right alone of the Washington factory, for $35,000. S. D. Tonge in like manner, agrees to sell the water right alone of Rockdale factory for $45,000. In like manner, Jacob P. Miller agrees to sell Rural Mill Water power, and sixteen acres of land for $30,000. In like manner, R. Hamilton agrees to sell about 12 acres of land for $12,000. By letter, Wm. Kennedy, (as President,) offers to sell the water right alone of the Mount Vernon factory reserving water to supply his steam engines, for $85,000; and Gen. O'Donnell offers to sell the Eagle Mills property at cost, being somewhat over $18,000 (see report of standing committee of 1854) if taken within a year, which time has expired, but we put it down at the above price.

Recapitulation.

Woodbury Factory	$50,000
Whitehall "	45,000
Washington "	35,000
Rockdale,	45,000
Mount Vernon,	85,000
Rural Mill and land,	30,000
Robert Hamilton - land,	12,000
Eagle property,	18,000
	$320,000

The committee have not estimated the cost of land which would be submerged by the different systems proposed for the introduction of Jones' Falls, as the resolutions of inquiry do not call for the same. We, therefore, propose the following resolution:

Jno. A. Thompson,	Wm. E. Bartlett, jr.,
James L. Suter,	William E. Beale,
Daniel Sepson,	W. S. Shoemaker,
First Branch.	Second Branch.

Resolved, that the committee be discharged from the further consideration of the subject.

A message was received from the Second Branch, proposing that when the Council adjourns this evening it stand adjourned until Monday afternoon next, which was concurred in.

Mr. White presented an ordinance, entitled "an ordinance to provide for the introduction of an increased supply of water to the city of Baltimore," which was read:

The requisite notice of intention to introduce the ordinance, as provided for by rule No. 23 of the standing rules of the Branch, not having been given, the President ruled its reception out of order.

On motion of Mr. Cox, rule No. 23 was suspended, and the ordinance received, read and ordered to be printed in bill form.

The Branch took up the resolution setting forth that the various reports and estimates that have from time to time, been presented to the Corporation in relation to the introduction of an increased supply of water, are so unsatisfactory in their details and so conflicting in their conclusions, as to render it highly expedient at the present time for the city authorities to take any decided action in relation to the same.

Mr. Cox obtained leave and withdrew the resolution.

Mr. Thompson called up bill No. 116, an ordinance to bring into the city the water of the Great Gunpowder river, which was read.

The question being upon the amendment, requesting the voters at the next municipal election, to decide by ballot for or against a full supply of pure water, as recommended by the joint committee on water,

On motion of Mr. Suter, the amendment was laid on the table.

Mr. Suter offered the following substitute for the bill, which was read:

Whereas, by a very decided vote, it was determined by her citizens, that the city of Baltimore should proceed by the next Councils, to introduce a pure and abundant supply of water;

And whereas, various committees and commissioners, and it seems to the present Councils, the public opinion generally, points to the Great Falls of Gunpowder as the source whence such pure and abundant supply should be drawn;

And whereas, it is desirable that the public mind
