Two hundred and fifty pounds Current specie but afterwards Bayly gave more that this deponent lived four years adjoining this land as Tenant to the Estate of Addison and paid rent and ever since in the neighbourhood. that he has been Physician to the different families since the year seventy four and frequently has been at their houses that this place has always been in possession of Lee Hawkins or Bayly and their Sub Tenants until John Addison got possession of his Estate. and he always kept one or more Tenants on it this deponent always understood and believes that these Tenants paid rent that the Lessee of Addison and all the Tenants made use of the wood and Timber adjoining and on this Land called Discovery and never heard of any claim or hindrance until lately by Mr. Dancoast. that this cleared Land has always been inclosed until within three or four years when the rails were taken to mend the other fencing of Guilborough that all the wood land has but cut more or less on this estate and there is but very little Timber or rail stuff Left.

Wm Baker
