which have been used for and against the grant asked for, and have concluded that as the property bounding on Bowen's sewer is all so much disabled by the existance of that sewer, as to materially injure its value, and as the amount of nuisance cannot be sensibly increased by a well regulated slaughter house, and as the property referred to cannot be advantageously occupied in any other manner under existing circumstances, they respectfully offer the following resolution.

Mr Hack in the chair.

Mr Collins from the committee, submitted the following report, which was read and laid on the table.

The joint committee on the alms house, to which was referred the resolution directing an inquiry into the reasons why the keeper of the alms house had not complied with the requisition of resolution No 64, approved March 13th 1846, report:

Your committee ascertain from the keeper that he daily, for six or more days, sent the wagon to the place appointed, but in no instances was any person or officer found there; and only then did he discontinue to send, - no blame can therefore attach to him.

Your committee do not see any reason why the wagon should be sent to the E.D. watch house, and not

not to every other watch house in the city; but this could not be done without the purchase of another horse for the alms house.

Your committee further have ascertained that the alms house wagon is sent daily, to the central or middle district watch house, at the hours of 9 A.M, and 4 P.M; and that if any orders are sent there, at those hours, by the officers of other watch houses, the wagon will be sent to places designated, and paupers conveyed to the alms house, when they are not in condition to walk to the middle district watch house. Your committee recommend the adoption of the subjoined resolution
