Science Shrinks Piles New Way Without Surgery Stops Itch—Relieves Pain

New York, N. Y. (Special) — For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids, stop itching, and relieve pain — without surgery.

In one hemorrhoid case after another, "very striking improvement" was reported and verified by doctors' observation.

Pain was relieved promptly. And, while gently relieving pain, actual reduction or retraction (shrinking) took place.

And most amazing of all—this improvement was maintained in cases where doctors' observations were continued over a period of many months!

In fact, results were so thorough that sufferers were able to make such astonishing statements as "Piles have ceased to be a problem!" And among these sufferers were a very wide variety of hemorrhoid conditions, some of 10 to 20 years' standing.

All this, without the use of narcotics, anesthetics or astringents of any kind. The secret is a new healing substance (Bio-Dyne*)—the discovery of a world-famous research institution. Already, Bio-Dyne is in wide use for healing injured tissue on all parts of the body.

This new healing substance is offered in *suppository or ointment form* called *Preparation H.** Ask for individually sealed convenient Preparation H suppositories or Preparation H ointment with special applicator. Preparation H is sold at all drug counters. Satisfaction guaranteed or money refunded.

Morgan workshop aids teachers of science

Twenty-four teachers and prospective teachers have something concrete to take to classrooms in the fall as a result of projects which they completed in a Morgan State College summer session workshop.

Enrolled in a workshop for teachers of science, the 'teacher-students' each completed at least one big project which they intend to use in their classrooms.

The projects ranged from a study of "How Air Helps Us" to "Space Travel" and were prepared for a variety of students ranging from first graders to twelfth graders.

* * *

THE WORKSHOP was a three-week course taught by Miss Marion Gregory, assistant professor of science education at Morgan. Held for the tenth consecutive year, the workshop was designed to help teachers develop materials that are of value in teaching children.

Each workshop member was expected to center his study around his own school and to prepare a plan for working with children in the area of science.

Several specialists served as consultants for the workshop. George M. Crawford of the State Department of Education; George L. Glasheen of the United States Atomic Energy Commission; Miss Anne R. Matthews, Maryland Department of Health; Miss Eleanor Mc-Knight, City Department of Health; and Dr. Paul E. Blackwood, specialist for elementary science education, Office of Education, Washington, D.C.

Participants in the workshop, which was one of four offered by the Morgan summer session, included: Thelma G. Anderson, Gerald S. Griffin, Phyllis I. Delaney, Mary Holmes, Melba C. Faison, Doris E. Hanna, Ruby H. Gibson, Donald G. Hoes, Faye M. Lee, Alice A. Roberts, Virginia D. Fauntleroy, Ruth E. Saulesbury, M. C. Talbert, Elsie Robinson, Beatilee Covert, Jesse Reid, Edgar Smith, Lula P. SEEMED LIKE old times to a group on Saturday, when Alice Lockerman Macbeth, visiting here from Los Angeles, was entertained at the Garrison Lounge by members of the Class of '16 of Coppin Teachers College (then the Baltimore Teachers' Training School).

Elizabeth Hillen Marshall, whose brain child the reunion was, arranged the party and as a starter pinned a corsage of yellow rosebuds on the honoree as a token from her classmates.

After a delectable repast preceded by cocktails, and sparked by reminiscences of school days and hilarity over pictures from the archives of Pearl Gaines Clark, the group organized themselves, with Alice as president; Elizabeth as vice-president; Ethel Travers Harris as treasurer; and Josie Goodrich Smith as secretary.

Plans were made for an annual get-together, with missing members to be located, dues decided upon, and a special project proposed for the 50th anniversary of their graduation.
