth $1425. I rebuilt the blacksmith shop, removed and rebuilt it in June 1856. The expense is $465.09. I built a stable and barn, began it in July and ended it in September 1856. worth $1460. I built the office — began it in September and finished it in October, worth $200. I moved the railroad scale from old Astor depot to Hoffman Mine in July 1856 — I dont value this. I dont know what the scales are worth, But the Weight office, moving the scales and masonry would be worth $110. And then I began to get stone cuts for Hoffman Engine foundation, in May 1857 and finished working by the day at such work in August 1857. I began to build Hoffman Engine House in middle of August and finished in October 1857. As far as I can give account of exclusive of quarrying and hauling stone, sand, lime and cost of bricks, $476.37 were paid for building the house cutting and laying stone and building the stack and they also pays for the lumber and material for the house.

The mine scale the small one and the weigh house were built either in July or August 1856 and are worth about $50 exclusive of the masonry work.

9th Interrogatory. Was not all this work done by the Cumberland Coal and Iron Company or its agents and who paid for the same, so far as you know?

Answer. All the work was done by the Cumberland Coal and Iron Company & its Agents and I made return of it to the office of the said Company. The Cumberland Coal and Iron paid for the same so far as I know

10th Interrogatory. In whose employment have you been since 1854 And what have been your duties in such employment?

Answer. In the Cumberland Coal and Iron Company's employment; my duty was to conduct all the building operations, such as carpenter work, keep the time of hands and make returns &c.

11th Interrogatory. Who superintended the work done and the receipt of the material used in the buildings and improvements of which you speak as erected in 1856 and after?

Answer. I did

12th Interrogatory. Who paid you for such labors and do you know any person or persons whom the complainant paid for work done and materials furnished upon or for said last buildings or improvements? name them

Answer. It was paid by the Cumberland Coal and Iron Company
