An Investment for the Future

—a Six of Long Life and Advanced Design

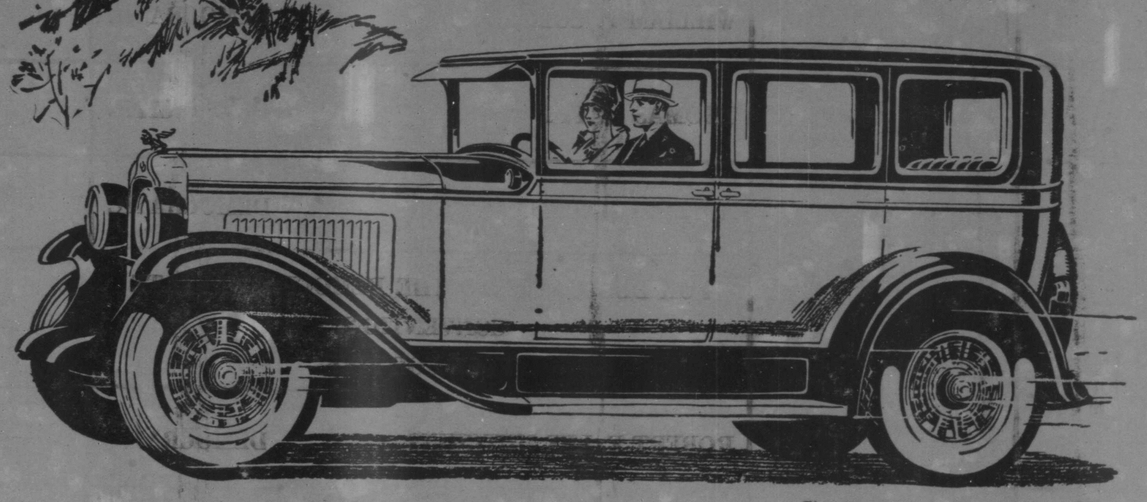

Judged by even the most critical standards, the New Series Pontiac Six is months—even years—ahead of its field. Its style is the height of fashion—achieved with low, graceful, modish lines—emphasized by magnificent new bodies by Fisher.

Its big, economical motor has the G-M-R cylinder head, for smoothness, power, snap and speed. It introduces the cross-flow radiator into the low-price field for elimination of engine cooling cares. It has every other really worthwhile feature that progressive engineering has devised! And in addition, it has that great fundamental which has been the basis of Pontiac's ever-growing success—the great fundamental of long life!

As a result the Pontiac Six will continue to assure owners a resale value which is the marvel of the industry. When you buy a Pontiac Six you know you are getting—not only a car that is new today—but a six so advanced in style and engineering, so famous for long life that its inherent value will always be consistently high!
