# Farmers' Department.

"He who by the plow would thrive,
Himself must either hold or drive."

**Constituents of a Fertilizer.**

The following recipe is the same, or perhaps far more reliable than many others which are being hawked about the country, the "right" to use which is sold to farmers sometimes as high as $20 for a single farm. This recipe is published under the name of *Dr. Valentine's Artificial Guano, Liebig's Great Fertilizer, Dr. Risby's, or Mr. Bryan's* formula:

| | |
|---|---|
| "No. 1. Dry peat, (if not to be obtained, use garden moul or rich soil) | 20 bus. |
| No. 2. Wood ashes | 8 " |
| No. 3. Fine bone dust | 3 " |
| No. 4. Calcined plaster | 3 " |
| No. 5. Nitrate of soda | 40 lbs. |
| No. 6. Sal Ammoniac | 22 " |
| No. 7. Carb. Ammonia | 11 " |
| No. 8. Sulphate Soda | 20 " |
| No. 9. Sulphate Magnesia | 20 " |
| No. 10. Common salt | 10 " |

*Directions for Mixing.*—Mix Nos. 1, 2, 3, together; mix 5, 6, 7, 8, 9, 10 in four or five pails of water, or enough to dissolve the ingredients. When dissolved, add the 1 quid to the mixture, (1, 2, 3,) and mix as in mortar. When thoroughly mixed add No. 4, (calcined plaster,) which will absorb the liquid and bring the whole to a dry state. Mix under cover, in a dry place—pack so as to exclude air. Observe these proportions in making small or larger quantities. The above recipe will make one ton, which will manure seven and a half acres of land."

The cost can be easily calculated. Nitrate of Soda is quoted here, by our advertisers, Messrs. R. J. Baker & Co., at 6 cts.; Sal Ammoniac, 15 cts.; Carbonate of Ammonia, 24 cts.; Sulphate of Soda, 1 cent, and Sulphate Magnesia, 2½ cents per pound.—*American Farmer.*

Try Walnut Leaves.—The fly, insignificant as it is in size, and devoid of the power of doing any great harm, is one of the most annoying little pests of all the insect tribe. A nuisance to man, the fly is the terror of the horse, whose flesh is made to quiver whenever the foot of one touches him. It is, therefore, an act of humanity to come to the aid of the horse, powerful as he is, against his nimble assailant, the fly. Here is a receipe which is said to be an axcellent defence against it. At all events, a trial of it will not involve much expense, nor will it do harm should it prove unavailing as a defence to the horse:

Take two or three small handfuls of walnut leaves, upon which pour two or three quarts of cold water; let it infuse one night, and pour the whole next morning into a kettle and let it boil a quarter of an hour; when cold it will be fit for use. No more is required than to moisten a sponge, and before the horse goes out of the stable, let those parts which are the most irritable be smeared over with the liquor, viz: between and upon the ears, the neck, etc. Not only the lady or gentleman who drives out for pleasure will derive benefit from the walnut leaves thus prepared, but the coachman, the wagoner and all others who use horses during the hot months.

The Partridge the Farmers' Friend.—At a meeting of horticulturists in Illinois, ground was taken against the destruction of these birds. To show how useful this bird is, it was said that a flock of partridges were seen running along the rows of corn just sprouting, and seeing them engaged in something which was believed to be pulling up the young plants, one of them was killed and its "crop" examined, which was found to contain a cutworm, twenty-one striped bugs, and over one hundred chinch-bugs. Another member related that he had adopted measures to protect the birds, and that they had become so numerous and so tame that hundreds of them, after snow falls, could be seen in his barn-yard with his fowls, where they fed. As the result of their presence upon his premises wheat crops were usually abundant, while in many other places, not far off, the chinch-bug and other insects had destroyed half the crop.

Southern vs. Northern Fruit Trees.—At a recent meeting of the Potomac Fruit Growers' Society, at Washington city, the question whether Southern grown nursery trees were better than those grown at the North, was discussed at length.—Professor Wm. Saunders, of the Government propagating garden, John Saul, C. Gillingham, and other experienced fruit growers participating in the discussion.—It was agreed unanimously that young winter apple trees grown in the Southern States are harder, safer and produce better quality of fruit than the young trees brought from Northern States; and even further, the Southern trees carried North will produce better fruit than those rsised there. This is undoubtedly true in regard to the apple and peach, and the fact is now almost universally admitted. In regard to the pear, the difference, if any, is not so striking.

Love Apples.—A writer in an exchange says: "Who would have thought twenty years ago that the despised 'love apple' would have been converted into the useful tomato. This reminds us of the time when our people were doing their best to acquire a taste for tomatoes, then just coming into use; but it was much more than twenty years ago. If the writer's memory is not at fault, people were engaged in tomato eating forty years ago. Previous to this tomatoes were known as 'love apples,' and were not looked upon as of any real value."

Sour Milk for Hens.—Sour milk, buttermilk and whey are excellent for poultry of all ages and at all seasons, especially in winter. Milk is a very good substitute for the insect forage they are deprived of at that season, and we believe it much more profitable to give it to them than to swine. Unless it is allowed every day, it is best not to give fowls all they will drink, for they will become purged by excess, so that more harm than good will be done. A good way is to mix corn meal with the milk.

**THE EUREKA**

# FANNING MILL.

*THE GREATEST INVENTION OF THE NINETEENTH CENTURY!*

**Farmers, Look to Your Interest!**

THE attention of Farmers and Mechanics is particularly directed to the combined economy, utility and practicability of the Eureka Mill, and to the many other advantages it possesses over every other Fanning Mill which has been introduced to the public.

It is the fruit of long and patient investigation by the inventor, who has made it his constant study for over twenty years. He has secured several patents for Mills, and has always been rewarded with the best of success. But not feeling satisfied with his former attainments, he determined to reach the climax, and he now believes that his new invention will warrant him in exclaiming in the joy of his heart, like the philosopher, Phythagoras—EUREKA!—signifying in the Grecian language, "I have found it." This has given the name to this new Mill.

In this Mill are all the former improvements to which have been added several more, adding still greater advantages than were at first anticipated, or even thought possible by the inventor himself. It embraces the three great essentials necessary in every invention:

*It combines ECONOMY, UTILITY and PRACTICABILITY!*

# THE "EUREKA" MILL

Is small and lighter, and is capable of doing more and better work in a given time than any other Mill ever invented.

**IT IS THE ONLY MILL**

that will successfully remove from wheat all such pests as Cockle, Garlic, Oats, Rye, &c.

Should an extra quality of grain for seed or gristing purposes be required, it can be so arranged as to catch in one box perfect grain, and in the other, grain fit for market or mill. Here is made a great saving usually lost sight of: for nearly one quarter of the grain cleaned in the common Mills is lost when sown, on account of shrunken kernels and inferior grain. The Eureka Mill saves all this, and gives seed every kernel of which will grow when put nto the ground, and this saving will, in a hort time, pay for the Mill.

**HINES & BURCHINAL,**
Chestertown, Maryland,

Owners of the Mill, are having them manufactured at the Sash Factory and Planing Mill of Noland & Co., Port Deposit, Md., which is a guarantee that they will be put up in the best manner. jel7-tf.

**THE GOOD WIFE.**

It is just as you say, neighbor Jones,
A treasure, indeed, is my wife,
Such a woman for bustle and work,
I have never found in my life.
She makes the best bread in our Town,
Her pies are a perfect delight;
Her coffee a rich, golden brown;
Her cakes and her puddings just right.
She uses the "EXCELSIOR COOK;"
And with coal, with coke or with wood,
My breakfast and dinner will cook;
I am sure of each meal being good.

For Sale by J. K. ALDRIDGE.

WE have just received A well selected stock of *Vocal and Instrumental* **MUSIC,** which we are selling *at City Prices for Cash only.* C. F. STAM & BRO.

**NOTICE TO FARMERS.**
