Dr Emmory

It looks too much like rain, & that I believe there is little chance for observing and I send Henry. The boat back — Should it look better by Ballah let the boat come then for me and I may still get few angles. Please sent Douglas to mark the scaffold if the tide is not too low.

If it should storm in the afternoon, or not be clear enough for observing, I should like to come on board in the evening — if I can return in the Longspline, it will do, otherwise the Rumble must be here to come for me by 6 o'c.

Yours

Pasc. 22 July 1847
