Bark Wanted At Tannery Station

We will pay FOURTEEN DOLLARS AND FIFTY CENTS ($14.50) per ton of 2000 pounds for Prime Chestnut Oak Bark and EIGHT DOLLARS ($8.00) per ton of 2000 pounds for Prime Black Oak Bark, of this year's peeling, delivered in good order and condition at the Carroll Tannery, before the first day of July, 1918.

We will not buy any span oak bark this season.

The Carroll Oak Tanning Co.,
OF CARROLL COUNTY, MARYLAND
Tannery Station on the W. M. Ry.

IN MEMORIAM

In Loving remembrance of my dear father Charles W. Allen, who departed this life two years ago, March 17th, 1916.

As the bitter March winds sweep,
It causes me again to weep.
Two years have passed my heart's still sore,
As time flies on I miss him more.
I miss his guiding hand, his smiling face,
His good advice, his love, his grace.

When the evening shades are gathering,
And when sitting all alone,
In my heart there comes a longing
If you only could come home.
I know you cannot come, yet heaven seems so near,
But I am waiting father, for the summons to hear.

Dear father, never one moment are you forgotten
Never shall your memory fade;
Sweetest thoughts shall always linger,
Around the place where you are laid.
Dear God, in lonely grief I sigh,
For that loved one no longer nigh.

Submissive still would I reply:
Thy will be done.
By your son, W. T. A.

Mr. Joseph L. Mathias, Marble and granite dealer, of this city, has contracted with Miss N. B. Shearer, of Baltimore, head of the Society prevention cruelty to animals, a very handsome Barre Granite monument to be erected on their family burying lot in Louden Park Cemetery, Baltimore, Maryland.

KEEP YOUNG HORSE GROWING

Good Practice, When Not Carried to Extremes, to Allow Colts to Rough It in Winter.

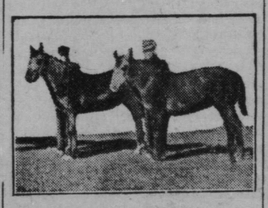

(Prepared by the United States Department of Agriculture.)

Colts that are kept growing make the best horses. Some farmers allow their young horses to "rough it" through the winter and, although this is a good practice when not carried to extremes, if the feeder is not careful it may give the colt a setback which permanently retards its development.

Feeds that will promote growth should be supplied. Good, clean clover hay is palatable and slightly laxative. Timothy hay commonly is fed. Well-cured alfalfa hay free from dust is one of the best roughages for growing, but because of its relatively high protein content it generally is economical to supplement it with other roughage such as timothy, mixed hay, or corn fodder. Besides lending variety to the ration such a method of feeding alfalfa would offset any likelihood of kidney or bowel irregularities. Sheaf oats can be used to good advantage to supplement other roughage. The animals should not be allowed to gorge themselves on dry feed. They should be given only what they will clean up readily, but at the same time enough feed should be supplied. Oats, corn and peas, preferably fed ground, are suitable grains. Bran, oil meal or gluten feed will add protein and lend variety. Cottonseed meal should not be fed to foals. Appropriate grain rations for the first winter are: Two parts corn, five parts oats, three parts bran and one part oil meal; or four parts oats, one part corn and one part bran.

Silage should not be fed to foals to any considerable extent. Sliced roots, such as carrots and sugar beets, are very palatable and have a cooling effect on the digestive system. The quantity of feed generally should be regulated by the appetite, although occasionally the appetite may be too ravenous to be a good indication. The general condition of the colt and the droppings should be observed daily. Usually not over one pound of grain per 100 pounds of live weight should be fed until the animal is two years old. A liberal supply of salt and good water and plenty of fresh air and exercise are essential for the proper development of young horses. Idleness succeeding exercise will cause constipation. It is often said that a horse is made during his first winter. Certainly this is a critical time in the animal's life, and at no other age will proper feed and attention do as much to make of him a good horse. If stunted during the first winter he never will gain proper size and shape.

During the second winter the feed and management should be nearly the same as for the first winter, except that the quantity of feed should be increased somewhat, the colt tied up in his stall and handled frequently. Education by gentle and careful but firm handling at this age will save later much strenuous labor.

Splendid Young Fillies.

BOAR IN PROPER CONDITION

Good Judgment Is Necessary and Extremes Are to Be Avoided—Vigor Is Essential.

It requires good judgment to keep a boar in the best possible condition. Extremes are to be avoided. The over-fat boar is not satisfactory, and a half-starved one cannot transmit vigor and constitution to its young.

SALT FOR SHEEP IN WINTER

When Feeding for Lamb Crop It Is Well to Remember That You Are Feeding for Wool.

Sheep need a little salt winter as well as in summer. Remember that when you are feeding for the lamb crop you are also feeding for wool. A well-fed, well-nourished ewe will shear a heavy fleece.

SOW'S FEED OF IMPORTANCE

Animal Requires Something Besides Meal—Give Her Roots, Alfalfa or Red Clover Hay.

As in the case of the boar, the sow requires something besides meal, and the furnishing of some such feeds as roots, alfalfa or red clover hay, is even more important than in feeding the boar. Skim milk is also excellent when it can be had.

Truth Will Out.

In the schoolroom the teacher was trying to illustrate a phrase found in the reading lesson, "a debt of gratitude."

"Jimmie, think of the care your parents have given you and all that they have done for you. Don't you think you owe them something?"

"Well," said honest Jimmie, "I don't knew about that, but I do know that my dad owes me 50 cents."

NEWS ITEMS

The campaign to raise a second $100,000,000 has been anounced by the American Rel Cross for the week beginning May 6. To date nearly $90,000,000 has been appropriated for war relief work.

It is reported from Germany that wood is being largely used in place of celluloid, ivory, and other substances for the manufacture of combs. Excellent toilet combs are made from thinly cut birch and beechwood.

The War Department Commission on Training Camp Activities now has 55 women deputy sheriffs working in vicinities of camps in all parts of the country.

The period during which rye flour may be used as a wheat flour substitute in Victory bread has been extended to March 31, as in some sections of the country other substitutes are not yet available.

India leads all countries in the importation of cotton goods.

Enlistments in the Regular Army since April 1, 1917, have been more than 379,000.

Packages containing dutiable gifts sent to members of the Expeditionary Forces tempararily serving in England will be delivered free of duty, provided the contents are bona fide gifts, the quantity is not beyond the personal requirements of the addresses, and that the parcels are addressed for delivery to the regimental address of the recipient.

In the new school opened at Rochester, N. Y., to train protographers for the Signal Corps, the primary training will cover four weeks along highly specialized developments brought out in the war. At its close the successful graduates will be sent on for a month's advanced training, after which they will be organized into units and sent overseas. Men with the highest grades will be given still further training for commissions as photographic intelligence officers, first at a school and then in actual flights at the flying fields.

During the month of January $11,787,517 were paid out to farmers of the United States by the Federal land banks on long-time first-mortgage loans, according to a statement by the Federal Farm Loan Board. On February 1 the total amount of money paid out to farmers since the establishment of the Federal land banks was $50,782,432, covering 24,020 loans closed. The total amount of loans applied for up to February 1 was $260,556,981, representing 112,146 applications.

Plans have been announced for the organization of "Junor Four-Minute Men" in every school in the country. According to the Division of Four-Minute Men of the Committee on Public Information, bulletins especially prepared for school children will be sent during the third Liberty loan campaign for distribution by superintendents to all schools in the United States. Addresses will be prepared from the material in these bulletins just as regular Four-Minute speakers in motion-picture houses prepare their own speeches from bulletins supplied by the Government. In each school the children submitting the best speeches are to deliver them in public. According to plans the boy or girl awarded first price is to get a certificate from the United States Government as a Junior Four-Minute Man.

According to an announcement by the War Trade Board a special license has been issued covering shipments made by persons in the United States to, and for the personal use of, individuals serving in the United States Army or Navy or the American Red Cross abroad. This license does not permit shipments by persons in this country to American prisoners of war, but has been issued to facilitate small personal shipments to soldiers and sailors and Red Cross workers by doing away with the necessity of securing an individual export license in each case. Shipments by mail under this license must be made in accordance with the regulations of the Post Office Department. If it becomes necessary later to limit this license to certain specified commodities notice will be given through the press.

The necessity for thorough and continuous training of troops in gas defense in shown by a statement proved by captured German documents: The Germans at a certain position on the western front knew the British were planning to deliver a gas attack on a German division equipped with masgs, but poorly trained in their use. In spite of the fact that they had several days to drill before conditions were suitable fo rthe British attack, when it was finally made hundreds of German casualties resulted. Many kinds of gases are used in modern warfare. Some merely affect the eyes temporarily, and are more inconvenient than serious. Other gases are terrible in their effect unless proper protection is available. They are employed in clouds, or in shells, bombs, and hand grenades. It is the work of the Field Training Section of the Gas Defense Service to bring home to the American soldier the importance of his gas mask, to thoroughly drill him in its use and to inspire confidence in its efficacy.

From the declaration of war to February 23, the Surgeon General of the Army has removed 1,050 officers of the Medical Reserve Corps. In the following table the reason assigned for discharge does not isolate under "inaptitude for the service" all those whose dismissal was in considerable degree due to inefficiency or incompetency, since these reasons had weight in many cases otherwise classified. Discharged for physical disability, 441; inaptitude for the service, 154; to join other branches, 306; domestic difficulties, 59; resignation, 88; needed by communities, hospitals, schools, 32. During the same period there have been 2,265 promotions, including some officers promoted more than once.

The United States rifle, model of 1917, commonly called the modified Enfield, has now been tested in the service of the Army a sufficient time to warrant the assertion that it more than justifies the claims made for it, according to a statement authorized by the Secretary of war. The new rifle takes a 30-caliber cartridge, which has the advantage over the British Enfield of being rimless. It has been found that unless rim cartriges are fed through the magazine uniformly with the rim of the one immediately below, jams are likely to occur. The model of 1917 has an over-all length of 46.3 inches; a total weight including oiler and thong case and bayonet of 10 pounds and 5 ounces. The breech mechanism is of the bolt type.

After three years of warfare the total number of airplants able totake the air at any one time on either side of the western front has not been over 2,500. Each plane in the air requires a force of 46 men, two replacement planes on the ground, and one training plane for every pilot who eventually reaches the front, with an extra engine for each plane. The life of a plane is not more than two months, and the engine be over hauled after each 75 hours. Now that American battle planes are going overseas, the great problem is to secure the thousands of skilled mechanics, enginemen, motor repair men, wood and metal workers needed to keep the planes in perfect condition. This engineering and mechanical force at the airdromes, the flying fields, and repair depots, both here and behind the lines in France, is a vital industrial link in the chain to air supremacy.

Manufacturers of essential food products have been advised by the Food Administration that they will be able to obtain their full necessary requirementsof sugar for manufacturing purposes during the coming year. This applies particularly to packers of fruit, conlensed milk, such vegetables for the preservation of which sugar may be necessary, as well as to the housewives, for usage in preserving purposes. As soon as the car stortage is relieved, according to the Food Administration statement, supplies of sugar will be available for these purposes. Shipments from Cuba are steadily increasing. All canners have been advised to hold for war purposes such quantities of canned corn peas, tomatoes, string beans, and salmon as they may have on hand. Such quantities as are not wanted will be released within a few days after receipt of reports showing stocks on hand, which must be submitted to the Food Administration before March 15.

A memorandum made public by the War Department concerning the use of armed guards about industrial plants contains the following: "The soldier in training who has offered his life for the defense of country should not sacrifice his effectiveness by performing police duty in the protection of properly back of the lines. This is the duty of the citizen at home. "The theater for operations for armed soldiers is the battlefield of Europe. Each civilian should aid his country by acting as a guard for the detection and prevention of intrigue, deceit, and all the familiar stealthy operations of the enemy in our midst. Each soldier unnecessarily detained as a guard in this country aids and abets the enemy in Europe. "Often a guard may be needed for the safety of a factory. When it is, it should be supplied by the owner of the factory, by the municipality, or by the State. "These measures apply not only to manufacturing plants, but are equally applicable to shipyards, grain elevators, and stores of supplies."

UNITED STATES FUEL ADMINISTRATION
Ferdinand A. Meyer
Federal Fuel Administrator for Maryland

The outstanding incidents of the week in the UNITED STATES FUEL ADMINISTRATION have been those named below.

Labor problems in different States, including West Virginia, whose minors are required to work thirty-six hours each week under the law compelling all men to do this amount of work. The miners complain that they are unable to get the thirty-six hours work to do, although they admit that neither the State official nor the operators are to blame.

There is much agitation of the subject of clean coal, and the argument for loading only clean coal at the mines are many. The saving of cars and locomotives, the diminished number of boilers are all involved. There is no good reason for hauling the slate, bone, rash and other impurities in the coal bed any appreciable distance away from the working face of the mine. Some system of securing clean coal without creating friction between the mine managers and the men is greatly to be desired.

The State of Ohio is making scientific preparations for a wood-fuel campaign. The State Fuel Administration has the co-operation of the Ohio State University and the State Agricultural Experiment Station. Directors of the Fuel Wood Division of the United States Fuel Administration for Ohio have been appointed. One to arrange with owners of wood lands to have their spare timber cut under direction of Fuel Wood Division. Another will see that the cutting is done along scientific lines in order to conserve the forest of the State. The remaining member will have charge of the Fuel Wood Committees, which are organized in each county to work collaterally with the Fuel Committees. The directors of the Fuel Wood Division are to set the price paid for stumpage and where necessary to regulate in conjunction with the local Committees, the price to be paid for fire-wood.

CANADA COPS CONTRACTS

Canada is now supplying to the United States shells, forgings, cartridge cases, and airplanes, according to a statement of Newton Rowell, president of the Canadian Cabinet Privy Council. Canada has also recieved orders for millions of tons of steel and wooden ships, and they are already at work in fill orders. Canada is going to help us catch up for the days we lost when "he kept us out of war," and if the Shipping Board does not get down to cases perhaps Canada will help us build our ships. The greatest industrial nation on earth, drugged by the language of lotus-eaters, must turn to its neighbors in its hour of danger, and, like Caesar, cry, "Help me Cassius, or I sink!"

TEN CONSTRUCTIVE RESULTS

That the Senate's investigation of the conduct of the war was constructive and helpful in its effects, has been demonstrated by Senator Joseph S. Frelinghuysen, of New Jersey, a member of the Committee on Military affairs, which conducted the inquiry. Senator Frelinghuysen enumerates ten definite and beneficial results attained as a consequence of the exposure of seven specific defects in the management of government business relating to the war. The ten achievements credited to the inquiry are as follows:

1. More business like methods, quicker decisions and more immediate results.
2. The functions of supervising contracts has been taken away from private citizens, and sworn public officials have been placed in charge.
3. A great industrial captain called to Washington as the supervisor of purchases.
4. Heads of certain bureaus replaced by younger, more virile men, with greater initiative.
5. Secret contract system abolished.
6. The question of proper clothing being studied and Gen. Pershing instructed to buy uniforms in England for the American soldiers abroad.
7. Proper consideration now paid to the health, sahitation and hygiene in the camps.
8. Contracts, yielding abnormally large profits annulled.
9. Ordnance delay is being corrected.
10. The airplane program now being pushed to the limit.

There has been an effort on the part of administration Senators and Representatives to create the impression that the inquiry hindered rather than helped in the prosecution of the war. The fact is, and it is now admitted, that before the inquiry began, the war Department was hampered by red tape which the committee insisted must be abandoned. There was a policy of secrecy regarding the names of contractors for supplies and construction, and also regarding prices paid. Secretary Baker has since announced that the policy of secrecy will be abandoned. The true facts regarding the shortage of clothing, delay in providing guns, inadequacy of hospital facilities, and the slowness of the airplane programme, were not known to the public until the committee began its hearings.

For all this information, and for the quickening results of the disclosures the country is under obligations to the Committee on Military Affairs. The chief cause for regret is that Congress did not at the outbreak of the war create a Joint Congressional Committee on the Conduct of the War, thus securing many months sooner the desirable results finally attained.

MILLERS

Mr. H. K. Miller's sale, held last Friday, was largely attended and everything brought high prices.

Miss Myrl Miller, of the State Normal School, spent Friday, Saturday and Sunday visiting her parents, Mr. and Mrs. H. K. Miller here.

Mr. and Mrs. Charles Miller and daughter Frances, of Arlington, visited their parents here Friday and Saturday.

Mr. and Mrs. John Landes, of Reisterstown, spent several days last week visiting here.

Mr. and Mrs. Horatio Bortner, of Hanover, Pa., visited Mr. Bortner's mother, Mrs. Belle Bortner, over Sunday.

Mr. Fred Graf's sale was well attended last Saturday, and good prices realized.

Mr. Frank Dell moved to his farm near St. Peter's Church last Thursday and Howard Wilhelm, of Greenmount, moved on the farm vacated by Mr. Dell.

Aaron Redding received word, this week, of his brother George Redding's death, at York, Pa.
