Here is something to interest the poultrymen. Down in Florida when a certain poultryman, who is one of the really big men in the business, desires to stop a hen from sitting he sticks a small feather through her nose. The feather diverts her thoughts from sitting and she goes to laying. It is probably based on the fact that the lower animals, like horses, cows, pigs, chickens etc., can think only one thought at one time. The insertion of a feather in her nose does the trick with a hen. Try it.

The homely Irish potato may soon lose its simplicity and adopt sophisticated foreign manners if experiments now being conducted by the United States Department of Agriculture succeed. Agricultural explorers have brought from the high Andes of Columbia and Peru rare varieties of potatoes that have a flesh as yellow as butter and a delicious nutty flavor. The tubers are a little smaller than the North American variety. Experts of the department are now engaged in crossing the new Andean potato with the common "spud." It is hoped that new forms will be developed that will combine the flavor and color of the Peruvian potato with the size and reliability of the North American tuber, and one that will be readily adaptable to the climate of the United States.

MELROSE

Fifty people from this community took advantage of the sight-seeing bus excursion which went to the "Apple Blossom Festival," at Winchester, Va., last Friday.. They were all pleased with the beautiful scenery over the mountains and through the Shenandoah Valley, which is noted for its extensive apple orchards. The parade, which is an annual event at Winchester's festival, lasted one hour and a half and was one long to be remembered. The return trip was made over a partly different route, affording the people new scenery. Everybody is well pleased with the good accommodations the bus company rendered.

Ervin Kreitzer, Raymond Warner, Curvin H. Lippy, and Cletus Warner, all from this neighborhood, each purchased a new touring car.
