Prefers Fuller's

EDWARD CLAYTON,

Modern Way to Control Cockroaches

"No-Roach," a new product, an odorless coating that controls cockroaches, is one of the most effective roach killers known. No-Roach is applied on surfaces frequented by roaches. The colorless coating kills the current population, then stays effective for six months to destroy later hatches. All roaches that walk across the coating become paralyzed and die within four hours. Within four days the premises are roach-free.

JOHNSTON'S NO-ROACH is not a contaminating spray . . . not a poisonous paste . . . not a messy powder. It is 10 times more effective against roaches than D. D. T. No-Roach is effective for months, and prevents re-infestation by killing any stray roaches that wander in. No-Roach is a preventive, as well as a cure. The coating is safe and sanitary, and perfectly harmless to children and pets.
