THERE ARE MANY GOOD REASONS WHY WE HANDLE CLOVERLEAF MANURE SPREADERS

Down to the smallest part Cloverleaf spreaders are constructed to insure the best work in the field with the least strain on the machine, the horses and the driver.

There is more permanent plant food value in fresh stable manure properly spread than in any other known form of fertilizer. A Cloverleaf spreader will distribute it in an even coat, light or heavy as may be required, all over a field. Manure spread in this manner returns most plant food to the soil at about half the expense and much less than half the work of hand spreading, besides doing away entirely with the most disagreeable part of the job.

To take one example of thoroughness in detail, Cloverleaf spreaders are constructed without a reach. This allows the spreader to be managed handily in small feed lots, backed up to barn doors opening into narrow yards, or turned completely in its own length; yet the absence of a reach in no way interferes with the strength or field efficiency of the machines.

We have these spreaders in many sizes—small, medium, large; wide and narrow track. Let us show you the Cloverleaf and tell you of some of the machines we have sold.

SPRAYING

Grasselli Lime and Sulphur Solution

is one of the best on the market. This solution contains 33 per cent combined lime and sulphur in solution at 32 to 33 degrees Beaume, the maximum amount that will stay in solution under various climatic conditions, to which it is liable to be exposed.

¶ It is a clean, clear, cherry colored liquid, free from sediment, works through the nozzle of the spray pump easily; and will not clog up the pump, as will some inferior solutions.

¶ Don't waste your labor on some cheap solution that will not be effective after it has been put on, besides your crop of fruit may be a failure. USE GRASELLI LIME AND SULPHUR SOLUTION, the solution that has stood the test and is endorsed by hundreds of fruit growers. SPECIAL PRICE ON BARREL AND ONE-HALF BARREL LOTS.

Arsenate of Lead

¶ The superior qualities of this article as an insectide are already well known. A few words upon this point however, may not be out of place. As the name implies, Arsenate of Lead is a chemical combination of lead and arsenic. The arsenic is a poisoning agent. The lead serves two purposes: It acts as a binder, holding the arsenic upon the foliage and forms a chemical union with the arsenic, reducing to the minimum, Soluble Arsenic which causes foliage injury

Grasselli Arsenate of Lead Paste contains 15 per cent Arsenic Oxide, combined with the maximum amount of lead consistent with good mixing qualities. IT CONTAINS LESS THAN ½ PER CENT SOLUBLE ARSENIC.

Red Cross Stoves and Ranges

are the best in the world. Made of the finest material, cheap in price and only the best workmanship used in their construction.

Monarch Paint is 100 per cent Pure.

¶ Paint and oil are cheaper now than they have been for years. Buy now for there will be a terrific demand when the season opens.

Pittsburgh Perfect Electrically Welded Fence

¶ The best in the world. No wraps or ties to slip and get out of place. Its all in the weld.

Spray Pumps

¶ We have the best proposition that you have ever heard of in Spray Pumps. It will cost you money NOT to investigate this. A $20.00 SPRAY PUMP FOR $16.00. COMPLETE WITH BARREL AND EQUIPMENT.
