Sixth. That in all streets hereafter to be paved or repaved in the City, the curb stones to be used shall not be less than 3 feet long 2 feet wide and 4 1/2 inches thick, saving and excepting streets of a less width than 20 feet, where the gutter is thrown in the middle, in which case the depth of the curb to be not less than 1 foot 3 inches, and the thickness not less than 4 inches, the ends of the curbs well squared so as to make close joints the entire depth of the curb, and that they shall be set in and upon a good bed of gravel or sharp sand, and when set shall show a slope or angle of 10 degrees from a perpendicular line the top edge to be dressed to suit the said slope, and the back of the stone cut a sufficient depth for brick pavements to be fitted without cutting the brick.

Seventh. And that all gutter stones used hereafter shall not be less than two feet long, six inches thick, and nine inches wide, except where they cross the intersections of streets, when they shall not be less than three feet long and one foot wide; the edges of the gutter stone to be dressed square the full thickness, to make good joints and fit closely and that all flag stones should be in the form of a trapezium, and if laid in a single row, shall be at least three feet wide, two feet long and four and a half inches thick, or if laid in two rows, shall be one foot six inches wide, and three feet long, and should be placed angularly across the street, so that the travel will not pass directly over any one joint or seam.
