While Daughter is singing "The lost chord" at the piano, the householders is worrying about the lost cord of firewood that the fuel dealer won't give him credit for at present prices.

PETER SAMIOS'S LETTER TO BALTIMORE SUN.

An Ex-Citizen of Greece Eplains The Recent Elections As A Popular Revolt From The Tyranny Of A Dictator.

To The Editor of The Sun—Sir: The recent Greek elections and the complete defeat of Venizelos has brought forth a great deal of comment, both in the American and European press. I have read many articles of various papers and have come to the conclusion that most of the writers are entirely unfamiliar with Greek affairs and the political situation in Greece. The defeat of Venizelos was certain to all those who knew what has happened in Greece during the last three years.

Venizelos came to Athens after his revolution at Saloniki, and after King Constantine was forced by the French to leave in May, 1917. He was put into power with the force of the French bayonets and has since ruled by force and under martial law, employing the strictest censorship. He deposed 3,000 officers of the regular army of all ranks, dismissed thousands of Government clerks, scores of high clergymen, among them the Metropolitan of Athens, who is the head of the Greek Church, and, in fact, ran out of all offices all those who were not his political sympathizers. He court-martialed and shot hundreds, and threw into the prisons of Greece thousands of persons, to say nothing of those whom he forced into exile in foreign countries and to some small Greek islands, and the thousands who were bitterly whipped by the police. Venizelos unconstitutionally withheld the general elections for two years, violated and tore up the constitution. He was real dictator and used such tyrannical methods that can only be equaled by those used during the middle ages. Naturally, these facts are not generally known to the outside world, due to his most effective and very strict censorship.

I was in Athens when, on August 13th last, the attempted assassination of Venizelos in Paris was made known, which was followed by an uprising of the few Venizelists, breaking into the offices, homes and business places of prominent anti-Venizelists, looting, breaking and burning them. I saw myself the destruction and burning of the offices and printing plants of two newspapers of the opposition, under the eyes and protection of the police. It was on that same day that Dragoumis, a prominent member of he opposition, and formerly Ambassador of Greece to Russia, was killed by organs of the police on the street, like a dog, being stabbed seven times by bayonets and shot three times with pistols.

That Venizelos is a great statesman and a diplomat, and that he has vastly enlarged Greece everyone admits. But the greatness, glory and civilization of a country is not judged by its size in square miles alone.

Peter N. Samios.

Westminster, Md., Nov. 18.
